

# TeamCity 5.1.4 Release Notes

## Feature

- [TW-12697](#) - Transparent support of maven-failsafe-plugin reports

## Bug

- [TW-13187](#) - Backup from web UI does not include build logs
- [TW-13163](#) - New file on CVS branch not caught
- [TW-13155](#) - Emma coverage suites are not loaded in IDEA plugin
- [TW-13147](#) - "Unexpected Error" when user click on myChanges
- [TW-13138](#) - Error page for changes page of a build unde MS SQL: Argument 1 for @NotNull parameter of MapParametersProviderImpl.put must not be null
- [TW-13134](#) - DotNet Coverage uses .NET v2.0 x86 inspite of coverage options
- [TW-13131](#) - Plugin-added environment variables are not passed into process run by command line runner
- [TW-13085](#) - NumberFormatException: For input string during build starting
- [TW-13030](#) - Erroneous Configuration problem found (view details) displayed for all ClearCase build specs
- [TW-13014](#) - RVM support shouldn't override rvm specific env variables if they are overridden in build configuration settings
- [TW-13009](#) - Exception on git submodule update on windows
- [TW-12971](#) - When surefire reports are not found it adds 3 seconds per a test
- [TW-12902](#) - Linux agent disconnect after exception
- [TW-12836](#) - Rails 3 + RSpec 2 + RVM fails
- [TW-12808](#) - Invalid HTML for graphs
- [TW-12795](#) - Build "Failure" after upgrading to 5.1.2 (build 13430) from 4.0.2
- [TW-12623](#) - Spelling Error on TFS Settings page
- [TW-12601](#) - On server restart, cloud agents can be terminated due to idle timeout while they are running builds
- [TW-12563](#) - Create Cloud Profile location is saved as 'EU West' when selecting 'US West'
- [TW-12489](#) - EC2 profile can switch to error state and never recover by itself after intermittent database connection failure
- [TW-12454](#) - NUnit tests not always run
- [TW-12398](#) - Opening Duplicates tab can invoke SVN externals collections in several threads
- [TW-12390](#) - Using "-recurse" parameter for "Ishistory" ClearCase command can fail
- [TW-12305](#) - MSBuild 2.0 projects not building after upgrade to TC 5.1.2 from 4.5.4
- [TW-12269](#) - NUnit test runner fails with exit code 1 in .net 4.0
- [TW-12242](#) - Git submodules fail (permission + recursive submodules case)
- [TW-12240](#) - System.ArgumentNullException in JetBrains.TeamCity.Utils.EnumerableEx.EnumerableEqualsT
- [TW-12216](#) - Perforce labeling fails if client mapping contains space: "Wrong number of words for field 'View'"
- [TW-12136](#) - Agent does not connect with DBDuplicatedRowException (several environment variables with diffs in name case only)
- [TW-11808](#) - TeamCity fails to start NCover x64
- [TW-11602](#) - Launched EC2 instance can be not recognized by the server
- [TW-11538](#) - MSBuild build runner/ mono xbuild not finding .net 3.5 assemblies
- [TW-10856](#) - Collecting mercurial changes can fail for non-english system locale
- [TW-10553](#) - Artifact dependency not downloading files without file extension if the files reside inside directory with dot (".") in the name
- [TW-4732](#) - When connection for SVN server hangs, the build is running forever in "Checking for changes" state

## Exception

- [TW-13068](#) - An exception has occurred in JetBrains.TeamCity.RemoteRun.Options.Networking.NetworkingOptionsHolder.BeforeSolutionClosed Value cannot be null. Param
- [TW-13008](#) - Cannot access a disposed object. Object name: 'VSSolutionImpl'.
- [TW-12969](#) - An exception has occurred in JetBrains.TeamCity.RemoteRun.DelayedCommit.Impl.DelayedCommitTrackerNewImpl.BeforeSolutionClosed Value cannot be null.
- [TW-12963](#) - Hidden exception in logs: svn: Skipping argument: 'D:\Work\TeamCity\vs-addin-trunk\Platform\src\TextControl\Test\svn' ends in a reserved name
- [TW-12961](#) - Hidden exception in logs: Could not get the component SvnConfigManager. The component has already been revoked from the component container.
- [TW-12959](#) - Hidden exception in logs: Cannot access a disposed object.
- [TW-12912](#) - Error executing dispatcher action FileSystemChangesCollector::FlushAccumulatedChanges on <NULL>:1. There is no Application Shell running.
- [TW-12889](#) - Error during collecting TFS changes. Caused by: Value cannot be null.

- [TW-12862](#) - Access to the path 'C:\TeamCity.RemoteRun.LocalChanges.LocalChangesSettings.xml' is denied.
- [TW-12772](#) - TeamCity Eclipse plugin crashes with perforce repository
- [TW-12760](#) - Error executing dispatcher action PersonalBuildManager::ConfigurePersonalBuild on <NULL>:1. There is no Application Shell running.
- [TW-12743](#) - NullPointerException when running personal builds from VS plugin
- [TW-9601](#) - VcsUserFriendlyException : Error during input checking
