[Fixed issues in the tracker](#)

## Feature

- [TW-39203](#) - Support displaying custom server message for new TeamCity versions available message

## Usability Problem

- [TW-19273](#) - Allow to restore database when database.properties file is already in config directory
- [TW-44908](#) - No build steps run if VCS rules include -:. (with versioned settings)
- [TW-47152](#) - Add note that VCS trigger inherited from template cannot be modified
- [TW-48015](#) - Few issues with reporting Commit Status Publisher errors to the server log
- [TW-48490](#) - No visual indication for disabled agent requirements in read-only project mode
- [TW-48712](#) - Benchmark tab is visible only to users with System Administrator role

## Bug

- [TW-18244](#) - maintainDB cannot restore to internal HSQLDB database without -T option
- [TW-23059](#) - Restore from backup cannot be done without specifying database.properties
- [TW-44528](#) - Commit status publisher - getting a 400 error invalid url from BitBucket when TeamCity configured server URL is not fully qualified
- [TW-45475](#) - Commit Status Publisher not reporting build status on merge requests on GitLab
- [TW-46152](#) - Diagnostic page is loading too slow when second node doesn't respond
- [TW-46728](#) - Requirements and artifact dependencies inherited from a template and both overridden and disabled in a build type become enabled after being reset to their original value
- [TW-46782](#) - Build uses old settings in 'use settings from VCS' mode when settings root is attached to configuration
- [TW-47174](#) - Expanding list of run configurations in read-only mode shows "Changes not saved" prompt
- [TW-47724](#) - [TeamCity/UpSource integration] Personal builds results are getting propagated to revisions in UpSource.
- [TW-47728](#) - Ruby environment configurator doesn't escape system and environment properties
- [TW-47808](#) - AWS API get flooded after AMI change (pools with max )
- [TW-48049](#) - "Show changes from snapshot dependencies" is ignored in 3 contexts
- [TW-48116](#) - Python version select in python runner is unavailable
- [TW-48170](#) - Branch filter intermittently disappears on a project overview
- [TW-48171](#) - Duplicates runner-related DBDuplicatedRowException in two-node configuration
- [TW-48241](#) - Hide "Download settings in Kotlin format" option for users without "Edit project" permission.
- [TW-48258](#) - If build is interrupted during SVN agent checkout, subsequent build may fail with "Working copy ... locked" error
- [TW-48264](#) - Build status reporting to Gerrit is broken after upgrade from 10.0.3 to 10.0.4
- [TW-48275](#) - Deadlock can occur on attempt to calculate build statistics from several threads (if build statistics calculation takes significant time for some reason)
- [TW-48323](#) - Commit Status Publisher fails to work with GitLab if either a user/group name or a project name contains dots
- [TW-48332](#) - Login action do nothing because of disposed internal components
- [TW-48352](#) - Cannot use "no auth" SMTP access with secure connection
- [TW-48355](#) - Missing test failure details due to IOExceptions during persisting (wrong test run ids case)
- [TW-48410](#) - IDEA plugin: Remote run dialog leaks project
- [TW-48411](#) - Build log size estimate returns wrong value during the build in two nodes setup
- [TW-48446](#) - "Effective quiet period is larger than set by user" health report is shown when no quiet period is used
- [TW-48474](#) - RunAs fails if password has '!'
- [TW-48488](#) - Build Agent trying to delete workspaces for another TFS user
- [TW-48489](#) - Kotlin DSL compilation error when Template has disabled agent requirements
- [TW-48541](#) - ChangePassword command fails
- [TW-48555](#) - TFS agent side checkout fails with: Failed to create workspace: TF14061
- [TW-48569](#) - Old branches are triggered
- [TW-48602](#) - Exception when pressing cancel for Bitbucket access grant dialog

- [TW-48631](#) - Artifact resolving may fail with Read timed out exception when downloading lots of small files
- [TW-48654](#) - User can change own "Hub ID" and get access to another users's data if user/group sync is enabled
- [TW-48676](#) - User with "Project admin" role for all projects in a pool can't assign agents to the pool
- [TW-48677](#) - Diagnostics thread dumps can be saved two times each
- [TW-48681](#) - Agent side checkout can fail in java mode with TFS 2010
- [TW-48716](#) - BuildDuration statistic value is not shown on build parameters tab and in add new chart dialog
- [TW-48725](#) - Build can get no files from the repository in case server-side checkout is used and cached clean patch file is deleted
- [TW-48732](#) - Password scrambling for DSL doesn't work
- [TW-48741](#) - Agent push fails, when TC doesn't catch "STARTING" instance status
- [TW-48745](#) - Build queue merge operation can optimize a build chain even though build queue optimization is disabled for a part of it
- [TW-48773](#) - Unauthorized agents are never cleaned up
- [TW-48775](#) - Several Nodes Setup: StackOverflow error when starting Running Builds node on the Tomcat 8.5
- [TW-48777](#) - UsageStatisticsReporterImpl - Cannot send usage statistics
- [TW-48808](#) - Refresh button in Bitbucket 'pick repository' popup does nothing
- [TW-48853](#) - Cleanup can fail with "Unexpected exception MySQLNonTransientConnectionException: SQL error when doing: Commit"
- [TW-48870](#) - AWS Code Deploy fails to run with NoClassDefFoundError
- [TW-48887](#) - Interactive credential helper is not disabled during submodules update
- [TW-48904](#) - TeamCity can assign build to a stopping instance (terminate after first build)
- [TW-48930](#) - Non-boolean values stored in the database where boolean is expected
- [TW-48942](#) - Pool exhausted error can occur while one thread adds a build problem to a build and several other threads read problems from database
- [TW-48964](#) - ConcurrentModificationException in TestName2IndexImpl.cleanupDuplicateTestNameIds()
- [TW-48975](#) - Reduce the number of calls to AgentRunningBuildEx#isCheckoutDirDirty() from CheckoutDirState

## Exception

- [TW-48262](#) - Upgrade Failed (NPE in DisableEditedInheritedRequirementsConverter)
- [TW-48334](#) - Error message if a "Project Tester" clicks on an project configuration to open build history

## Performance Problem

- [TW-48440](#) - High CPU usage because of several /app/rest/projects calls computing user visible projects
- [TW-48475](#) - Projects-related REST API queries can be slow-ish (many Project.getParent calls)
- [TW-48548](#) - Bad performance while opening popups in build configuration settings with Internet Explorer.
- [TW-48670](#) - High CPU and memory usage on startup when there is many (20k) build configurations
- [TW-48678](#) - Calculate .net tfs libs availability only once
- [TW-48697](#) - Since upgrading to TeamCity 10.0.4, users are reporting sporadic unresponsiveness in the web UI (many update agent set last\_binding\_timestamp = ? where id=? sql queries)
