Kanpur is a codename for TeamCity 2019.x

Current build: TeamCity 2019.2 EAP1 build 70479 released on August 20, 2019

[Download](#) | [Changes](#)

This version of TeamCity contains new features, improvements, and multiple bug fixes comparing to TeamCity 2019.1

Please make sure you back up your data (in the existing server from the administration UI or manually) before the upgrade!
It is recommended that you install the EAP version as a trial server.
Newer TeamCity versions usually adjust the data structure and you will not be able to roll back to older TeamCity versions once the data is upgraded.
