[TeamCity 8.0 Release Notes](#)

Feature

- [TW-31727](#) - Support 'Visual Studio 2013 is installed on agent' frequently used requirement
- [TW-31728](#) - Ensure build agent detects VS2013 and Microsoft Build Tools 2013
- [TW-32956](#) - Support NUnit 2.6.3

Bug

- [TW-18829](#) - TeamCity can stop checking for changes for some VCS roots if total number of root instances exceeds 1000
- [TW-20427](#) - Perforce agent side checkout hangs on agent
- [TW-23821](#) - "The token supplied to the function is invalid" and other errors from NTLM authentication without clear reason (after server restart)
- [TW-24183](#) - Git server-side checkout with password authentication fails
- [TW-24217](#) - Unclear EC2 error: "Instance was not started by TeamCity"
- [TW-29369](#) - IDEA plugin. Disable Debug Remotely button when Remote Run Configuration is selected for debug.
- [TW-29455](#) - Build cannot start due to SQL exception: "data exception: string data, right truncation" in query: insert into final_artifact_dependency
- [TW-29611](#) - "Step processing context is null" in XmlReportPlugin
- [TW-30038](#) - Remote debug from Idea doesn't show list of compatible configurations
- [TW-30851](#) - Build Failure conditions are run against diagnostics from remote run (personal builds)
- [TW-30904](#) - DotCover profiler cannot initialize on Windows 8
- [TW-31036](#) - Can't fetch <https://chromium.googlesource.com/chromium/blink>
- [TW-31330](#) - Display server Java version on diagnostics page
- [TW-31638](#) - Still getting OOM while checking for changes in Perforce (large changelist case)
- [TW-31999](#) - IDEA project runner requires at least Java 1.6 error on IDEA Project Runner start (probably caused by JavaDowser)
- [TW-32300](#) - Source code is not available in IDEA Coverage report
- [TW-32308](#) - "Pause / activate build configuration" permission works incorrect without "Edit project" permission
- [TW-32311](#) - Some nodes in change detail panel do not show full path
- [TW-32410](#) - Unexpected error when navigating to ~/agents.html
- [TW-32493](#) - Significant memory leaks on My Changes page.
- [TW-32505](#) - Deleted folder with all contained files being checked out to the agent (UTF-16 support case)
- [TW-32508](#) - Build with Git snapshot dependency builds wrong revision
- [TW-32533](#) - Check for pending changes does not accept "Build configuration ID"
- [TW-32540](#) - Invalid directory name when pull/clone from mercurial
- [TW-32724](#) - Artefact Dependencies - Artefacts Paths Treat Multiple Blank Lines as Duplicate Paths
- [TW-32733](#) - Correct misprint in common.ftp.dist template.
- [TW-32741](#) - Settings tab in configuration page not updated for "JDK home" (Gradle runner)
- [TW-32756](#) - Cannot convert IdeaJdk of type class jetbrains.buildServer.ideaSettings.IdeaJdk to class jetbrains.buildServer.ideaSettings.JavaSdk
- [TW-32794](#) - Branch label on a change log starts pointing to a wrong revision once branch is removed from repository
- [TW-32800](#) - "The changes are not yet saved" stripe is always shown on build configuration general settings page if artifacts paths field consists of several lines
- [TW-32807](#) - VCS Trigger runs builds in old branches after cleanup
- [TW-32815](#) - 'Show files' checkbox doesn't work on 'Changes' tab of queued build page.
- [TW-32845](#) - There is a problem with cmake plugin for TeamCity 8.0
- [TW-32874](#) - Ruby Environment Configurator failed to create rvm gemset
- [TW-32936](#) - bean bean not found within scope on issue log view
- [TW-32959](#) - Artifacts publishing does not work if path contains ..
- [TW-32969](#) - REST debug request for database query reports: ServiceNotFoundException: The service of type jetbrains.buildServer.serverSide.db.SQLRunnerEx
- [TW-32989](#) - Xml report plugin doesn't parse single report
- [TW-33014](#) - MS SQL: in some unusual DB configurations, function getTableColumnsMetadata() can see other schemas of the current database
- [TW-33022](#) - Backup from UI with Java 1.6 produces a zip file that is incompatible with some zip tools
- [TW-33028](#) - Link "This build is used by other builds" leads to Dependencies\Downloaded artifacts, instead of Dependencies\Delivered artifacts
- [TW-33046](#) - TeamCity opens too many connections to TFS server from tfs-native.exe processes (Team Foundation services are not available exception)

- [TW-33058](#) - Exception when attempting to edit any Run configuration in IntelliJ IDEA 12.1 (caused by TeamCity plugin 8.1.x)
- [TW-33094](#) - TestNG runner does not start from IDEA runner on Java 1.5 and UnsupportedOperationException is not reported as error in build log
- [TW-33126](#) - FxCop installation cannot be defined by the user via system.FxCopRoot
- [TW-33153](#) - Add cleanup start/finish messages into the teamcity-server.log
- [TW-33166](#) - Failed to perform checkout on agent: Timeout exception
- [TW-33198](#) - "all builds finished" is shown while there is a running build among dependencies
- [TW-33295](#) - [VS Addin] Delayed commit error reported as exception
- [TW-33320](#) - Hanging p4 processes on server (inaccessible perforce server)
- [TW-33330](#) - Extra (old) files under dotNetPackagesSupport\bin

Exception

- [TW-27760](#) - at ThrowWhatYouCanLogger.JetBrains.Util.ILogger.LogOrThrowException : This action cannot be executed on the DelayedCommitExecutor:96 thread. It's only
- [TW-32771](#) - java.io.EOFException in IDEA Code Coverage
- [TW-32998](#) - NPE in Amazon EC2 support
- [TW-33350](#) - Log in fails with "Error accessing server" while running on Jetty

Performance Problem

- [TW-25037](#) - Hanging while sending huge (several Gb's) Remote run patch from Vs Addin
- [TW-29561](#) - Do not retrieve non-needed SVN properties during changes collecting to avoid memory problems
- [TW-32422](#) - Slow groups listing in case of many projects
- [TW-32543](#) - Complex Ant script can slow down a build
- [TW-32616](#) - Lots of calls DummyBuildPromotion.isValidBranch
- [TW-33115](#) - Slow calculation of Agent's status comment
