

EAP 7096 Release Notes

New @TestOnly annotation and inspection

You can annotate methods that exist only for test means and should not be called from production code. See inspection description for details

JavaEE

- GUI editors are available for JavaEE facet XML config files (e.g. web.xml) in separate editor tabs.

Quick import

You can now open Maven and Eclipse projects from Open Project dialog or by passing the project file path in IDEA's command line (as 1st parameter)

JUnit Support

Bundled and supported JUnit 4.4.

JavaScript / ECMAScript L4 (aka Flex 😊) Support

- Flex facet is added, allows specification of Flex SDK home.
- File references are validated / completed in 'include' directive and 'source' annotation parameter. Quickfix is available when file / directory does not exist.
