

PyCharm Edu Early Access Program

 EAP is closed now. Please try [PyCharm Edu 2017.3 RC](#) or download [PyCharm Edu 4](#).

Welcome to the PyCharm Edu Early Access Program!

Improving PyCharm Edu for you and your students!

We at JetBrains are committed to making PyCharm Edu even more suitable for teaching Python and programming. We're looking into ways to improve and simplify existing PyCharm Edu functionality and implement additional educational features, to make the IDE friendlier and easier to use in educational environments, including classroom use, MOOCs and tutorials to assist both trainers and students.

We need your input!

Being at the final development stage of this new version, we're gathering feedback. And we do need your expertise and input to focus on the right improvement areas and additional functionality to be implemented. Please file any problems you may find to <https://youtrack.jetbrains.com/issues/EDU>

If you have any additional questions, feedback or comments, please feel free to send it to us.

E-mail: pycharm-support@jetbrains.com

Thank you!
