

TeamCity 6.5 Release Notes

Feature

- TW-994 - Display .NET Code Coverage results gathered by TeamCity in VisualStudio
- TW-1009 - Take responsibility from the overview page
- TW-2870 - Projects page: write "Fixed by you" instead of "Fixed by <my name>"
- TW-3789 - Filter Duplicates/Inspections choosers by current project VCS roots
- TW-4612 - Project-level properties
- TW-4956 - Ability to collapse tests by groups in the failed tests list
- TW-5428 - Support variables in VCS roots, dynamic VCS roots
- TW-5468 - Allow to artifact-depend on last build with a given tag
- TW-5701 - List of parameters that are passed to a build
- TW-6331 - Add menu item TeamCity -> Code Coverage to plugin menu
- TW-6637 - Generate AssemblyInfo.cs file with AssemblyVersion attribute
- TW-6709 - Watch and apply changing agent part of a .zip plugin deployed under .BuildServer/plugins
- TW-7112 - Update agent if its distribution is updated on server
- TW-7136 - Option to check that files under Subversion are not outdated before remote run submit
- TW-8326 - Automatically create personal builds for commits into branches
- TW-9310 - Powershell runner
- TW-9367 - Support properties references in SVN labeling comment
- TW-9804 - Log for build configuration settings editing
- TW-9808 - Git checkout by tag
- TW-9925 - Allow to set agent free disk space to clean for a build in UI
- TW-11012 - .NET thread dumps should support .NET 4.0 processes
- TW-11072 - Support build-specific parameters (provided via custom build run dialog) in checkout rules
- TW-11118 - Display configuration parameters on the build's Parameters tab
- TW-11308 - Allow to run personal build on subversion branch by specifying branch name in parameters
- TW-11410 - Unable to access git repository protected by HTTP Basic Auth
- TW-11514 - Allow to group current problems by build configurations
- TW-11618 - Allow swabra to log modified files information into the build log
- TW-11977 - Support property references in SVN labeling rules
- TW-12117 - Support Amazon VPC instances
- TW-12260 - Detect Windows SDK for Windows 7 and .NET Framework 4 on agent
- TW-12569 - Support Amazon Virtual Private Cloud for EC2 agents
- TW-12823 - Ability to define Svn labeling rules in Build Configuration rather than in the VCS root
- TW-13283 - MyChanges: don't paint red my build if all failed tests are under responsibility of other people
- TW-13295 - Date chooser visual design proposal
- TW-13296 - Rename "responsibility" into "under investigation"
- TW-13370 - Add ability to copy build steps
- TW-13557 - Allow to specify workspace name pattern for client-side Perforce checkout
- TW-13559 - Display TeamCity user (if available) on Change details page
- TW-13563 - Provide an option to globally configure artifact cleanup for dependent builds
- TW-13656 - Delay maven build starting when it is triggered by a change in snapshot artifact change and the build that deployed the artifact is still running
- TW-13733 - VS plugin: add "Open Folder in Windows Explorer" command
- TW-13770 - Add information about Java used by the TeamCity Agents in usage statistics
- TW-13863 - Clearcase agent side checkout makes too much assumption about structure
- TW-13946 - Display full problems list for a change on test tab instead of just failed tests
- TW-14240 - Provide DotNetFrameworkSDK properties for 3.5 and 4.0 frameworks
- TW-14246 - Make XML report exclude patters like checkout rules
- TW-14287 - TFS: treat VCS paths as case insensitive
- TW-14322 - Allow to dump own agent process thread dump from web UI
- TW-14377 - Make XML test reporter options available as a build Feature
- TW-14453 - Do not update artifact file timestamp if the file is equal by content to one downloaded via artifact dependency
- TW-14550 - Rework property chooser to work as completion
- TW-14633 - Merge when applying shelved changes
- TW-14679 - Add ability to name build steps
- TW-14715 - Support NUnit 2.5.9
- TW-14756 - MSTest runner should support wildcards
- TW-14788 - Add functionality which allows collect changes for Remote Run as soon as possible
- TW-14864 - Support for MSpec
- TW-14886 - Ability to browse hidden artifacts files from UI
- TW-14902 - Report build start date in REST API calls for build lists
- TW-14920 - Ensure NAnt 0.91 Alpha 2 Release supported
- TW-15000 - Add Git support to Create Maven Build Configuration page
- TW-15160 - Optionally allow to specify path to gradlew script
- TW-15217 - Expose related P4 environment variables when using Perforce checkout on agent

- TW-15301 - Allow to customize branch patterns for remote run on branch
- TW-15336 - Add personal build icon to personal build notification in IntelliJ IDEA plugin
- TW-15347 - Do not publish artifacts of the user-canceled build
- TW-15353 - Remove (or add an option to bypass) repository mirroring in Maven artifact trigger
- TW-15381 - Add property with path to bundled dotCover
- TW-15474 - Add "send usage statistics anonymously" checkbox on the license agreement page which is shown when the server starts for the first time
- TW-15499 - Update of build number from the step should make new build number available for succeeded steps
- TW-15503 - Add service messages to change build properties and environment variables for next running build steps
- TW-15549 - User JDBC driver: allow a user to use their custom JDBC driver
- TW-15571 - Collect changes for branch remote-run when build is added to the queue
- TW-15651 - Support Amazon EC2 Japan region
- TW-15652 - Provide a link on build configuration administration settings to audit for the build configuration settings changes
- TW-15670 - New IDEA project runner does not support test reordering
- TW-15691 - Support filtering builds by date range in REST API
- TW-15711 - Provide build statistics values via REST
- TW-15712 - Teamcity report "ClientApplication" name to Starteam
- TW-15753 - Turn echo off by default for command line custom script
- TW-15758 - Ability to add extra build steps within a set of inherited build steps
- TW-15864 - Allow to hide build configurations on the Overview page just like we hide projects
- TW-15888 - Make sure IDEA requests focus on successful open in IDE operation
- TW-16154 - Note parameters that were changed during the build
- TW-16163 - Allow to use build-provided parameters in VCS label name
- TW-16197 - Adjust issue tracker projects field to hold many projects
- TW-16399 - Allow to specify agent installation target path on agent push
- TW-16433 - Bundle PowerShell runner
- TW-16483 - Add description text to Agent Push tab with the feature description

Usability Problem

- TW-908 - Windows Tray notifier doesn't support proxy configuration
- TW-2674 - Display helper text when there are no Projects/Changes visible
- TW-3314 - Opening an URL requiring login fails if first login attempt was unsuccessful
- TW-3814 - On failed login attempt from IDE, does not close login dialog
- TW-5371 - possibility to show together progress message and test statistics in build status bar
- TW-5403 - Do not show errors if connection drops with no user interaction
- TW-5497 - On server cleanup, issue user-friendly message in the plugin
- TW-7627 - IDEA plugin: TC-login modal window could use better title
- TW-8561 - Separate "same snapshot" artifact dependency choice
- TW-8983 - Use human-friendly timestamps (2 minutes ago) on Overview
- TW-10065 - Always show my changes in popup, even when there are lots of others' changes and 'Show all>>>' is shown at the end of the list.
- TW-10243 - Map F1 button for TeamCuty tool window
- TW-10244 - Map F1 button of the Remote Run dialog box
- TW-11575 - Bold text is not good for marking new tests in TC plugin for IntelliJ IDEA
- TW-11750 - Make "Path to Subversion" option more clear
- TW-12195 - IDEA plugin toolwindow is not DumbAware
- TW-13517 - Turn off options "Show in editor" for duplicates and inspections runners if corresponding configurations disappeared
- TW-13657 - When no serverUrl is set in buildAgent.properties file agent tries to connect to localhost:8080
- TW-14039 - Confusing "couldn't find any matching files" in the build log from XML report parser
- TW-14179 - Display build problems using standard build presentation on My Changes
- TW-14255 - Add build step description text into steps reordering dialog
- TW-14259 - No details in "is not a path to ClearCase view" validation error message
- TW-14549 - When I delete an archived project, I get back to a list of active projects, not archived projects
- TW-14612 - Personal build commit fail error dialog is unreadable
- TW-14634 - Unshelving changes overwrites files without warning
- TW-14651 - Make "Unable to find Gradle's home" error more user-friendly
- TW-14654 - Swabra should display note in settings when it requires handle.exe, but it is not installed
- TW-14655 - Improve "Handle path not defined" message in the build log
- TW-14665 - Swabra paths text area should be automatically opened if it has content
- TW-14666 - Swabra paths to monitor always work as if "+.:" is present in the rules
- TW-14729 - Make NUnit runner error message clearer in case no matching assemblies found.
- TW-14827 - Turn "filter by solution" local changes filter off by default
- TW-14882 - dotCover warning message misleading
- TW-15436 - It is hard to get the total number of detected changes from Local Change tool window
- TW-15628 - Let's use italic in the history for failed to start builds
- TW-15698 - Build log for MSBuild build is substantially larger in TeamCity 6.0 comparing to 5.x
- TW-15793 - Improve TFS VCS root creation form providing guidance for Url and Root fields
- TW-15811 - Make filtering by not related to current project more obvious

- TW-15821 - My Changes shows too much (all changed files) if I expand the change
- TW-15833 - Administration->Server Configuration->Cloud tab should be renamed to 'Agent Cloud'
- TW-15851 - TeamCity Integration plugin for Idea - need "responsibility is taken" icon
- TW-15871 - Unable to run Maven goals without a pom.xml file
- TW-15977 - Display "<empty>" for empty property values in property tables
- TW-15978 - Brush up parameters presentation on build's Parameters tab
- TW-16009 - Improve "Current problems" page contents when there's no content
- TW-16057 - When displaying properties inherited from project, make sure it's clear where from they originate
- TW-16060 - Do not display tooltip over checkbox in Remote Run dialog
- TW-16072 - Improve agent thread dump taken message
- TW-16125 - Preserve build parameters when a build configuration is associated with a template
- TW-16167 - Redundancy in notifications about the same personal build
- TW-16275 - Log artifact download start instead of finish in the build log
- TW-16279 - Add success finish message on server artifact dependencies check
- TW-16380 - Coverage not found dialog 'Turn off ... ' link should open all projects list
- TW-16398 - State the agent push final status in the finish message
- TW-16637 - Make build configurations more visible on Current Problems page
- TW-16768 - Agent Push should show current server URL in the dialog

Bug

- TW-1590 - TeamCity suggests to take responsibilities for configurations I'm already responsible for
- TW-2655 - Empty projects page if there is project without build configurations.
- TW-4583 - Wrong server causes uncancelable logging in process and polling every second
- TW-4734 - Windows tray notifier does not acknowledge builds taken responsibility for
- TW-5300 - Use log4j configuration for VCS debug logging
- TW-5325 - Do not show assemblies with no tests as individual tests
- TW-5370 - Any Test Message overrides progress message
- TW-5411 - Redirect to original page after login does not work if several tabs are open in the browser
- TW-6294 - Take responsibility comment is not escaped
- TW-6297 - FxCop: show results tab if no inspections reported
- TW-7025 - Prevent internal-error-canceled builds from taking the agent in endless loop
- TW-7083 - Agent can hang on server connection lost during artifacts downloading
- TW-7422 - Multiline settings are incorrectly displayed on Settings tab
- TW-7748 - Optimize IDE communication protocol
- TW-7768 - Artifacts with no extension are not properly displayed in IE
- TW-7988 - Allow to add myself to a group, provided this does not add more permissions then I already have
- TW-8075 - Unable to download artifacts using artifact dependencies if source build has # in the build number
- TW-9582 - Make Remote Run action available while IDEA indexes are not yet ready (dumb-aware)
- TW-9771 - Windows Tray Notifier may show 2 icons: one logged in, second not logged in
- TW-9821 - Internet Explorer download error using SSL
- TW-10172 - Mercurial plugin saves concrete value in "Clone repository to" field that is left blank
- TW-10198 - Mark new failed tests in "Failed tests from dependent builds" build results section
- TW-10608 - Cannot Send Email with TLS/SSL via Microsoft Exchange
- TW-10712 - Windows 7 does not keep the Notification Area settings of the tray notifier
- TW-10744 - Wildcards in artifact paths match files in case sensitive manner under Windows
- TW-10797 - Nant NUnit2 task may not break the build as set by the attributes
- TW-10798 - Windows tray notifier should support IPv6 only connections
- TW-10898 - Build is hanging forever resolving artifacts
- TW-11092 - Can't get artifact dependencies from projects with ":" in the build number
- TW-11363 - JetRegistry.exe is leaked in temp folder of build agent
- TW-11386 - Display descriptive warning on no configurations for remote run
- TW-11612 - References to environment properties are case-sensitive for Windows agents
- TW-11614 - Empty "WARN-teamcity.out" log lines on command line runner execution
- TW-11715 - Inappropriate mouse pointer over comment icon in build queue
- TW-11726 - Changes of removed projects can be seen on My Changes
- TW-11751 - Changing configuration XMLs directly may not update compatible agents for a queued build
- TW-11773 - No audit entries on copying a template
- TW-11834 - Add more diagnostics for System.IO.FileNotFoundException: Could not load file or assembly in NUnit runner
- TW-11863 - Build number is not resolved is the build is not run due to snapshot dependencies failure
- TW-11921 - TeamCity incorrectly shows test namespaces as ignored tests when "Run recently failed tests first" is checked
- TW-12000 - Remote run for git from IDEA can send content of the files from not selected changelist to the server
- TW-12178 - When restoring configuration only, do not restore database.properties file
- TW-12243 - Fail build on error during artifacts publishing (size limit exceeded and other errors from server)
- TW-12270 - Tray notifier is not able to connect to server by https with custom certificate
- TW-12277 - Collapsed projects on Overview are looking bad
- TW-12309 - Support for Git in command line remote run tool
- TW-12311 - VS add-in failed to logout from TeamCity server, if server is not accessible.
- TW-12457 - Abstract NUnit test fixtures shouldn't be reported as ignored tests
- TW-12458 - Assemblies that don't contain any tests shouldn't be reported as ignored tests

- TW-12798 - Build hangs when running tests on Win 2003
- TW-12960 - On skipping build runners/steps because of a step failure, print info on the skipped steps into the build log
- TW-12975 - "Check artifact dependencies" uses cached files list from source build
- TW-13035 - Duplicates finder .net and national chars in files and path
- TW-13081 - Allow to use last available build in artifact chooser if cannot resolve build number used in artifact dependencies
- TW-13114 - Recover after corrupted trigger pluginData files (Malformed \uxxxx encoding)
- TW-13236 - Windows tray notifier does not display responsibility comment in the popup over "responsibility taken" icon
- TW-13307 - Ensure "Amazon EC2 Micro Instances" supported
- TW-13324 - Limit the number of IDEA notifications displayed to prevent too many notifications.
- TW-13334 - Review and describe the type of properties on Risk Tests Reordering in Custom Test Runner doc page
- TW-13391 - TeamCity package load failure after uninstalling VS add-in from VS 2008
- TW-13426 - VS add-in patch failed to apply 'rename' + 'add' TFS changes
- TW-13500 - Directory delete error should not add stacktrace into the build log
- TW-13562 - Projects popup can truncate names of the projects and build configurations
- TW-13601 - Failed to update agent type description: DBDuplicatedRowException: SQL error:SQL query: insert into agent_type_param, SQL exception: Duplicate entry
- TW-13661 - External status page shows status of archived projects
- TW-13798 - TFS patch broken when renaming folders under VCS
- TW-13803 - Exception in IntelliJ IDEA plugin
- TW-13873 - Different spellings of cancelled/canceled on the same screen.
- TW-14020 - Suspicious MSI filename in VS add-in installer
- TW-14022 - Edit Report Tab Settings dialog is not saved on Ctrl+Enter
- TW-14057 - Brush up "Agent with name ..." is already registered on server. " message in agent log
- TW-14066 - NUnit on Linux using Mono fails (mono is not used to launch executable)
- TW-14080 - MSBuild 'Message' task should be reported as single line in build log
- TW-14140 - No way to copy part of the log line into clipboard from tree log view
- TW-14159 - OutOfMemoryException when triggering personal build with large files
- TW-14242 - Agents fails with internal error if serverUrl is empty
- TW-14267 - Open in IDE does not work for IDEA when sources are checked out into subdirectory on agent
- TW-14282 - Display server release date on Server's Licenses page
- TW-14285 - "Issue not found" for Jira connection: Argument 2 for @NotNull parameter of JetBrains/buildServer/issueTracker/IssueData.<init> must not be null
- TW-14288 - Remove .NET Runtime settings from .net code coverage options
- TW-14297 - No non-debug server logging on agent registration errors
- TW-14372 - Extra newline before build error message on failed to start build errors
- TW-14387 - No build status in email notification for failed Inspections build
- TW-14456 - Aptana IDE: TeamCity Coverage Explorer view broken. See screenshot
- TW-14462 - TeamCity distribution as a .war doesn't work in jetty (v7.2.0)
- TW-14480 - "XML Report Processing" section appears earlier then ".NET Coverage" on NAnt runner settings
- TW-14512 - Open test in IDE doesn't scroll to the test in the list
- TW-14516 - Open in IDE for change file doesn't work in Idea (no VCS roots configured case)
- TW-14542 - Agent can register without some plugins and be considered up-to-date (kill agent while unpacking plugins case)
- TW-14552 - Ctrl+Enter does not work in UFD control in Run custom build dialog
- TW-14556 - Provide build step parameters description for Duplicates Finder runner
- TW-14559 - Documentation about inspection profile information in pom.xml
- TW-14569 - Brush up etFrameworkPropertiesExtension agent logging (found .Net frameworks)
- TW-14574 - No details available on XML report parser errors
- TW-14591 - TeamCity Failed Tests viewer is not updated after responsibility assignment
- TW-14601 - Add validator for dotCover filter form
- TW-14603 - NUnit assembly load errors are too verbose in the build log
- TW-14631 - Eclipse Coverage "Select TC Build Configuration" form fails to update build numbers
- TW-14641 - Too verbose logging by issue tracker integration: "Retrieving related issues for"
- TW-14642 - Unnecessary database queries logging in server debug
- TW-14656 - Swabra does not determine locking processes when cleaning at the build start
- TW-14660 - Place handle-provider agent plugin into .BuildServer
- TW-14662 - Brush up build log lines on killing processes that are locking a file
- TW-14664 - Swabra settings description on Settings Build Configuration tab should full describe the configuraiton
- TW-14668 - Dot rules (-:.) do not work in Swabra path to monitor patterns
- TW-14675 - Describe migration from Ipr runner to IntelliJ IDEA project runner
- TW-14682 - Too much "free disk space"-related logging in agent log
- TW-14690 - VS addin: local changes - the "Expand all" button doesn't work
- TW-14693 - VS addin: Local Changes view doesn't autorefresh after successfull auto-commit
- TW-14711 - System problems should not allow build to finish successfully
- TW-14712 - NUnit runner should fail if there were any configuration problems
- TW-14714 - Number of project to create should be written even for maven project create action
- TW-14717 - MSTest Runner does not fail if assembly not found
- TW-14735 - NUnit runner reports test fixture as Ignored, if it contains only ignored test methods.
- TW-14758 - NCover3 reporter args are not possible to set from service messages.
- TW-14760 - Failed to view problematic tests from single build configuration in Google Chrome
- TW-14765 - VS add-in hangs while collecting Perforce changes and crash with OutOfMemory exception after that.

- TW-14774 - Git-provided libraries are added to agent classpath, while not necessary
- TW-14776 - Progress window doesn't hide after delayed commit finished sometimes.
- TW-14784 - "Apply patch" window opens on a second monitor hidden by browser
- TW-14791 - Wrong "Cannot find p4 executable in PATH" message on agent Perforce checkout
- TW-14794 - Failed agent-side checkout error can be reported as "Failure" and partially not as "Failed to start" error
- TW-14801 - Build fails with "NoSuchMethodError: org.junit.runner.Description.getClassName" when running JUnit run configuration
- TW-14802 - Wrong help link for "Path to the project" IDEA runner setting
- TW-14804 - TFS Checkout on agent not working correctly ("The working folder is already in use" case)
- TW-14813 - Excessive logging on git connection errors
- TW-14814 - Multiple WARNs in server logs: "Registration of agent: ... failed. Agent with the same name ... is already registered since ..." after server restart
- TW-14815 - NPE on attempt to modify priority of the priority class
- TW-14816 - Error when trying to change the priority number for Personal build priority class
- TW-14817 - TeamCity IDE plugins cannot connect with: RemoteStateManager.getGZippedSummary, error: java.lang.NullPointerException
- TW-14818 - Do not remove IDEA coverage results files if they created after the build start
- TW-14825 - powershell-runner failed to start powershell in to specified bitness (x86, x64)
- TW-14826 - Make P4 agent checkout client-related error messages more user-friendly
- TW-14853 - NPE with jetty 7 when accessing /admin/editVcsRoot.html resource
- TW-14855 - NPE in web on starting unpacked war under jetty 7
- TW-14856 - TFS checkout on agent fails with "... cannot be cloaked because it does not have a mapped parent" (extra minus checkout rule case)
- TW-14866 - NUnit runner should fail (with no further steps processing) on inability to initialize
- TW-14869 - Clean-up doesn't protect snapshot dependency
- TW-14873 - Build may be marked as "Failed to start" on corresponding failure in its non-first step
- TW-14885 - Do not download hidden artifacts via artifact dependencies by default
- TW-14892 - dotCover coverage in MSTest runner with conditional compilation symbols produces no coverage
- TW-14896 - Report a readable error message when trying to run Maven with Java older than 1.5
- TW-14901 - IPR builds fail on teamcity 6
- TW-14906 - "Too many important messages" message can appear no last on the important messages tab
- TW-14927 - Deleting agent temp directory while agent is running can cause IOException: The system cannot find the path specified
- TW-14928 - No link to build from "failed to start" popup (non-admin user case)
- TW-14933 - xml-report-plugin fails with ClassNotFoundException: com.sun.org.apache.xerces.internal.parsers.SAXParser (IBM JDK case)
- TW-14935 - Several warn messages about incorrect responsibility entry in the server log
- TW-14939 - Files become modified without checkout after the pre-tested commit in Perforce
- TW-14940 - IDEA project runner tries to remove checkout directory if artifact output path is set to project dir
- TW-14943 - Allow to change agent compatible build configuration before agent authorization
- TW-14949 - setupAdmin.html page does not accept login name longer than 50 characters
- TW-14958 - Retry build trigger does not consider "Failed to start" build as failed
- TW-14959 - dotCover should produce descriptive warnings on no code coverage collected
- TW-14969 - Saving a priority class pops up an error message
- TW-14971 - Builds with IDEA code coverage enabled fail after upgrading to TeamCity 6
- TW-14973 - Patch is broken error after upgrading from 5.1.4 to 6.0
- TW-14989 - YouTrack integration: project name and commit summary are not HTML-escaped
- TW-14999 - java.io.IOException: cleartool: Error: Bad command line: unterminated quoted string.
- TW-15005 - Can't run JUnit run-configuration - ClassNotFoundException
- TW-15008 - Mercurial plugin does not detect changes in merge commits
- TW-15013 - IDEA project runner fails to build project in case of Subversion agent side checkout
- TW-15016 - Current problems may contain incorrect information for a failed test
- TW-15026 - TFS server plugin leaks TC-TFS* folders under server's TEMP
- TW-15033 - IntelliJ IDEA Project build runner creates .JAR files with duplicated .class when final .EAR contains cyclic dependencies
- TW-15052 - TeamCity not retrieving all changes from TFS
- TW-15059 - Out of memory in JavaC in Team City version 6
- TW-15065 - Nant build runner target framework selection doesn't work
- TW-15100 - Build feature parameters are not validated
- TW-15103 - org.codehaus.plexus.component.repository.exception.ComponentLookupException at end of Maven project run
- TW-15111 - Replace Ivy-based artifact dependency resolver
- TW-15129 - Exception on deleting a build from the build queue
- TW-15130 - Incorrect unresolved Project Modules and Path Variables (path variable-like expression is found in a field not supporting path references)
- TW-15135 - Inconsistent build trigger description for personal builds
- TW-15136 - dotCover occasionally fails without an obvious cause
- TW-15139 - Error while trying to add artifact dependency
- TW-15141 - Strange message when submitting pre-tested commit
- TW-15146 - PowerShell runner: "no other arguments to -Command are permitted" error
- TW-15155 - Windows tray notifier does not upgrade
- TW-15167 - Using the same target archive file name when publishing artifacts produces wrong archive content

- TW-15168 - Build History Clean-up doesn't complete and TeamCity sometimes hangs
- TW-15170 - Incorrect selection in agent requirement Edit dialog
- TW-15175 - EA-24978 - assert: Alarm._addRequest
- TW-15177 - Build can start with partly deleted files (failed clean checkout force because of file locking)
- TW-15203 - Some web GUI elements are invisible
- TW-15205 - IDEA coverage does not generate coverage report if there is one more step in the build
- TW-15210 - MSTest parse error (null appearing as test name in the log)
- TW-15221 - Eclipse plugin doesn't set properties
- TW-15235 - TeamCity menu can open with missing items
- TW-15236 - Open in IDE for IDEA when not logged into TeamCity produces no messages
- TW-15238 - Long commit comment cannot be seen with mouse over
- TW-15246 - Blinking expand icon in tree view
- TW-15252 - Failed to start email notification generated for personal build of another user
- TW-15254 - My Changes should not include projects if they are filtered out from Overview page
- TW-15256 - Invalid backup can be created when backing up configurations only (missing metadata-version.dat file)
- TW-15263 - Rename "Properties and Environment Variables" build settings section into "Build Parameters"
- TW-15265 - TeamCity reports an error with the delete ant task when there's no error
- TW-15266 - NUnit runner may run Explicit tests if any categories are defined
- TW-15274 - Get exception when trying to see build details
- TW-15278 - Occasional JS error under IE8 (configure visible projects dialog)
- TW-15280 - No rollover item highlighting/click processing for popup menu from username in the header
- TW-15281 - Display properties inherited from the project on build configuration properties pages
- TW-15296 - Cleanup after some archived-build deletions takes 6.5hr and counting on MS-SQL hosted on VM
- TW-15302 - On remote run on personal branch VCS roots are added to the project and not deleted
- TW-15305 - Changes might be not detected (exclude checkout rule from one of build configurations is considered global for some reason)
- TW-15306 - Multiple builds can be triggered for a single "personal" branch push
- TW-15312 - java.lang.Error happend in @BeforeClass method of JUnit4 suite is not reported
- TW-15317 - Default MIME type should be "application/octet-stream" not "text/plain"
- TW-15320 - Cannot see personal change details via REST API
- TW-15335 - Xml report plugin eats too much CPU
- TW-15337 - Include SVNKit version 1.3.5 or later
- TW-15341 - Logging is too verbose
- TW-15344 - Highlight my changes does not work on overview.
- TW-15357 - Branch remote run doesn't work if build configuration has snapshot dependencies
- TW-15359 - New artifacts resolver cleans destination directory for each artifact dependency separately
- TW-15360 - Plugin wrongly filters projects when using Perforce
- TW-15367 - Too verbose logging on error starting a build from remote run branch
- TW-15368 - Remove configHistory directory from .BuildServer/system
- TW-15370 - Unify placement of name field for VCS and build step
- TW-15371 - Build step name is listed in Build Runner column on steps configuration admin page
- TW-15373 - JavaScript error on opening build popup
- TW-15375 - Save agent thread dump into separate file instead of teamcity-agent.log
- TW-15385 - Attempt to clean old team city Perforce workspaces results in build failure on unrelated agent
- TW-15387 - UserNotFoundException when trying to start remote run
- TW-15407 - New artifacts resolver does not re-try artifacts downloading after the I/O error
- TW-15408 - PropertyNotFoundException on project responsibilities tab
- TW-15409 - No separators in build status text
- TW-15412 - NUnit Step Failed with Failed to parse arguments - No assemblies were found.
- TW-15418 - Count of failed tests in build short info doesn't match to the number of failed tests in popup
- TW-15425 - Out of memory exception on many configurations and no database data (complex checkout rules case)
- TW-15429 - Server can sit hanging locking on database as all connections are busy while they are not
- TW-15445 - VS addin doesn't perform SVN commit if a directory with inner files have been added
- TW-15454 - HSQL: verify that the HSQL DB directory is existent, writeable, have a space, and "buildserver.lck" file is writeable too
- TW-15458 - Value field has different layout in IE
- TW-15493 - Cannot specify file path with space in NCover arguments
- TW-15495 - Downloaded artifacts in build should log exact path and to the dest path
- TW-15497 - Exception on edit configuration step
- TW-15512 - Builds of deleted build configuration might be not deleted from history (and their artifacts preserved), if the builds were artifact-used in other builds
- TW-15514 - Editing the VCS root name might not change available build.vcs.number.* properties
- TW-15517 - Message logged inside a test makes test failed
- TW-15522 - Expanded test details can be collapsed on build results
- TW-15526 - No way to see what is modified in new tabbed custom run dialog
- TW-15532 - Run custom build dialog removes newlines from the properties values
- TW-15535 - Javascript error on build configuration dependencies page
- TW-15536 - Garbage overlapping text in artifacts field
- TW-15539 - Text is not readable on general settings
- TW-15543 - Exception on edit configuration settings tab
- TW-15546 - Incorrect artifact publishing path is used by the build (checkout directory is a substring case)
- TW-15550 - Search icon is missed

- TW-15554 - Two independent servers and agents only sharing the perforce user id can affect each other
- TW-15574 - Responsibility assigned notification should not be green
- TW-15580 - After opening the Overview page some of my projects are collapsed every time (TC doesn't remember status anymore)
- TW-15581 - Artifact dependency to /.teamcity/ folder is not accessible
- TW-15582 - Build status/progress messages do not include project name in sln builds
- TW-15584 - Coverage report can be not generated due to too long name for generated HTML files
- TW-15597 - java.util.ConcurrentModificationException is thrown from artifact dependencies resolver
- TW-15600 - "Unexpected Error" at Build Configuration Home Page/Statistics tab. Build #17268
- TW-15615 - In case of server problems, local page becomes strange
- TW-15622 - Artifact Cache must handle disk content corruption
- TW-15629 - IntelliJ IDEA plugin pre-tested commit stopped working
- TW-15631 - Main Page: the second project collapses time to time even when user does nothing
- TW-15635 - Running builds on build configuration home page are too narrow if large font is selected
- TW-15638 - Incorrect date is shown on overview page for last finished build
- TW-15639 - After click on Remove responsibility link TeamCity shows dialog with list of tests and tells me that I am responsible for these tests, but I am not
- TW-15643 - Teamcity+Ubuntu+Mono2.10+msbuild == Unmet requirements
- TW-15657 - TeamCity 6.0.2 died - Cloud integration - NullPointerException when retrieving list of instances
- TW-15658 - Building zipped artifacts with utf-8 filenames
- TW-15669 - JPS runner does not pack MANIFEST.MF into jar
- TW-15687 - Wrong deprecation note for system.agent.work.dir
- TW-15689 - Improve IDEA activation logging
- TW-15692 - REST: Allow to get/modify own user details via REST
- TW-15696 - Green build configurations should not appear in the problems list on Current Problems
- TW-15700 - Perforce checkout on agent error: Cannot start process, the working directory does not exist
- TW-15708 - Bug in grouping on failed tests on test details page
- TW-15720 - Build agent may not finish upgrade if buildAgent.properties contains non-standard value for systemDir
- TW-15721 - agentParameters.jsp EL expression exception.
- TW-15723 - Opening admin page for non-existent build configuration silently redirects to root administration page
- TW-15751 - TeamCity fails to collect changes from git repository with some cipher algorithms in ssh keys
- TW-15755 - PostgreSQL - TeamCity could not work with database when their tables are placed in user-defined schema
- TW-15771 - Running build status is not updated in IntelliJ IDEA plugin
- TW-15772 - Exception in MuteTestController
- TW-15773 - IntelliJ IDEA plugin incorrectly starts build with custom parameters if one of parameter values is multiline
- TW-15775 - It is possible to assign responsibility for ignored test, but the system does not show appropriate icon after that
- TW-15777 - Perforce checkout on agent always performs clean checkout
- TW-15790 - Maven Build Info is not shown for old builds, maybe because of cleanup process deleting hidden artifacts
- TW-15817 - SVN Checkout hangs on OS X
- TW-15838 - NPE on server submitting agent push dialog from a page that was not reloaded since previous server start
- TW-15850 - REST API - running:any does not list any running jobs
- TW-15853 - JavaScript error (document.forms0.name.focus is not a function) on trying to add new build configuration when build configuration limit is reached
- TW-15861 - Duplicates Finder (.NET) Does Not Use the Mercurial (DVCS) Cache
- TW-15862 - Unified Diff is empty in TC VS add-in
- TW-15874 - Extra text area resizing triangle that does nothing (FF4, Chrome)
- TW-15887 - Error "No tag "collapsibleTests" defined in tag library imported with prefix "tt"" appears at build results Overview page
- TW-15895 - Tray Notifier restarts non-stop
- TW-15902 - MS SQL: inspections cleanup hang if MS SQL server choosed nested loops instead of merge or hash join
- TW-15912 - Artifact cache is not cleaned on not enough disk free space
- TW-15917 - My database.properties file was overwritten by restore process
- TW-15918 - Exception on attempt to view archived project page (Agra)
- TW-15919 - IndexOutOfBoundsException when artifact dependency on tag could not find a build with the tag
- TW-15920 - Validate tag specification in artifact dependency dialog to be not empty
- TW-15921 - References are not supported in tag field of artifact dependency specification
- TW-15922 - Improve error message on inability to overwrite the file on artifacts dependency preparing
- TW-15923 - Artifact dependency on tag: tag value is not escaped on rendering
- TW-15937 - Runner type in the build log should be the same as on Build Steps configuration page
- TW-15942 - unexpected exception on agent logs if agent is unavailable
- TW-15945 - VCS trigger stops to work after system time changes
- TW-15951 - Jabber notification should not send notification for every test
- TW-15952 - Parameters completion stops working if field value contains some text
- TW-15958 - PowerShell plugin issues
- TW-15960 - Node selection at "Local Changes" screen resets every 5 seconds
- TW-15965 - Exception in logs on cleanup
- TW-15968 - Custom run dialog is too small
- TW-15969 - Custom parameters run dialog should be resizable
- TW-15974 - Expand all/Collapse all actions for ignored tests in a build
- TW-15989 - Spelling error in 'External Diff Viewer' message box
- TW-15992 - NullPointerException during collecting changes

- TW-15993 - Precious UI space not used properly
- TW-16010 - Installation of the handle.exe did not set agents in the upgrade state
- TW-16011 - Swabra reports that there are two locking processes while in fact there is one process only
- TW-16016 - PowerShell Plugin for TeamCity doesn't allow params to be passed into PowerShell Script
- TW-16022 - JavaScript error on steps listing page: BS.runnerActionsRUNNER_VS is undefined
- TW-16038 - ver.SERVERExecutors.lpExecutor - Unable to put task to queue because maximum capacity exceeded
- TW-16047 - NuGet package mime type missing
- TW-16051 - Double "profile profile" in EC2 unrecoverable error log message
- TW-16056 - Broken text field sizes on build configuration settings
- TW-16073 - Filtering drop downs become usual drop downs after filter application under IE
- TW-16075 - FileNotFoundException (Is a directory) error in IntelliJ IDEA project runner if there are directories under .idea/runConfigurations (e.g. Subversion agent-side checkout)
- TW-16080 - Cannot see all builds in build configuration list when adding new notification rule
- TW-16084 - Ctrl+Enter does not save form when inside text area
- TW-16093 - Parameters Report filter is not applied on Enter
- TW-16094 - Parameters report does not display any server-side errors
- TW-16095 - Restrict agent parameters report to be available only for authorized users
- TW-16097 - Incorrect path variable detection in
- TW-16106 - Cannot access git repository using scp-like url, although it works fine from command line
- TW-16108 - Non-latin characters are not displayed in Tree view of Build Log
- TW-16115 - Popup layout is broken
- TW-16120 - Executable bit is lost on unpacking .tar.gz archive via TeamCity artifact dependencies
- TW-16130 - MSBuild task is picking up 2.0 xbuild.exe instead of the available 4.0 version
- TW-16131 - AccessDeniedException in server log after cleanup: You do not have enough permissions to access VCS root (Cannot read property: potentiallyResponsibleUsers)
- TW-16133 - VS Addin: Bad error message when trying to log in with wrong password
- TW-16134 - Enter can submit the form (like Ctrl+Enter) in text area
- TW-16135 - Ignored tests reason is not shown on build overview
- TW-16139 - Build with modified VCS path via custom run build dialog may build not current sources
- TW-16142 - Maximum Artifact Size has maximum of 2147483647 (2^31-1)
- TW-16153 - Snapshot dependency build cannot resolve dep. property in checkout rules during checkout
- TW-16166 - Build without VCS roots should not log "Checking for changes" into the build log
- TW-16170 - Make "Fetch artifacts on update" option hidden by default
- TW-16171 - Reset button is missing in personal build customization dialog
- TW-16180 - HttpActivationServerComponent must be project level
- TW-16195 - Notification link is expected to open 'My Investigations' not a web on IDEA plugin
- TW-16212 - Do not display Mute text for users that do not have mute test permission
- TW-16213 - When opening run custom build dialog with fixed change, display the fixed change as modified parameter
- TW-16228 - Maven Snapshot Dependency trigger not locating settings.xml from M2_HOME
- TW-16246 - Artifacts dependency tree should not add more than one file in a input field
- TW-16254 - Build changes link may dot display triangle for the changes popup
- TW-16256 - Cannot open files dropdown (access denied error for a VCS root)
- TW-16258 - Customized build configuration parameters are not designated anyhow in the remote run dialog list
- TW-16261 - View agent logs page reloads without user action
- TW-16267 - Wrong mouse cursor over files in artifacts chooser popup in artifact dependency
- TW-16273 - Publishing Artifact duration incorrect
- TW-16308 - NPE in artifacts tree
- TW-16314 - Swabra provides unnecessary logging when downloading handle.exe
- TW-16320 - Eclipse plug-in unable to log in ("You do not have enough permissions to access build type with id" on the server side case)
- TW-16323 - Problem creating Maven configurations from POM file (Perforce case)
- TW-16340 - NPE in ResponsibilityInfo.getResponsibleUser
- TW-16341 - Commit action is disabled for remote run
- TW-16342 - Change "Load" caption on Load Handle page to "Proceed" or "Continue"
- TW-16344 - Incorrect grouping by date on MyChanges page
- TW-16349 - Show test stacktrace downloading progress on build overview
- TW-16357 - ADE on attempt to retrieve default label text (to show it on build changes page)
- TW-16358 - NPE in Email notifier
- TW-16360 - Ignored tests section should be collapsed by default
- TW-16361 - Exception in changes popup of personal build
- TW-16377 - Incorrect placement of property completion popup in run custom build dialog under IE8
- TW-16394 - JavaScript errors on custom run dialog opening for specific property names
- TW-16395 - JavaScript error on view agent push full log page
- TW-16401 - NPE in TeamCityColoredTreeRenderer
- TW-16407 - Sections expand / collapse does not work on Problems & Tests tab (for all sections except last)
- TW-16412 - Exception in idea.log if local coverage is enabled
- TW-16430 - Do not log messages regarding personal patch in the build log if personal build does not have personal patch
- TW-16435 - CME in IntelliJ IDEA plugin
- TW-16441 - MSTest runner does not work if input test assemblies path was quoted
- TW-16455 - Agent push doesn't work (Safari case)?
- TW-16456 - Agent push doesn't work on FF

- TW-16470 - Rename agent push plugin on plugins list
- TW-16476 - Do not add trash into server log on agent push operation error
- TW-16478 - Add ellipsis to "Install agent" button
- TW-16479 - Misleading messages on agent push: different in short and full log, unclear outcome
- TW-16485 - Wrong path of bootstrapper.sh uploading on agent push
- TW-16487 - Agent push cannot find Java if JAVA_HOME is correctly defined in .bashrc
- TW-16488 - Agent push should describe how the agent is installed (service or not) in the log
- TW-16493 - Handle filtering properly in case when there is no open project(s)
- TW-16508 - IllegalArgumentException from DBVcsModificationHistory.filterBuildTypeModifications
- TW-16513 - Cannot open Version Control Settings in IE7
- TW-16515 - Exception can appear when configuration with failed build doesn't have assigned responsibility
- TW-16516 - Field doesn't escape HTML tags
- TW-16517 - Brush up investigation texts all over UI
- TW-16519 - Cannot make a specific user investigator for a test
- TW-16522 - JavaScript error "failedTestsBlock is not defined" on switching tests list presentation on build results
- TW-16524 - Bad spacing/alignment of responsibility and mute icons
- TW-16526 - VS plugin doesn't commit changes when "commit if no new tests failed" and no new tests failed
- TW-16527 - Test muted with unmute on specific date is not considered muted in a build
- TW-16537 - IDEA plugin shows non-related projects
- TW-16539 - Sort supported agent runners by name
- TW-16540 - Project muted tests table looks strange if no muted tests
- TW-16545 - Describe agent push settings in Amazon EC2 to the user
- TW-16558 - Failed to open code coverage in latest IDEA 10.5
- TW-16559 - Cannot download build artifacts: 404 - Artifact does not exist:
- TW-16561 - Display the time when a test will be unmuted
- TW-16574 - My Changes page doesn't show regular builds with changes from personal builds on branches
- TW-16578 - Could not assign responsibility on test level until got project administrator rights
- TW-16580 - Mutes: Violation of unique constraint after cleanup
- TW-16587 - Separate log for remote run on branch processing
- TW-16594 - Improve investigation/mute dialog to simplify labels
- TW-16599 - Opening Investigation/Mute dialog scroll browser page to the top and the dialog can become not visible
- TW-16607 - Display names of EC2 security groups
- TW-16615 - Agent push command is not executed after EC2 instance started
- TW-16616 - Shortcut 'p' for all projects popup does not work on my changes page
- TW-16626 - Test in the Investigate/Mute dialog window lacks "investigated" icon
- TW-16630 - If I select an option which hides all issues in issue log, I cannot unselect the option and cannot get the list back
- TW-16632 - Brush up muted test popup
- TW-16641 - Incorrect number of new failed tests in change summary on My Changes
- TW-16642 - Maven configuration uses agent-side checkout for Git which might fail because no Git is installed on agent
- TW-16652 - "1 recoverable failure" when I check artifact dependencies on server
- TW-16655 - Improve agent push logging on EC2 image starting
- TW-16657 - Exception on Investigations tab
- TW-16663 - Switch to Bulk mode if there are multiple sections with tests changes toolbars for all of the sections
- TW-16670 - Invalid layout on Projects page in IE 7
- TW-16671 - StackOverflowError during build parameters calculation
- TW-16672 - No license terms are displayed on downloading SysInternals tools
- TW-16675 - JavaScript error "Error: \$("swabra.rules_DragCorner") is null" on editing XML report build feature after opening Swabra build feature settings
- TW-16676 - Unclear and wrong "Destination path contains potentially unsafe characters." message on artifacts dependency configuration
- TW-16677 - Special characters are not escaped in properties names
- TW-16678 - No validation for incorrectly entered date in mute test dialog
- TW-16684 - Unescaped string in breadcrumbs via build number status
- TW-16685 - Failed to start message is not using proper HTML escaping
- TW-16686 - Unescaped build configuration name in Start Investigation dialog
- TW-16688 - Brush up investigation labels for build configuration investigation
- TW-16690 - No suitable build configurations can be displayed in remote run dialog if filtering by current project is turned on
- TW-16703 - Link "Install build agent" doesn't work on Agent Push tab
- TW-16717 - Different font size is used at View Modification page
- TW-16725 - VS addin empty project filter details dialog
- TW-16729 - Cannot remove muting in a specific build configuration if the test is muted in several
- TW-16732 - Previously seemingly unlimited characters for issue tracker project keys now limited to 100 characters
- TW-16759 - My Changes page adds new change block instead of refreshing existing one
- TW-16760 - Ctrl-Tab & Ctrl-Shift-Tab switch tabs on My Changes
- TW-16761 - autocompletion should not be shown for password fields
- TW-16770 - Agent push fails with unclear error message "Auth fail" when password authentication is not turned on on Linux machine
- TW-16780 - Autocompletion loads completions in cycle and never reach the end
- TW-16785 - Remove "No responsibility is taken yet" text from the tooltip on tray notifier icon
- TW-16789 - Investigation is auto removed once all test runs are muted in the project?

- TW-16804 - Click on 'Ignore whitespaces' on diff view for guest user with 'Project developer' role redirect to overview page
- TW-16806 - Unify "view all" message presentation on the Problems and Builds tab (MyChanges page)
- TW-16813 - MyChanges page does not display some builds triggered as a result of personal build.
- TW-16826 - Re-name the Apply button (Investigation/Mute dialog)
- TW-16856 - Tests tab may not update on View select box change
- TW-16857 - Bulk mode resets automatically after some time (10-20 seconds)
- TW-16859 - Amazon EC2 integration does not work with VPC
- TW-16866 - 'Error accessing server' in create trigger dialog on click on 'Save' when trigger is not selected
- TW-16872 - Incorrect checkbox selection in bulk mode of test grouping in IE8
- TW-16895 - Source file paths are listed as <unknown> in FindBugs inspections results
- TW-16902 - Redirect to original URL after login does not work
- TW-16931 - My changes page shows no changes
- TW-16937 - layout problem in bulk mode
- TW-16956 - Missing documentation page?
- TW-16958 - JavaScript injection in VCS root name (build configuration page)

Exception

- TW-14614 - TF248021: You have specified a query string that is not valid when you use the query method for a flat list of work items. You cannot specify a param
