

IDEA 10.5 EAP

What is Early Access Program

We at JetBrains believe that making tools for developers should greatly involve listening to developers. Our Early Access Program lets development community closely participate in discussions devoted to IntelliJ IDEA and influence development planning, from early stages onwards. Early Access Program allows you to try pre-release versions of our software to evaluate features that will be added to the next release.

Be Careful

It is important to distinguish EAP from traditional pre-release software. Please note that the quality of EAP versions may at times be way below even usual beta standards.

What is IDEA 10.5?

IDEA 10.5 (aka Xena) is free upgrade for IntelliJ IDEA version 10.

Download IntelliJ IDEA 10.5

IntelliJ IDEA 10.5.4 Released on December 5th, 2011

Download from [JetBrains web site](#)

Plugin Development Kit: Since the open-source Community Edition was released, we no longer provide the plugin development kit as a separate download. Please see <http://www.jetbrains.org/display/IJOS/Writing+Plug-ins> for instructions on setting up a plugin development environment.

JDK 7 support

Java. In place refactorings: introduce parameter

TODO inspection in committed files, Svn / Gnome keyring support, import patches to shelf

Better quick documentation

Custom Nullable / Not Null annotations

Specialized Android only SDK

Less typing during completion and navigation

New nonmodal replace text control with instant preview of replacements (e.g. easier regexps)

Faster startup

Better diff (e.g. Directory diff)

New refactorings for Groovy (Introduce Field / Parameter)

Easy create / navigate Groovy tests

Forking VM when running JUnit tests

Nested tags highlighting in HTML

<http://blogs.jetbrains.com/idea/2011/04/spring-31-c-namespace-in-intellij-idea-105-eap-build-106561/>

Spring:

- improved performance for large spring projects with multiple configs
- spring 3.1 support: [profiles](#), [c-namespace](#)
- [Spring Integration](#)
- [Spring Roo console support](#)
- [added new spring-related features](#): navigation, inspections, etc.

[Google Chrome JavaScript debugging](#)

[Flex Mobile application development support](#).

[Move inner ActionScript class to Package refactoring](#).

[Introduce variable, field refactorings improvement for ActionScript](#).

[Change signature refactoring for JavaScript](#)

[Jetty integration](#)

[XSLT2 support](#)

EAP Build Announcements

The recommended way to get notifications about new EAP builds is to follow [@intellijidea](#) on Twitter. Alternatively, you can subscribe to the build announcements [as an RSS feed](#), or create an account in Confluence and watch this page in order to get e-mail notifications about new builds.
