

# Workflow Guide

## YouTrack Workflow Guide

With YouTrack 3.0 we present the brand new YouTrack workflow, which allows you to customize an issue's lifecycle.

- **To get a quick introduction to YouTrack Workflow**, please refer to the [Workflow Overview](#) page.
- **To view definitions of *workflow rules with samples***, please refer to the [Workflow Rules](#) page.
- **To get a quick introduction to YouTrack Workflow Editor**, take a look at [YouTrack Workflow Editor](#) overview.
- **Before you start** creating and editing workflows, we recommend you refer to the '[Default Workflows](#)' page to get detailed explanations and samples of workflows provided in YouTrack, by default.
- For general procedures of **creating new workflow, editing and deleting existing ones, attaching workflows, etc.**, please refer to the [Managing Workflows](#) section.
- For details about supported methods, statements, operators, and other keywords, please refer to [Workflow Language Reference](#).
