

# CoffeeScript Run Configuration

 Before the first launch of CoffeeScript file via Node.js please take the following steps

Install NodeJS plugin

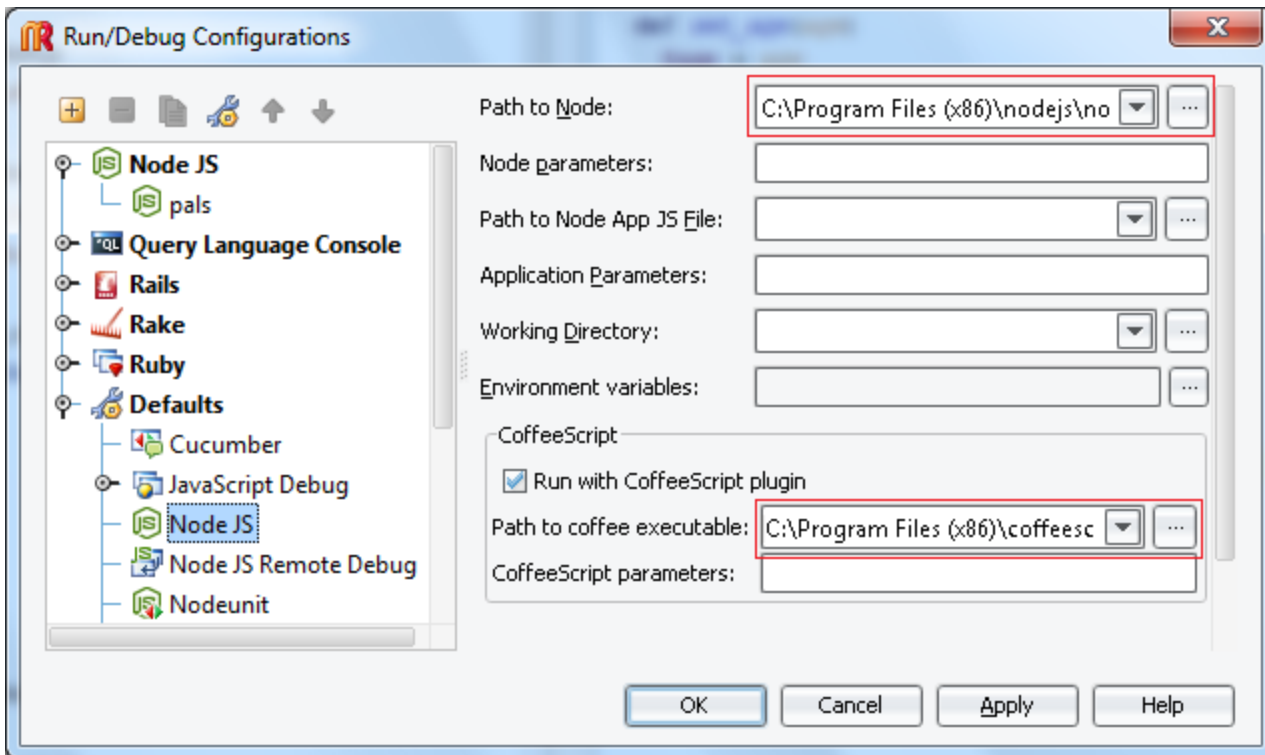

Install Node.js

<http://nodejs.org/#download>

Install CoffeeScript

- Windows: download from <http://github.com/jashkenas/coffee-script/tarball/master>
- Mac or Linux: use **Node Package Manager** (leave off the -g if you don't wish to install globally)  
npm install -g coffee-script

Set the paths to Node.js and CoffeeScript for the default Run/Debug configuration

For example:

- Windows: "C:\Program Files (x86)\nodejs\node.exe" and "C:\Program Files (x86)\coffeescript\bin\coffee"
- Mac or Linux: "/usr/local/bin/node" and "/usr/local/bin/coffee"
