

TeamCity 5.1 Release Notes

(view in [issue tracker](#))

Feature

- TW-211 - Make it possible to distinguish in new/old tests in notification templates
- TW-698 - Add comment into custom build run dialog
- TW-1257 - Allow user to customize TimeZone
- TW-1443 - E-mail noticator enhancement needed
- TW-1594 - Requeue stopped build
- TW-2072 - Next file/Previous file links for WebDiff
- TW-2280 - Detect installed JDK's on agents automatically
- TW-2695 - Allow to hide build configurations on Overview page
- TW-2782 - Pluggable triggers with own web UI
- TW-2987 - Display images in diff view
- TW-3033 - Ability to download change as unified diff
- TW-3099 - Collapse/expand projects on overview page
- TW-3277 - Artifacts mapping: Pack artifacts
- TW-3914 - Code coverage support for Maven runner
- TW-4727 - Label parent VCS root directories, not only the sources used for a build (ClearCase)
- TW-4779 - Send email notifications about failed builds with high priority
- TW-5074 - Search by build logs
- TW-5184 - Installed plugins page
- TW-5570 - Allow to put database driver jar under .BuildServer
- TW-5948 - Ability to define order of build configurations on the overview page
- TW-5971 - Trigger a build forcing a current one as it's dependency
- TW-5986 - Exclude non-wildcard matched directories from artifact dependencies target path
- TW-6019 - Pager for the search results
- TW-6877 - Provide an extension point for custom build triggers
- TW-6982 - Add notification template pattern to reference error messages
- TW-7333 - Add send feedback link to ide plugins
- TW-7923 - Jabber notifications should include user who started a build
- TW-8233 - No way to reference just the responsible user name in notification templates
- TW-8235 - Use more capable template engine for the notification templates
- TW-8601 - Build runner for Visual Studio 2010 project
- TW-8686 - Run personal build: agent selection form
- TW-8743 - Support for Checkstyle
- TW-8777 - Simplify TeamCity server tuning - use JNDI instead of system properties
- TW-9068 - Ability to remove more then one build at a time from build queue
- TW-9471 - Custom artifact dependency set for a snapshot dependency should not trigger snapshot build
- TW-9570 - Respect "svn:ignore" property when scanning for changed files
- TW-9777 - Support TFS VS2010 checkout
- TW-9868 - Support unpacking tar.gz archives in artifact dependencies
- TW-10003 - Remote-run plugin should support custom properties
- TW-10004 - Support custom build parameters for remote run build (VS)
- TW-10005 - Support custom build parameters for remote run build (Eclipse)
- TW-10045 - TeamCity NUnit launcher should be able to start process per assembly
- TW-10067 - Maven trigger for all current Maven artifact dependencies
- TW-10085 - Display Current problems for a Project
- TW-10216 - Display properties of agent image
- TW-10352 - Do not reset selected agents for build configuration in Remote Run dialog
- TW-10420 - TFS 2010 VCS Integration Support
- TW-10452 - Provide IDEA plugin repository descriptor so that TeamCity plugin can be installed via URL
- TW-10481 - Log NUnit test parameters from [TestFixture] attribute
- TW-10486 - Allow to take responsibility for a test right from the IDE plugin
- TW-10545 - Ability to mark responsibility as fixed
- TW-10546 - Add actions to TeamCity tab toolbar available in context menu
- TW-10624 - Warn user when switching to new format Subversion working copy
- TW-10628 - Add support for NUnit 2.5.3
- TW-10639 - Support "US West" region for EC2
- TW-10735 - Unify artifact URLs for one artifact and all artifacts
- TW-10815 - Display a warning for system administrators if jabber notifications sending failed
- TW-10865 - Allow to download server thread dump taken on /admin/diagnostic.html from web UI
- TW-10880 - Upgrade bundled Tomcat
- TW-10918 - Allow to report .Net coverage form any runner via service messages
- TW-10948 - Support MSTest 10 (vs 2010)
- TW-10979 - Option to disable all tasks substitutions in NAnt runner
- TW-10981 - Ensure NAnt <nunit2> task supports .NET Framework 4.0

- TW-11078 - Support multiple specification of the same archive in the right part of artifacts publishing patterns
- TW-11181 - Mark new failed tests in the IDEA failed test list
- TW-11215 - Template - allow redefinition of Build triggers
- TW-11279 - Include user who triggered a build into build started email notification
- TW-11314 - Support Perforce move/delete in VS plugin
- TW-11328 - Display notification template errors in web UI for administrators
- TW-11405 - Create .BuildServer/lib/jdbc directory by default
- TW-11441 - Make changes links in the email notifications
- TW-11533 - Allow to select Amazon EC2 Availability zone for started instances
- TW-11571 - Support NUnit 2.5.4
- TW-11590 - Add support for .bmp images to diff view

Usability Problem

- TW-1602 - Make "Cannot run process" message for Command Line runner more user friendly
- TW-3063 - Add ability to review commit failed message
- TW-3070 - "Open in Browser" button jumps in the toolbar
- TW-3857 - Ability to show pending build configuration for a change on My Changes page
- TW-4735 - VCS Build Trigger Patterns description is unclear
- TW-7037 - On starting history build, display warning on changed VCS roots only if the VCS root settings were really changed
- TW-7707 - Display personal build change comment when viewing personal build results
- TW-9712 - TeamCity Plugin for VS 2008 - v5 EAP - TFS Query list is empty
- TW-10345 - "Remote Run" action should be available even if I am not logged into TeamCity
- TW-10794 - Inform user that "Opened solution contains no Subversion versioned resources" in Visual Studio add-in
- TW-10827 - Truncate leading/trailing spaces in path to .ipr
- TW-11001 - Let's group problems by their type on "Current problems" tab
- TW-11034 - Do not write "<1s" in agent matrix for no builds value
- TW-11333 - List target database tables names in the "Target database is not empty." message
- TW-11379 - NUnit suite name displays "<no suite>"
- TW-11507 - Close Login dialog if there is incompatible plugin version was detected
- TW-11510 - Problematic tests link looks strange
- TW-11531 - Minimize Add Trigger dialog movements
- TW-11587 - Confusing "Pre-tested commit is not yet available for distributed version controls." text for git in Remote Run dialog

Bug

- TW-3188 - Test can be mistakenly reported as new after successful build with failed test
- TW-3487 - Log inability to delete files during sources cleaning into the build log (agent checkout)
- TW-3897 - Configure DNS names caching for build agent
- TW-5200 - Login page can render inside another page after partial refresh
- TW-5282 - More informative subject for e-mail notifications
- TW-5296 - VCS triggering exclude rule does not work with VCS paths
- TW-6189 - NAnt verbosity is very detailed, but should be minimal
- TW-6314 - Not user-friendly messages on queries with special symbols
- TW-6332 - TeamCity Windows installer: start service checkboxes should not be checked if user didn't enable services
- TW-6798 - Wrong notification on dropping responsibility: 'Responsible changed: None available' instead of 'Fixed/Given up. <Message>"
- TW-7038 - Search popup is not limited in width
- TW-7381 - Files with UTF-16 filetype in Perforce are not handled correctly
- TW-8011 - Package/class is not parsed correctly for <name1>\${<name2>}.<path> test name case
- TW-8234 - Notification templates are not upgraded on TeamCity upgrade (if not modified by the user)
- TW-8296 - Too verbose TFS discovery fail message in agent log
- TW-8599 - Unable collect mapping for SVN remote run
- TW-8621 - Ability to include important messages from the build log into email notification
- TW-8637 - All Users group should be disabled deselected for guest user in Add to Groups dialog
- TW-8774 - Rework Changes control in the Remote Run Wizard
- TW-8823 - User with "Archive/dearchive project" and edit project permission does not see Archive/Dearchive action
- TW-8923 - Subject of email notifications does not support non-latin characters
- TW-9044 - If I hide the toolbar, I DON'T want it to keep re-appearing everytime I open VS2008...
- TW-9050 - Unable to determine the workspace: add call to Add call to "tf.exe workspaces"
- TW-9108 - Cannot differentiate several artifact dependencies on the same build configuration in custom build run dialog
- TW-9141 - Double click in the local changes view should open file, but not diff
- TW-9150 - Cannot see test with order greater then 10000 on Tests tab
- TW-9196 - JUnit parameterized tests are not reported correctly
- TW-9221 - Adjust build copy messages in audit log
- TW-9353 - Cleanup hangs if plugin throws exception from DataCleaner:performCleanup
- TW-9401 - Log XML-RPC exceptions into the server log
- TW-9544 - No way to cut the '#' sign from BUILD_NUMBER in notification templates

- TW-9605 - Log VcsException stacktrace with debug priority
- TW-9610 - Error synchronizing users from LDAP: SizeLimitExceededException: [LDAP: error code 4 - Sizelimit Exceeded]
- TW-9663 - Exception occurs if build is started under the IBM JDK
- TW-9736 - Memory leak on Projects in IE8
- TW-9766 - Display agent type properties for obsolete cloud agents
- TW-9829 - Adjust dep. properties references on project copy
- TW-9918 - Command line help should have information that directory can be used in path
- TW-9955 - Empty Options dialog when no solution is opened
- TW-9985 - Add default ports to all default database.properties files
- TW-10037 - Change responsibility messages: empty comments
- TW-10075 - Do not force push after the tagging in Mercurial
- TW-10092 - Change log does not display pending changes if "from" build is specified with no "to" build
- TW-10093 - Resetting search caches produces FileNotFoundException errors in the log
- TW-10103 - Attempt to load non-existing build configuraiton loads Overview page without any notes
- TW-10104 - Got error in the middle of the page: "IllegalStateException: getAttribute: Session already invalidated"
- TW-10108 - Vault collecting changes error after TeamCity server restart
- TW-10119 - Agent matrix should not display removed cloud agents (should display all their builds in a single column corresponding to agent type)
- TW-10150 - Ensure cloned mercurial repository is cleaned on manual "Enforce clean checkout"
- TW-10156 - MSTest requires both testcontainer and runconfig - these are currently mutually exclusive
- TW-10192 - Confusing error message on attempt to backup empty database
- TW-10198 - Mark new failed tests in "Failed tests from dependent builds" build results section
- TW-10224 - Exceeding the maximum allowed artifact size is not verbose enough
- TW-10259 - Popup with failed tests on myChanges page can go beyond the boundaries of the window in Opera
- TW-10296 - Parametrized test parsing breaks when parameters contain parenthesis
- TW-10297 - Make test name a link on My Changes "new failed tests" block
- TW-10330 - Server startup exception is not logged appropriately into the server log
- TW-10337 - Missing MqSQL driver results in error NoClassDefFoundError for CommunicationsException
- TW-10351 - Recent comments should list the most recent comments at top
- TW-10353 - Open unified diff view by default
- TW-10366 - Improve "There are no projects to show" message
- TW-10387 - Can't edit settings of two IPR-based runners in two browser tabs
- TW-10388 - Improve wording of "Inspections were not gathered" message
- TW-10393 - VS2008: My Changes -> Open In Web doesn't scroll page to selected item.
- TW-10424 - Provide correct database settings
- TW-10433 - Failed to write the version file to disk when the System subdirectory doesn't exist
- TW-10435 - Can't run two TeamCity servers using one MySQL server and different databases
- TW-10449 - EMail/Jabber Notifier forms: incorrect size of 'test connection failed' error message
- TW-10451 - NullPointerException appears when trying to Remove All Successful Remote Runs in Eclipse plugin
- TW-10459 - Remove mandatory populate/synchronize option in Local Changes
- TW-10461 - StarTeam connection open and not closed when collecting changes for promotion state based VCS roots
- TW-10463 - Maven inter-module dependency treated as external when artifact type not equal to module's packaging
- TW-10464 - Maven SNAPSHOT trigger won't trigger a build even if resolving of a single SNAPSHOT dependency fails
- TW-10465 - FxCop runner wildcards should be case insensitive
- TW-10466 - FxCop runner should not start FxCop if there was no assemblies matched.
- TW-10467 - .NET DupFinder: 'Enable debug messages in the build log' should not be enabled by default
- TW-10470 - See details link does refresh instead of showing details
- TW-10473 - Wrong svn version may lead to result: 'No changes were found. Refresh'
- TW-10474 - I can not make VS addin recollect changes after recieveing 'Failed to collect changes error'
- TW-10475 - VS addin SVN roots lookup
- TW-10482 - Rename "TC Change Sets"
- TW-10484 - MySQLIntegrityConstraintViolationException on adding the same project/role the second time
- TW-10488 - Constraint violated exception in server log after code inspection process.
- TW-10493 - No VCS root usage section when opening VCS edit page from Project's VCS Roots tab
- TW-10496 - Vcs Trigger itself must not apply checkout rules when triggering by rules is computed
- TW-10497 - Report missing version.dat as critical server startup error
- TW-10500 - Artifacts with < and > in their names cause the HTML to break
- TW-10501 - Command line runner actual command is not logged into agent log
- TW-10502 - Cannot run a program specified by absolute path via command line runner
- TW-10503 - Build fails with "Failed to process Ant JUnit reports" and no tests reported when some file cannot be parsed by XML test reporter
- TW-10515 - Test name parsing error
- TW-10517 - Incorrect changes detection (incoming folder add/delete case)
- TW-10518 - Remove Synchronize view text sub-caption
- TW-10520 - Show changed files from the previous parent revision if changes to compare have different parents
- TW-10524 - Exception is thrown from StringUtil.formatFileSize() if agent is run in headless mode
- TW-10528 - can't start TeamCity after upgrade with windows installer
- TW-10529 - Responsible for build configuration doesn't appears in Watched Project
- TW-10535 - User details can be obtained by unauthorized user via REST request
- TW-10536 - Deleting the target of an svn:externals causes fatal errors
- TW-10537 - Cannot make administrator user non-administrator in Professional mode

- TW-10539 - Error after archiving a project
- TW-10542 - Changes not appears in Local changes tab just after project creation
- TW-10544 - Exception occurs on attempt to restore personal build in queue if parent of the build is cancelled
- TW-10551 - Selecting the first changelist in custom run dialog forces the latest revision
- TW-10559 - Deleting folder with file was not detected by eclipse plugin
- TW-10564 - Builds won't start with "Timeout while loading build log"
- TW-10571 - A configuration can be triggered by VCS on server start while there are no pending changes (and "Trigger on changes in snapshot dependencies" enabled)
- TW-10572 - HSQLDB takes twice as much space on disk after restoration
- TW-10583 - Issue Id Pattern documentation missing for Bugzilla
- TW-10584 - Provide more details for bugzilla connection error
- TW-10596 - Exceptions on delayed commit
- TW-10603 - Popup with changed files on Overview page can go beyond the boundaries of the window in Internet Explorer 8
- TW-10604 - Show fixed build status icon the same as in web UI
- TW-10611 - Partial update of Local Changes process number of directories even if full update just ended
- TW-10613 - VS-add in doesn't collect changes in SVN externals if working copy root specified explicitly
- TW-10621 - Exception from TestNGLogger
- TW-10626 - "..." in agent matrix
- TW-10640 - User with "b_<Archive_b_</b_<dearchive project" and edit project permissions gets Access Denied on project archivation
- TW-10642 - Single quote is rendered as ' in diff view under IE8
- TW-10650 - Subversion patch exception: jetbrains.buildServer.vcs.VcsException: ClientAbortException: java.net.SocketException: Broken pipe
- TW-10653 - Big HSQL database shuts down for more then 5 minutes
- TW-10661 - Visual Studio plugin doesn't detect svn versioned files, if they are locked by external process
- TW-10665 - Test connection for Jira shows undefined values despite reporting success
- TW-10675 - Improve error reporting for the wrong REST URL
- TW-10680 - Agent should add public EC2 ip address to the list of alternative addresses
- TW-10690 - Inspections summary overriding test results summary
- TW-10698 - Cannot cancel build on Solaris agent
- TW-10701 - Remote Run Crash - Oracle DB Exception
- TW-10713 - Cannot sent patch for remote run (Git)
- TW-10726 - Provide working default parameters for .NET coverage
- TW-10745 - Status icons on collapsed project's does not looks well
- TW-10754 - Deadlock in MSSQL
- TW-10762 - Can't find VCS root by full name on VCS roots list
- TW-10763 - ClearCase Problem while loading patch data stream: Read timed out; Not respecting Load statement in config spec.
- TW-10767 - Initial clone of large repository can take enormous time
- TW-10770 - FreeBSD 8 Install
- TW-10778 - Can't see external file diff tool link while fileDiffUrl configured in change-viewer.properties
- TW-10780 - Eliminate "poolPreparedStatements=true" from database configs
- TW-10784 - java.lang.SecurityException: Unable to locate a login configuration after upgrading to TeamCity 5.0.1
- TW-10801 - relativePath substitution in change-viewers.properties resolves to agent-mapped path
- TW-10803 - NUnit tests from parameterized TestFixture attributes do not have links to classes/packages
- TW-10808 - Perforce Checkout Rules - CRLF Errors
- TW-10812 - ClearCase Label Movements (and therefore changes of its contents) are not detected on Folders
- TW-10813 - Exception from change viewers plugin
- TW-10814 - Deleted files are not detected by Swabra
- TW-10824 - TeamCity addin for NUnit produces too much logging
- TW-10828 - IPR runner cannot find path variables if they are not listed in .ipr (UsedPathMacros tag is obsolete and is removed by IDEA 9.0 and earlier builds)
- TW-10829 - File change list popup can go under changes popup in IE
- TW-10837 - Filter by selected files is reset on automatic Local Changes refresh after switch to VS
- TW-10843 - TeamCity server stops collecting changes because of problems with SVN+SSH connection
- TW-10844 - TeamCity Amazon plugin may add ec2-related properties with invalid values to the agent when not under ec2
- TW-10845 - Do not detect directory as modified
- TW-10846 - Deleted files does not make checkout directory "dirty" in Swabra
- TW-10848 - EC2 agents can stuck in "starting" state
- TW-10850 - EC2 agent idle timeout is measured from the agent start command, not the agent actually started
- TW-10852 - Transformation patterns duplicated on each save on Server Configuration page
- TW-10858 - Some junit tests hang when runnig in TeamCity 5
- TW-10860 - Maintain DB tool can hang on connection to database
- TW-10870 - Server log zip file name can use single digit for month/day
- TW-10876 - Too long applicable configurations call
- TW-10877 - Hanging P4 processes started by the server
- TW-10884 - Wrong notification after removing test responsibility
- TW-10888 - Wrong buildStatisticValue service message can cause server reporting unexpected NumberFormatException
- TW-10900 - Error executing batch ... nested exception is java.sql.BatchUpdateException: failed batch
- TW-10902 - Inspections build needs mandatory PermGen space memory tuning

- TW-10912 - Cleanup hangs on MS SQL in case of hundreds/thousands dependent builds
- TW-10924 - Project administrator can change server settings
- TW-10928 - Local checkout rule not working for Mercurial VSC Root
- TW-10938 - Maven classifier not recognized on dependency-change-lookup
- TW-10945 - "Configuration problems found (view details)" message doesn't disappear after fixing the problem
- TW-10950 - "Show builds" option state is not remembered between server restarts
- TW-10962 - Timeout during email test connection results in "loading" page and no test connection result displayed to the user
- TW-10970 - When copying a templated project, dependencies are not pointed at the newly created build-config - they point at the source, still
- TW-10972 - Old (TemplatePatternProcessor-based) way of adding substitution patterns into notification templates does not work
- TW-10976 - StringIndexOutOfBoundsException from PluginsController.getDetectedPlugins on server settings
- TW-10983 - Many Maven-related logging in console
- TW-10989 - Rename "Solution" runner into strong VS-related name
- TW-10992 - Freemarker errors are printed to console with stacktrace by default
- TW-10993 - "Plugins" is the first tab on Server Configuration
- TW-10994 - Hide default bundled plugins from Plugins page
- TW-10996 - Invalid reference exception on line 9
- TW-10998 - Firefox crashes when overview is opened for some time
- TW-11002 - MSTest runner failed to parse generated mstest report
- TW-11005 - Expand / collapse icon disappears from the project title after some time
- TW-11024 - possible OOM while server start
- TW-11026 - Plugin update performed in UI thread, locks IDEA
- TW-11027 - Changes can be not displayed in a build, while present on Change Log
- TW-11028 - NPE from buildServer.tree.changesTree.TreeLinksHelper.runActionIfMouseIsOverLink
- TW-11030 - Describe TeamCity 5.1 notifications templates configuration
- TW-11036 - Enabling coverage can produce errors caused by libraries incompatibility
- TW-11037 - Unnecessary LDAP-related logging when LDAP is not configured
- TW-11038 - Test names with minus in the name are not parsed correctly for suite/package
- TW-11046 - Unify presentation of new failed tests on My Changes and Change details
- TW-11047 - Can't install new TeamCity server after manual uninstalling
- TW-11048 - NUnit support does not work with only .Net 4.0 framework installed
- TW-11049 - Unable to use TFS with .Net framework 4.0 installed only
- TW-11050 - Do not log anything to cloud-specific log until cloud is used
- TW-11054 - Windows tray and IDE notifications contain no text, just a link
- TW-11057 - Move feed templates under _notification directory
- TW-11064 - Project id clash can occur on project copying if id.properties contains wrong values
- TW-11065 - "Test responsibility changed" template is used for assigned test responsibility and user who assigned the notification is not mentioned
- TW-11069 - Selected item disappears from view
- TW-11074 - Backslashes problem in the \$TEAMCITY_SYSTEM_PATH property in database.properties (former: Cannot restore backup into internal database)
- TW-11075 - No whitespaces in Jabber notifications
- TW-11076 - Timestamps are not preserved for files inside zip-packed artifacts
- TW-11079 - Fix NUnitVersion attribute description.
- TW-11093 - Cloud-fake plugin must not be included into the distribution
- TW-11095 - Change detail page should not trim file names
- TW-11096 - Too tall Project block header on overview in IE8
- TW-11097 - In My Changes view display "<no comment>" no a commit with no comment
- TW-11098 - Change name of the server thread dump file
- TW-11099 - Sticking "Server is maintaining its database" page in IE8: the page is not refreshed after cleanup finish
- TW-11100 - Project "collapse" icon stops working after some time
- TW-11104 - Spelling error on Project administration page
- TW-11105 - IllegalArgumentException on Audit page (page loads empty)
- TW-11107 - Not timezone-adjusted time in build queue build estimate popup
- TW-11108 - Build comment audit entry is duplicated
- TW-11110 - Cannot enforce Clean checkout on Mac safari browser
- TW-11116 - Template-using configuration can get VCS roots to label list non-synchronized with the template
- TW-11117 - Build configuration property value is displayed escaped on edit
- TW-11119 - Can't define multiple-lines checkout rules in single property
- TW-11128 - VCS Username specified on user profile does not affect changes binding on My Changes
- TW-11129 - Remove "This page is still under construction." notes from documentation
- TW-11130 - Shoulda test results using the Rake Runner do not parse correctly
- TW-11143 - Duplicate report cannot resolve file paths with parameters
- TW-11145 - Loading agent dialog should support cancelation
- TW-11150 - Promote build artifacts does not work if there is more than one artifact dependency on this build configuration
- TW-11153 - Long time detecting changes in SVN for R# VCS root
- TW-11156 - Cannot save "admin" options for a group in professional edition if there are no groups: no Save button
- TW-11157 - User with create project permission gets "You do not have enough permissions for this function" on project creation

- TW-11160 - Changing permissions in a role does not apply the changes immediately
- TW-11162 - Do not add ", exceed set limit: 0" to Inspections build status if the limit is default (0)
- TW-11169 - Trim email notification messages over certain size
- TW-11170 - Can't remove role from a group after role editing
- TW-11173 - Inspections build run over 1.5 Maven project produces errors for JDK 1.5 constructs
- TW-11174 - rake_ext exception with rake build runner: 'block in format_exception_msg': invalid backref number/name
- TW-11184 - Support TFS 2010 in Visual Studio plugin
- TW-11187 - No default labeling pattern for newly created configurations
- TW-11190 - Swabra plugin does not consider artifacts to be dirty
- TW-11198 - Javascript error on search term with a single quote
- TW-11209 - Windows Date/Time display format affects Delayed commit.
- TW-11211 - VS Plugin "There is not suitable build configurations for selected changes"
- TW-11218 - Code Analysis Build shows errors which don't show in IntelliJ after 5 upgrade
- TW-11222 - TeamCity plugin for Idea could not login: NPE
- TW-11223 - *.resharper.user files are created near .sln by TeamCity add-in
- TW-11225 - Agent become incompatible with "nunit_include: It's imposible to have excludes without includes"
- TW-11234 - NPE
- TW-11235 - Make "an out of memory or crash is detected" option more descriptive to the cases supported
- TW-11239 - Add "TeamCity" to Local Changes tool window title
- TW-11240 - Svn uuid computaion failure should be reported!
- TW-11243 - New version of JNIWrapper causes problems with Java Classloaders under 64bit JDK
- TW-11245 - Rake builds fail, cannot edit build configuration
- TW-11249 - Error during AuditLogDataCleaner execution: Invalid argument in JDBC call: parameter index out of range: 301
- TW-11262 - "Visual Studio (sln)" runner name is shifted in the build configuration settings step
- TW-11270 - NPE when trying to restore from backup
- TW-11274 - Adjust responsibility change notification when user tooks responsibility
- TW-11276 - Issue Installing TeamCity 5.0.2
- TW-11299 - Test can be mistakenly reported as failing since a more recent build then it actually fails from
- TW-11302 - Cannot load build configuration overview: InstantiationException: bean hiddenBuildTypesNumber not found within scope
- TW-11303 - TeamCity failed to start - HSQL out of memory crash on existent database when no 'database.properties' file
- TW-11307 - Multiple "Client error : AWS was not able to validate the provided access credentials" in server log on wrong EC2 credentials
- TW-11309 - Impossible to view Responsibilities page after once appeared problem with permissions.
- TW-11310 - PartCover 2.3 shows incorrect number of total lines
- TW-11311 - Changing user on responsibilities tab does not have "loading" state
- TW-11320 - Dupfinder fails to parse .cs files
- TW-11325 - Eclipse plugin crashes with Perforce 2009.2 changelist with 'shelved files'
- TW-11336 - The maintainDB tool mixes source or target database settings with default settings.
- TW-11337 - The maintainDB tool should say something before/after dropping a database.
- TW-11340 - Artifact dependency can be spoiled on upgrading to 5.1 (/ * pattern case)
- TW-11343 - Cannot unpack archive in artifact dependencies: Invalid octal digit at position...
- TW-11349 - Improve missing registry native tool missing error
- TW-11365 - MSBuild runner does not run default target(s) if tests was enabled
- TW-11369 - Remote Run dialog in VS add-in was opened with empty Suitable Configurations list
- TW-11371 - CVS support: Eclipse's integration brokes binaries(*.zip & *.jar at least) over Delayed Commit.
- TW-11375 - Updating project-config.xml kicks off builds with dependencies defined in "Build Triggering"
- TW-11383 - ResponsiblesXmlConverter can fail on some kind of databases
- TW-11387 - Display descriptive warning on no configurations for remote run (Eclipse plugin)
- TW-11391 - Improve logging for errors in notification template
- TW-11393 - Improve error message on missing database driver class
- TW-11403 - Missing Swabra snapshot should not fail the build
- TW-11404 - Cannot run a build form IDEA
- TW-11418 - Make .war distribution default logging be the same as other distributions
- TW-11419 - FxCop not found on build agent after upgrade to 5.1.13215
- TW-11423 - SQLException: Data source is closed
- TW-11425 - Cloud Available Profiles table dissapears
- TW-11428 - Lines can be wrapped on agent history tab of agent prototype
- TW-11431 - Rename agent prototype columns on agent matrix
- TW-11433 - Possible "Agent does not exist" for old agents that were run before agent prototype introduction
- TW-11449 - VS add-in doesn't validate Perforce unresolved conflicts on starting personal build.
- TW-11450 - Improve notification sending error logging
- TW-11460 - No "logs" directory after upgrade with Windows installer
- TW-11473 - NullPointerException at TeamCity-Login from Eclipse-IDE
- TW-11476 - Wrong artifact dependency details in run custom build dialog (no permissions for some dependencies case)
- TW-11485 - /c in parameters to command line runner is ignored
- TW-11489 - Visual Studio plugin doesn't show the description text from Perforce changelists containing colons
- TW-11490 - Support NAnt 0.90 alpha 1
- TW-11498 - Test failure popup can display data that mismatch the text in the test failures link on Current Problems
- TW-11499 - Tests on Current Problems use strange sorting

- TW-11502 - Improve failed tests counts in the email notification
- TW-11503 - Dependency build trigger in template based configuration has run twice
- TW-11508 - XML Parsing Error when viewing RSS feed
- TW-11511 - Display agent image page for missing cloud agent
- TW-11512 - Apply consistent behavior to test name links / failed in popups
- TW-11513 - Brush up title for agent image page
- TW-11515 - Do not display server configuration warnings to non-administrators
- TW-11523 - Add support of NUnit-2.5.3 for documentation
- TW-11528 - Brush up About VS addin dialog
- TW-11545 - amazon ec2 integration doesn't allow architectures other than i386
- TW-11546 - 11-minute delay before a dependent build kicked off
- TW-11549 - Can't use search: the search popup appears and is hidden right away
- TW-11554 - Enabling IDEA code coverage on a maven project fails with missing maven-watcher-agent.jar
- TW-11577 - log4j:WARN No appenders could be found for logger (freemarker.runtime).
- TW-11601 - TFS agent side checkout should NOT re-get all files of workspace
- TW-11603 - Note the default quiet period value in VCS trigger settings
- TW-11604 - Using default quiet period is not displayed as such
- TW-11605 - Exception occurred inside plugin in IDEA 10
- TW-11606 - PluginXmlParser teamcity-plugin.xml parsing errors
- TW-11609 - Incorrect vendor URL in plugin info for bundled plugins
- TW-11621 - Cannot view failed build details in IDEA 7.0.5:
- TW-11624 - Failed to copy resource /feed-item-template.ftl on fresh server start
- TW-11626 - Exception on backup page
- TW-11628 - CloudTypeExtension is not show if opening edit
- TW-11630 - NullPointerException durin TeamCity shutdown under Mac OS
- TW-11632 - Loading add-in problem with Visual Studio 2010
- TW-11637 - Cannot see IDE notifications in idea-8.1.4
- TW-11643 - Can't migrate to internal database unless I put hsqldb.jar in .BuildServer/lib.jdbc
- TW-11644 - Can't migrate from external database with driver jar in WEB-INF/lib
- TW-11646 - "Cannot find build promotion with ID" from BackgroundIndexer on server startup
- TW-11654 - Missing opening bracket in build status for "out of memory" failed builds
- TW-11655 - TeamCity Professional allows maximum of 20 build configurations - broken link
- TW-11659 - Scheduled trigger does not have defaults on the form
- TW-11660 - No next triggering time for scheduled trigger
- TW-11664 - API: Internal error occurs on attempt to invoke backup with no file name set, but it is not reported appropriately
- TW-11669 - Eclipse 3.2.1: Could not open TeamCity Local Changes view if Perforce is not installed

Exception

- TW-9563 - Exception on trying to close Options dialog, when there is no opened solution
- TW-10469 - ArgumentException : An item with the same key has already been added.
- TW-10523 - NullReferenceException : Object reference not set to an instance of an object.
- TW-10592 - InvalidOperationException : The component with interface type `vs__JetBrains.TeamCity.Utils.Persistence.IPersistenceManagerShellComponent`, `JetBrains.TeamC`
- TW-10599 - InvalidOperationException : Collection was modified; enumeration operation may not execute.
- TW-10703 - InvalidOperationException : Enumerable contains more than one matching element
- TW-10789 - ObjectDisposedException : Cannot access a disposed object.
- TW-10790 - ObjectDisposedException : Cannot access a disposed object.
- TW-10793 - "An item with the same key has already been added" exception on collecting changes in Subversion
- TW-10820 - IOException : The process cannot access the file 'C:\Documents and Settings\Kedian\Local Settings\Application Data\JetBrains\TeamCity\vs5.0\vs9.0\Delay
- TW-10830 - ArgumentException : The string must have at least one character.
- TW-10836 - Exception on Settings tab: Property 'displayName' not found on type `jetbrains.buildServer.serverSide.impl.runType.RunTypeWithExtensionsImpl`
- TW-10864 - ItemNotMappedException : There is no working folder mapping for C:\Documents and Settings\dbearden\My Documents\Visual Studio 2005\Projects\Solution2.
- TW-10883 - TeamCityException : An exception has occurred in `JetBrains.TeamCity.RemoteRun.LocalChanges.ToolWindow.LocalChangesToolWindowPane.BeforeSolutionClosed`
- TW-10930 - SvnDelayedCommitExcetion : Failed to prepare delayed commit. The file 'C:\Documents and Settings\Administrator\Local Settings\Application Data\JetBrai
- TW-10934 - Assertion : Cannot find the image named ?RemoteRun.Environment?.
- TW-10943 - MissingManifestResourceException : Could not find any resources appropriate for the specified culture or the neutral culture. Make sure "JetBrains.Te
- TW-10946 - InvalidOperationException : There is no Application Shell running.
- TW-10947 - InvalidOperationException : There is no Application Shell running.
- TW-11018 - InvalidOperationException : There was an error generating the XML document. Could not get the component `DelayedCommitManager`. The component has already
- TW-11185 - Error when clicking on the Agents tab
- TW-11199 - Help file not found at `vs_C:\Program Files\JetBrains\TeamCity Addin\vs5.1\Help\TeamCity Addin for Visual Studio.chm#_`

- [TW-11213](#) - `NullReferenceException` : Object reference not set to an instance of an object.
- [TW-11263](#) - TFS getting sources problem - TF14045 error
- [TW-11330](#) - Object reference not set to an instance of an object.
- [TW-11338](#) - Error running maintainDB: Argument 1 for @NotNull parameter of jetbrains/buildServer/serverSide/db/jdbcLoader/JdbcDrivers.<init>
- [TW-11368](#) - `InvalidOperationException` : Collection was modified; enumeration operation may not execute.
- [TW-11370](#) - `RuntimeException`: All server operations must be run inside TeamCityProcessManager command
- [TW-11401](#) - IDEA plugin exception on close secondary frame
- [TW-11411](#) - Failed to compare two elements in the array. Object must be of type Double.
- [TW-11493](#) - Javascript error: updateBranchName is not defined on saving hg VCS root
- [TW-11524](#) - Cannot start server: Argument 0 for @NotNull parameter of jetbrains/buildServer/serverSide/db/jdbcLoader/JdbcDataSource.<init> must not be null
- [TW-11527](#) - There was an error generating the XML document. Object reference not set to an instance of an object.
- [TW-11530](#) - Value of 'haveRev' property couldn't be parsed. Value: none Input string was not in a correct format.
- [TW-11534](#) - `ObjectDisposedException` : Cannot access a disposed object.
- [TW-11663](#) - There is no Application Shell running.

Performance Problem

- [TW-1466](#) - Opened IE7 windows with TeamCity project page slows down PC significantly
- [TW-6226](#) - Project page leaks memory in Safari 3.1.2
- [TW-8588](#) - Slow transfer rates from the server (sources patch)
- [TW-10168](#) - Do not recalculate commit decision for personal changes after all builds with the change were finished
- [TW-10223](#) - TeamCity Local Changes view update is too slow next to team resources changing if workspace contains lot of files
- [TW-10525](#) - Very slow ClearCase checkout
- [TW-10573](#) - Devenv using 60% of my cpu due to forking svn.exe
- [TW-10648](#) - The integration must not listen resources changes if the "TeamCity Local Changes " view is closed
- [TW-11415](#) - Slow compatible configurations page
- [TW-11469](#) - Better caching when calculating tests first failed in information for running builds

Cosmetics

- [TW-7744](#) - IDEA plugin: Honor line breaks in commit messages
- [TW-10997](#) - Remove comma separator from collapsed project title
- [TW-10999](#) - Responsibilities tab UI improvements
- [TW-11000](#) - "Commented by by" is shown if comment is set for a build
- [TW-11008](#) - MSTest Settings: Checkbox and label should be at the same line
- [TW-11033](#) - Let's use the same collapse / expand icons on My Changes and Overview pages
- [TW-11082](#) - Reuse test name presentation on Tests tab
- [TW-11083](#) - .NET Coverage section has misspelled words
- [TW-11396](#) - National symbols in WinTrayNotifier shown as question marks
- [TW-11506](#) - Warning user that he must update plugin to continue work with TeamCity in Eclipse
- [TW-11586](#) - Diagnostics tab brakes the layout
- [TW-11665](#) - Please remove "Not licensed" text in About dialog
