

Previous PhpStorm Releases

 This page is deprecated. Find previous releases on <https://www.jetbrains.com/phpstorm/download/other.html>

 We keep latest release in each branch available for download any time.

-  Remember to install .zip & .tar.gz versions into COMPLETELY EMPTY FOLDER. Do not just unpack over previous version!
-  Your non-bundled plugins probably will break when changing between branches! You'll need to get the correct version (it may be inexistent)
-  Remember to BACKUP your SETTINGS before 1st run when changing your build UP (the ~/WebIde* folders in you home dir + .idea folder in each project)
-  You'll need BACKUP and ERASE your SETTINGS 1st before run when changing your build DOWN (the ~/WebIde* folders in you home dir + .idea folder in each project)
