

# Selena EAP

## What is Selena?

"Selena" is the codename for IntelliJ IDEA 7.0.

## Download

IntelliJ IDEA 7.0.5 (build 7971) has been released. Download links can be found at: <http://jetbrains.net/devnet/docs/DOC-1113>

No new Selena EAP builds are planned.

## Release Notes

Build 7971:

- Bundled JDK 1.6.0\_10 in Windows installer
- Fixes for compatibility with JUnit versions before 4.5
- Minor fixes

Build 7962:

- Reverted the behaviour of "Stop" action in the debugger to that of version 7.0.3
- Improved performance of evaluating expressions in the debugger
- Fixed performance issue in JavaScript indexes
- Several Maven fixes backported
- Fixed performance issue with updating Subversion repository changes

## License

You can use any commercial or evaluation license for IntelliJ IDEA 7.0 with this build. If you already have an evaluation license for IntelliJ IDEA 7.0, this build does not restart the 30 day evaluation period.
