

TeamCity Build Agents Diff

General Info

| | |
|---------|----------------------------|
| Vendor | JetBrains |
| License | Apache 2.0 |
| Type | free, open-source |

Plugin Description

This TeamCity server plugin is a build agents comparison tool particularly useful when investigating environment-dependent test failures.

The plugin adds the Diff tab to the [Agents page](#) where you can select the build agents to compare and see the differences in the [agents' parameters](#).

When looking into a problem on a particular build agent, quick navigation is provided with the [Go to build agents diff page link](#) available on the Agent Summary page.

Plugin Installation

Install the [plugin](#) as usual.

Plugin Development Status

Stable, production quality.

TeamCity Versions Compatibility

TeamCity 9.0+

Development links
