

PhpStorm EAP 171.4330 Release Notes

PHP Completion	Usability	WI-15929	PHP Code Completion Ignores Code Style when inserting function call
PHP Formatter	Bug	WI-35676	Automatic indentation is wrong for multi line method parameters
PHP Inspections	Bug	WI-35770	Non-strict object equality: comparison of arrays lead to warning
PHP debug	Feature	WI-28722	Step Filter: Implement skipping files when stepping into
	Bug	WI-35805	View value of parent private array/object property in namespaced class shows `can not get property`
PHP lang	Feature	WI-29741	Unwrap: support foreach loop
	Feature	WI-23640	Code Template: PHP Trait Doc Comment
	Bug	WI-33725	Default value: False positive: constant can have a primitive type that differs from the declared one
	Bug	WI-26694	PhpStorm does not support (all) utf8 variable name characters which PHP actually supports
	Bug	WI-35313	Default value: False positive: mixed type is not accepted as a primitive type
PHP project configuration	Usability	WI-35973	"Advanced settings" pane under "PHP Runtime" should be opened if "Default stubs path" is not empty
PHP Parser	Bug	WI-15538	Add to function[code 159] valid identifiers
	Bug	WI-21015	Parser cannot parse (obscure) valid token names
PHP Type Inference	Bug	WI-35937	Type inference doesn't work for short list syntax
Debugger	Bug	IDEA-171252	Debugger doesn't evaluate watches on breakpoint
Diff_Merge	Bug	IDEA-170849	Differences in (decompiled) .class files are not highlighted
Docker	Bug	IDEA-171235	NumberFormatException when running a dockerfile
IDE Configuration	Bug	IDEA-153597	Settings > Appearance > "Override default fonts" should display current font when unchecked
JavaScript	Bug	WEB-25446	Webstorm adds parentheses when requiring functions using destructuring
	Bug	WEB-26328	"Element is not exported" warning for React Native package
	Bug	WEB-25796	Function expressions with binding identifiers in assignment statements contribute to local scope
