

ReSharper 2.5 Nightly Builds

ReSharper 2.5 Nightly builds

This page contains nightly builds for ReSharper version 2.5. To get nightly builds for the latest EAP version, go to [Nightly Builds](#)

What are Nightly Builds?

Nightly builds are builds which are built and published automatically every night without any additional testing from JetBrains' side. Only our internal automated tests are passed.

 Pre-release software. Nothing is guaranteed
Be careful: there is absolutely NO GUARANTEE that a nightly build will even run!

You can try it at your own risk and post your feedback (as for EAP builds - into the newsgroup/forum and JIRA). However, if someone tried a nightly build and reported us a problem which is critical, we add corresponding notes to the builds table. Also after some period of testing (e.g. 1 day) if there were no critical problems reported/found, we've add **Stable** mark for the build.

Nightly Builds Download

 Legend
Nightly - ordinary nightly build
EAP - this build has been also published on the [EAP Builds](#) page
EAP candidate - we are going to publish this build on the [EAP Builds](#) page after some testing

Not tested - nobody has checked the build, you can download it at your own risk
Works here - our team have tried the build and it's more less working for us
Stable - no critical problems has been found so far
Not recommended - there are serious problems in the build and we do not recommend to use it

Date	Build #	Status	Comment	Known problems	Fixed issues
17 Jul 2007	383	Nightly	Not tested	None	Fixes
03 Jul 2007	382	2.5.3 RC	Stable	None	Fixes
29 Jun 2007	381	Nightly	Not tested	None	Fixes
22 May 2007	380	Nightly	Not tested	None	Fixes
02 May 2007	379	Nightly	Not tested	None	Fixes
28 Apr 2007	378	Nightly	Not tested	None	Fixes
27 Apr 2007	377	Nightly	Not tested	None	Fixes
10 Apr 2007	376	2.5.2 RC2	Stable	None	Fixes
