[TeamCity 2017.1.1 \(build 46654\) Release Notes](#)

[Fixed issues in the tracker](#)

## Feature

- [TW-46594](#) - Detect and warn administrator on incorrect proxying server configuration
- [TW-48536](#) - Display global server errors/warnings only to server administrators

## Usability Problem

- [TW-46066](#) - [Flaky Test Detector] Test analysis has some strange "Show Type Id" option
- [TW-48693](#) - Assign Roles dialog does not support hierarchy of projects with hidden parents.
- [TW-49189](#) - Cloud profiles. <Project pool> is displayed in Agents tab though it is hidden in the Pools.
- [TW-49820](#) - Rework project pool presentation on the Agent pools list: make it less standing out
- [TW-49830](#) - Use filtering drop-downs in the cloud image profile settings
- [TW-50000](#) - Broken "Disk usage" data in a popup with cleanup rules on Disk Usage table

## Bug

- [TW-11579](#) - "Loading" icon is displayed in the wrong place for issue tracker test connection
- [TW-39206](#) - Build user %system.teamcity.auth.userId% is unable to cancel own build
- [TW-39301](#) - Excessive logging in the server vcs log: Failed to add task to executor because of the error: java.util.concurrent.RejectedExecutionException: Executor queue has reached its maximum capacity
- [TW-40743](#) - With wrong server plugin, checkout directory can appear without files for server-side checkout (incremental patch is used after clean checkout)
- [TW-42827](#) - Confusing "Previous build might have not finished successfully" logging on
- [TW-47486](#) - Vmware cloud instance stuck in "Initializing..." state
- [TW-48460](#) - User with Project Administrator role should have access to actions related to his project only in Administration->Audit.
- [TW-48463](#) - Automatic merge fails when two pull requests are merged the same time
- [TW-49004](#) - Error adding image to vSphere cloud, "A specified parameter was not correct: spec.location.pool"
- [TW-49061](#) - Popups over build points on statistics charts stop appearing after Ctrl+F usage in Chrome
- [TW-49281](#) - Old revision was checked out in one of repositories
- [TW-49346](#) - Cloud profiles. The cloud profile images are run in default pool if containing them pool is deleted.
- [TW-49511](#) - Minor UI improvements in "Change cloud integration status" action (button width, button caption)
- [TW-49516](#) - QA Role can launch build with required parameters without specifying them
- [TW-49575](#) - S3 Artifact Storage: Torrent plugin doesn't work with external artifacts.
- [TW-49581](#) - Downloading artifacts: "If-Modified-Since" header is not supported (has no effect for majority of artifacts): milliseconds precision case
- [TW-49727](#) - Coverage Report tab doesn't show
- [TW-49729](#) - Make sure CSRF check does not break login form submission even if the proxy is configured incorrectly
- [TW-49789](#) - Step NuGet Installer fails after update to TeamCity Enterprise 2017.1 (build 46533)
- [TW-49817](#) - Click on the current entity title in the breadcrumbs should open default tab of the current entity
- [TW-49864](#) - Branch selector is missing on Statistics and Pending changes tabs for build configuration home
- [TW-49882](#) - External artifacts aren't removed after a build configuration is deleted
- [TW-49885](#) - Fix styles for Copy build configuration link (maximum build configurations count is archived)
- [TW-49891](#) - Maven settings are not copied when project is copied
- [TW-49905](#) - Artifact tree can show out-of-date artifact list on the web because of caching
- [TW-49906](#) - Several masters
- [TW-49907](#) - Wrong wait reason can be shown for a queued build with unfinished dependencies
- [TW-49916](#) - Project explicitly marked as visible may become hidden from Overview page after dismissing add new projects
- [TW-49918](#) - Collapse/expand doesn't work on ' Build problem investigations' section of investigations page
- [TW-49924](#) - BuildTypeNotFoundException error on /favoriteBuilds.html
- [TW-49926](#) - Run custom build dialog cannot load due to JS exception
- [TW-49928](#) - Cannot delete a build: "You do not have enough permissions to access build type with id: <unrelated build configuration>"
- [TW-49934](#) - REST: No compatible agents are listed for a queued build when the build configuration has no compatible agents, but the build does

- TW-49942 - NPE in SwabraUtil.unifyPath
- TW-49945 - Project administrator cannot edit meta-runner: "You do not have enough permissions to edit project with id: \_Root"
- TW-49946 - Overridden artifact dependencies on same-project configurations are not preserved on project copy
- TW-49948 - Versioned settings disabled health report doesn't go away due to error writing into internal.properties file
- TW-49964 - Builds Schedule displays Edit link leading to template rather than build type for overridden inherited Schedule triggers
- TW-49971 - JavaScript error on attempt to view chart on build statistic values page
- TW-49981 - SSH keys are not copied when project is copied
- TW-50008 - Build time report does not work if user is a project admin in some projects only
- TW-50009 - Disk usage report shows cleanup settings to user who only has view project permissions in this project
- TW-50010 - Project admin of a single project can see too many groups
- TW-50012 - Edit user profiles pages should be shown in read only mode or not shown at all if current user can manage roles but can't edit profile of the user
- TW-50029 - Projects are hidden on overview when a new user creates a project
- TW-50030 - Stacktrace in logs on the invalid Pin build request
- TW-50038 - Search link "View results on a dedicated page (Shift-Enter)" doesn't work
- TW-50048 - Missing namespace from downloaded kotlin-dsl
- TW-50053 - Generated Kotlin settings can have unnecessary scrambling of the "credentialsJSON:..." value
- TW-50067 - In the "Investigations" tab, the "Filter by investigator" has extra/missing entries
- TW-50068 - Commit Status Publisher does not report build status to Bitbucket Cloud correctly when a build is stopped
- TW-50076 - MoveCloudPermissionsToProjectLevel adds special role to user when this is not necessary
- TW-50084 - Artifact with jsp file cannot be collected from agent
- TW-50092 - Connected profile link in Hub creates new user in TeamCity
- TW-50096 - Powershell arguments in windows aren't logged in the build log
- TW-50097 - Wrong server-side checkout with submodules and checkout rules
- TW-50103 - Vmware plugin might not work on macOS when latest vmware tools used
- TW-50105 - Commit Status Publisher does not use JVM proxy settings
- TW-50111 - AccessDeniedException: you do not have enough permissions to access VCS modification with id
- TW-50113 - Create project from URL does not work for <https://gitlab.com> URLs, unless URL ends with .git
- TW-50130 - TFS java mode: restart out of process app on settings changes
- TW-50148 - Kotlin DSL BuildTypeSettings delegate properties don't have the same value after being added to project
- TW-50150 - Duplicated 'project-graphs' feature id after upgrading from 9.1.7
- TW-50164 - Second statistics series not rendered for a particular pattern
- TW-50182 - After upgrade to 2017.1.1, projects are unable to build due to a TFS DB server connection error
- TW-50192 - Spaces masked with asterisks (\*\*\*\*\*)
- TW-50195 - Password values replacement can spoil TeamCity service messages for trivial passwords like "teamcity"
- TW-50214 - JS error on Flaky Tests page
- TW-50217 - Unable to list VMs if there are two with the same name in vCenter
- TW-50218 - Authentication exception when storing configuration files in SVN server with NTLM

## Performance Problem

- TW-49958 - Slow background calculation of "Similar VCS root usages" server health item
- TW-49974 - Limit the number of processed equivalent build promotions
- TW-50045 - Disk usage can greatly slow down cleanup: waits on lock in DiskUsageSListener.buildFilesCleaned
- TW-50114 - DiskUsage internal WeakHashMap occupies too much memory and retains SecuredBuildType instances

## Security Problem

- TW-50043 - Repository configuration poisoning via filter bypass
- TW-50060 - Add clickjacking protection for TeamCity administration pages (/admin/)
- TW-50065 - Qalys PCI scanner finds two vulnerabilities (XSS on change details page)
