

CLion 2017.3 RC, build 173.3727.18

No subsystem	Bug	CPP-11115	Access is allowed from event dispatch thread only.
	Bug	CPP-11074	Valgrind parse DIE
	Bug	CPP-11129	Preserve tree selection during Valgrind execution
	Bug	CPP-10999	Valgrind integration: handle clashing parameters
	Cosmetics	CPP-11051	Valgrind integration: Underscore disappears from target name
Code: Highlighting and Inspections	Bug	CPP-9802	Cyrillic symbols break Clang-tidy suggestions
	Bug	CPP-10530	ClangTidy: java.lang.IllegalStateException: Compiler is not found exception after rename .cpp file to .c
Code: Parsing	Bug	CPP-7461	Better recovery from parsing errors in typedefs
Code: Resolving	Bug	CPP-10995	False ambiguous error on tuple initialization
Running	Bug	CPP-11062	Run configurations cease to seem broken after using run icon near main function
	Bug	CPP-11061	Run configuration doesn't show broken icon when it can't be to run
Diff_Merge	Usability	IDEA-171250	New Auto Resolving conflicts must not automatically be applied
Editor. Editing Text	Bug	IDEA-180641	Expand selection works incorrectly on Java String with slash escaping on last position
	Bug	IDEA-179710	Wrong paste from history
	Usability	IDEA-180879	Parameter popup is absolutely incomprehensible
Find, Replace, Find Usages	Bug	IDEA-181024	Replace in path broken
User Interface	Exception	IDEA-181936	Opening 'Find In Path' from 'Find Class' throws exception
Version Control	Exception	IDEA-181922	NPE from VCS
Code Insight	Bug	PY-26243	Unresolved reference in dunder all for not imported modules
	Bug	PY-26801	PyCharm creates __init__.py in every folder to project path on new package creation action
	Bug	PY-25751	If "__all__" is used in "__init__.py" PyCharm doesn't understand type of imported package
	Exception	PY-26006	SOE if function is decorated with the same name decorator
	Exception	PY-26028	Code insights fail - StackOverflowError
	Exception	PY-26847	Pycharm 2017.2 insane logging - freezing
Console	Bug	PY-26603	Exception when stopping Python Console
Debugger	Usability	PY-26883	Show a full name of interpreter when Attaching to process on Windows
Inspections	Bug	PY-8933	Import in try block should also be defined in except block: false positive when name not used
	Usability	PY-3318	Add all words from django settings.py to spell-checker vocabulary
	Exception	PY-26061	Specific code pattern causes inspections to hang
	Exception	PY-25994	Code insight failures
Interpreters Settings	Bug	PY-26749	Can't create pyramid project if new venv is going to be created inside project
	Bug	PY-26657	don't install Flask package in Flask project creation

	Bug	PY-26594	Manually added paths to local interpreter get lost
Skeletons	Bug	PY-26751	Pregenerated skeletons get deleted if SDK path does not exactly match
