

TeamCity 2018.1.1 (build 58406) Release Notes

See also [TeamCity 2018.1 Release Notes](#)

Feature

- [TW-49655](#) - Can not create New VCS Root from URL with uploaded SSH key (Git)
- [TW-55061](#) - Make TeamCity docker images multiplatform
- [TW-55697](#) - Provide docker images for Windows 1803
- [TW-55698](#) - Report more specific distribution type for docker images
- [TW-55751](#) - Meta-runners with clickable link in description not possible
- [TW-55831](#) - dotnet shared compilation services (remaining in memory) prevents cleaning of checkout directory

Usability Problem

- [TW-30438](#) - JDBC drivers: include into dist package or download
- [TW-37386](#) - Display redefined resources from parent projects in Shared Resources tab.
- [TW-39183](#) - Add link to create new VCS root from the versioned settings tab
- [TW-47876](#) - Sort resources by name by default
- [TW-54261](#) - "Build queue was paused" warning is updated with a delay
- [TW-55424](#) - Unclear "contains duplicate resource definition" health report
- [TW-55604](#) - Confusing "Show instructions for manual JDBC driver installation" link when JDBC driver is already loaded.
- [TW-55719](#) - Add an ability to collapse instruction for manual JDBC driver installation
- [TW-55805](#) - NuGet package indexing: write readable Project ID in teamcity-nuget.log
- [TW-55819](#) - Add 'Start' button to cloud agent type overview page
- [TW-55821](#) - New Artifacts Icon keeps appearing

Bug

- [TW-40816](#) - Too many open files / Agent process keeps handles to maven artifacts
- [TW-54336](#) - Build canceled due to "Unexpected finish" is not re-added to queue when it is part of a composite build
- [TW-54429](#) - Custom Maven path not displayed correctly in UI if defined through parameter in Maven step
- [TW-54918](#) - Read-Only node should not try to recover build logs
- [TW-55028](#) - Read-only mode. Diff view should work correctly.
- [TW-55038](#) - Read-only mode: do not show "You do not have enough permissions" message for each agent pool
- [TW-55158](#) - Maven project information fails if <prerequisites> is defined in pom.xml
- [TW-55169](#) - Amazon ECR connection: align fields
- [TW-55359](#) - Handle project level agent details permission in react based agent/builds lists
- [TW-55508](#) - Incomplete information in agent status popup if agent was enabled by the server itself
- [TW-55559](#) - Build type is missing on read-only node while it exists on the main server
- [TW-55628](#) - React UI sends REST requests to the server even when the user is logged out
- [TW-55631](#) - JS error on test details info page
- [TW-55654](#) - Wrong time is displayed on a build line (shifted by an hour)
- [TW-55660](#) - Build tags enclosed in <> are not visible on build results page
- [TW-55661](#) - Warning outside of investigate/mute dialog
- [TW-55671](#) - Build configuration status on build type overview page should take into account the branch selected on the page
- [TW-55677](#) - Amazon ECR connections doesn't support registries in other amazon accounts when cross-account delegation is enabled
- [TW-55681](#) - .NET CLI: Fails to detect configuration on Linux if HOME environment variable is not defined
- [TW-55682](#) - ECR Connection setup form requires Access key ID when using default credential provider chain
- [TW-55686](#) - Read-Only: exception when build type external id is changed
- [TW-55694](#) - Swabra fails to save directory state to snapshot file
- [TW-55703](#) - Only the first published NuGet package is visible in NuGet feed
- [TW-55706](#) - Kotlin DSL for Free Disk Space build feature should not require requiredSpace property
- [TW-55707](#) - Kotlin DSL: DSL Generation fails if build names start with numbers
- [TW-55709](#) - Reference to External id is not replaced in the multi-line fields
- [TW-55712](#) - Cloud build agents - AWS GovCloud/China (Beijing) "Specifying tags during instance launch is not supported in this region"
- [TW-55714](#) - Incorrect option <All branches> is shown in branches selector on build configuration branches page
- [TW-55715](#) - JS error on attempt to save build counter in case when build type is read only
- [TW-55716](#) - Docker step: saved settings aren't cleaned when I change docker command
- [TW-55723](#) - Downloading artifact dependencies fails after upgrade to 2018.1
- [TW-55727](#) - Additional arguments for the Docker build are removed on save
- [TW-55733](#) - Custom build step order does not work for build steps from default template
- [TW-55736](#) - InstantiationException: bean image not found within scope on agentDetails.html
- [TW-55737](#) - NPE in ServerStatisticsDataHolder.getLast

- [TW-55757](#) - ReSharper Inspections: unable to pass --caches-home command line argument
- [TW-55759](#) - Exception in viewDockerCommand.jsp: Illegal child tag in "c:choose" tag
- [TW-55763](#) - Versioned Settings fails to commit when format Kotlin
- [TW-55764](#) - Hide uncompressed transfer option as it is no longer supported
- [TW-55814](#) - Unrecognized SSL message, plaintext connection error in case when agent uses https to communicate with server and there are http proxy parameters specified
- [TW-55817](#) - Formatted Plugin details no longer formatted in Admin plugins page.
- [TW-55829](#) - Warning for enabled user registration does not disappear
- [TW-55832](#) - Quick link to configure project's roles from the project settings is missing
- [TW-55833](#) - NuGet feed contains packages from archives
- [TW-55838](#) - vmware plugin should poweroff instance if it doesn't stop gracefully in time
- [TW-55844](#) - Project settings import fails when settings in VCS don't contain some sub-project
- [TW-55849](#) - Add validation for "Shared Resources" name
- [TW-55857](#) - Remember me cookie does not work on R/O server
- [TW-55858](#) - Queued build with requirements having parameter references in them may not start
- [TW-55876](#) - Visual Studio / MSBuild Tools 2017 is not detected when cache packages located on non C drive
- [TW-55897](#) - Cannot use build number/format with colon character in docker runner
- [TW-55920](#) - Eclipse Plugin Error with Eclipse Photon (4.8)
- [TW-55922](#) - UnsupportedOperationException during PowerShell selection
- [TW-55927](#) - Integer overflow in teamcity-maintenance.log
- [TW-55937](#) - VCS Trigger triggers on branch changes without specifying branch filter.
- [TW-55947](#) - The dotnet CLI plugin does not take in account global.json files during the definition of the .net SDK version
- [TW-55957](#) - java.lang.AssertionError; while processing request: GET '/viewModification.html?modId=-1&personal=false'
- [TW-55974](#) - No locks can be displayed for a shared resource from enforced settings template
- [TW-55977](#) - Build step autodetection detects step "Custom script: call gradlew.bat" in Gradle projects
- [TW-55999](#) - After upgrade to 2018.1, build can use much older revision than the one expected when Git and checkout rules are used
- [TW-56011](#) - REST API does not handle per project view agent details permission correctly
- [TW-56019](#) - AJAX request can cause browser basic auth password prompt when authentication is handled by REST
- [TW-56022](#) - Invalid Kotlin patch committed by server in case when template has not empty description
- [TW-56032](#) - All licenses are removed when Remove Selected option is used with "Incompatible with TeamCity 2018.x" filter applied.
- [TW-56033](#) - Fix connector name for manual on "Database connection setup" page.
- [TW-56042](#) - Update copyright for maintenance tool
- [TW-56051](#) - Read-Only: don't show group checkboxes for tests on the Change Details page
- [TW-56061](#) - Projects stopped compiling Scala after upgrade to 2018.1 (build 58245) using IntelliJ IDEA project runner
- [TW-56077](#) - CloudFormation Stack Deployment Fails due to reference to invalid AMI
- [TW-56106](#) - AccessDeniedException while opening Agents Parameters Report page if per-project agents filtering is enabled

Exception

- [TW-55535](#) - Exception in teamcity-server.log on trying to download JDBC driver in case of network problem.
- [TW-55962](#) - Error while opening agent pools page if per-project agents filtering is enabled
- [TW-55963](#) - AccessDeniedException while opening agent pools page if per-project agents filtering is enabled

Performance Problem

- [TW-55433](#) - UI freezes on Firefox
- [TW-55676](#) - PushedImagesRegistryCleaner can work for hours trying to find build artifacts directory
- [TW-55713](#) - Overview / project page with lots of builds is slow until react UI rendering is disabled

Security Problem

- [TW-55704](#) - A change in the settings can corrupt unrelated projects' specific settings
- [TW-55992](#) - CSRF-like attack is possible
- [TW-56025](#) - User without "View agent details" permission can view agent details

Cosmetics

- [TW-42480](#) - Wrong .properties files syntax highlighting on Diagnostics UI
- [TW-54525](#) - Obsolete horizontal scroll can appear in custom run build dialog on Parameters tab
- [TW-55568](#) - Vague +/- icons in build log (retina screen)
- [TW-55638](#) - "All history" link isn't highlighted anyhow on mouse hover
- [TW-55675](#) - Improve instance types sorting in UI
