

TeamCity 5.1.5 Release Notes

Feature

- [TW-12094](#) - Support maven-failsafe-plugin for Maven coverage
- [TW-12836](#) - Build agent cannot attach RSpec Reporter

Bug

- [TW-13129](#) - Maven project inspection causes thread blocking problem if required to resolve slow SVN externals references
- [TW-13760](#) - Coverage in Maven runner does not work if checkout directory contains spaces
- [TW-11291](#) - Confusing "Unsupported version of Git is detected" message on agent
- [TW-13026](#) - Pre-tested commit into Perforce 2005 failed
- [TW-13277](#) - Commit from VS add-in into Perforce failed, if comment is like 'sms\nsms: sms'
- [TW-12934](#) - Configuration parameter added with system. prefix is visible in UI and in build as system property, but is not accessible via internal API
- [TW-13691](#) - teamcity/postgres error "Unexpected exception occurred during message processing"
- [TW-12200](#) - Not all tests that are run are being reported.
- [TW-13698](#) - Issue Log - 'Show only resolved issues' seems to have the opposite effect (Bugzilla)
- [TW-13639](#) - Compatible Agents number is not updated on changing agent requirements in the template that the build configuration is using
- [TW-13494](#) - Artifact dependencies can occasionally download artifacts from personal builds (changing build number case)
- [TW-12122](#) - Git submodule checkout error: "Commit could not be resolved"
- [TW-13488](#) - Copying a project with templates reuse can result in original project template depending from the copied project
- [TW-13475](#) - Error occurred while starting build: Build promotion ... cannot be associated with build ..., because it is already associated with build: ...
- [TW-13359](#) - TeamCity must correctly parse versioned paths in ClearCase
- [TW-13233](#) - Highlight selected configurations on Agent's Compatible configurations in manual mode
- [TW-13330](#) - git fetch fails with unspecific error
- [TW-13092](#) - Cucumber tests with unimplemented steps are marked as Failed
- [TW-13206](#) - Rake runner plugin doesn't override PATH variable when launching rvm ruby interpreters
- [TW-12042](#) - Recalculate build status (new test count) if this counter differs from data on build results page
- [TW-13254](#) - Wrong issues from Jira are detected by TeamCity
- [TW-12992](#) - Cannot update Eclipse plugin: Cannot complete the install because one or more required items could not be found.
- [TW-13211](#) - Checkout rules editor is confusing when lines are wrapped

Exception

- [TW-13267](#) - Could not query the service provider for the service ID {7F7CD0DB-91EF-49DC-9FA9-02D128515DD4}.
- [TW-13457](#) - There is no Application Shell running.
- [TW-13380](#) - at OptionsPageDescriptor.CreateView : Failed to create an options page from type `вЪњJetBrains.TeamCity.Perforce.UI.PerforceOptionsPage, JetBrains.TeamCi`
- [TW-13379](#) - Solution is not opened.
- [TW-13573](#) - Exception in Model.Update The given key was not present in the dictionary.
- [TW-12852](#) - Rethrown from the UI thread. Object reference not set to an instance of an object.
- [TW-13499](#) - Enumerable contains no matching element
- [TW-13073](#) - IDEA exception: getLastFinished: java.io.IOException: Server returned status 503 (service unavailable), try later

Cosmetics

- [TW-12477](#) - Fix spelling in MSTest settings
