

Faradi 7.0.1 (build 21326) Release Notes

Bug

- [TW-10236](#) - Cloud agents can sometimes be not deleted from the system and hold agent licenses
- [TW-10715](#) - Inspection count diff between builds is incorrect
- [TW-17905](#) - Build Queue may refresh and remove checked checkboxes
- [TW-18224](#) - Unnecessary checkout directory cleanup when temp directory is located on another drive
- [TW-18387](#) - Test's drop-down menus (with "Open in IDE", "Test history" and "Mute" options) do not disappear
- [TW-19174](#) - Build icon on My Changes page is not updated
- [TW-19806](#) - `IllegalArgumentException`: At least two filters needed. when using TeamCity plugin with EGit 1.2
- [TW-19908](#) - Add display of custom code coverage via service messages to build overview
- [TW-20067](#) - Add option to make NuGet Pack Runner avoid changing Version Property
- [TW-20176](#) - `%ERRORLEVEL%` is always 0
- [TW-20242](#) - My changes: some stacktraces do not open
- [TW-20295](#) - Move Hg-used log.template out from `system\pluginData`
- [TW-20371](#) - Server hanging on start: `getRegisteredExtensions/PositionAwareSorter.getAllSorted` case (many project tabs)
- [TW-20372](#) - `WebLinks.getConfigurationHomePageUrl` returns invalid URL
- [TW-20377](#) - IE8: help icon cases javascript error
- [TW-20380](#) - .NET Inspection don't show new errors for personal builds
- [TW-20382](#) - Tree view cannot be opened in IE6 (Operation aborted)
- [TW-20387](#) - IE8: Javascript stackoverflow in Run Custom Build Dialog
- [TW-20389](#) - IE8: Broken Build Parameters tab of Run Custom Build Dialog
- [TW-20391](#) - Artifacts downloaded to wrong path
- [TW-20395](#) - Do not apply user timezone shift to dates shown on licenses page
- [TW-20404](#) - Many pages (projects, build configuration details) are blank under Glassfish v2
- [TW-20406](#) - Investigation counter is showing incorrect data
- [TW-20415](#) - "Run" button looks broken in Chrome 17.0.963.56 m
- [TW-20427](#) - Perforce agent side checkout hangs on agent
- [TW-20439](#) - There are assembly names in lowercase in CSV test report
- [TW-20444](#) - Duplicates Finder (.NET) stopped working after upgrading to the TeamCity 7.0
- [TW-20446](#) - Maintenance Authentication Token Missing
- [TW-20447](#) - NPE in `pendingChangesLink.tag`
- [TW-20452](#) - Exception in Inspections build log: `java.lang.UnsatisfiedLinkError: no IdeaWin32 in java.library.path`
- [TW-20460](#) - SVN Root being deleting when unrelated project starts
- [TW-20462](#) - Project report tab URL may change
- [TW-20482](#) - NUnit and other .Net test runners may hung or fail with out of memory when there are several assemblies paths specified
- [TW-20490](#) - Gradle build step: "JVM command line parameters" have no effect
- [TW-20492](#) - How to setup IntelliJ IDEA Project Build Step with `.idea` project folder using WebStorms `.idea` project folder
- [TW-20505](#) - Dependency changes duplicates normal changes
- [TW-20520](#) - TeamCity hangs on agent side checkout using git after upgrade to v7.0
- [TW-20531](#) - NuGet pack runner does not work if agent is running under Java 1.5
- [TW-20536](#) - Queued build estimate tooltip stops working after fragment refresh
- [TW-20540](#) - Javascript error on clicking ? help icon in IE
- [TW-20548](#) - Changing VCS root setting (password) makes it impossible to run build for a change detected prior to settings change
- [TW-20555](#) - Command line tool does not work with ClearCase (No one of [...] configurations affected by collected changes)
- [TW-20556](#) - `org.apache.jasper.JasperException` when clicking "Run Custom Build"
- [TW-20559](#) - If several XML report build features are configured, only the first one is processed
- [TW-20570](#) - A build started via finish build trigger and having snapshot dependency can include less changes then expected
- [TW-20573](#) - Build queue estimates tooltip does not work in queue popup
- [TW-20576](#) - IDEA plugin fails to connect to server: `NoSuchMethodError: org.jetbrains.idea.svn.SvnVcs.getSvnAuthenticationManager`
- [TW-20577](#) - TC server doesn't show first screen on the first installation if the data directory does exist but is empty
- [TW-20605](#) - Failing test muted in build config is marked failed in personal build.
- [TW-20614](#) - TeamCity 7.0, VS 2010 - "URL is empty." problem
- [TW-20619](#) - New TeamCity 7 artefact dependency pattern issue
- [TW-20620](#) - Upgrade TC from 6.5.x to 7.0 fails if TS server has been stopped when two Amazon agents of the same image was running
- [TW-20634](#) - `java.lang.OutOfMemoryError` in Search
- [TW-20635](#) - Ncover full coverage report had been broken
- [TW-20643](#) - PerfMon does not show chart if teamcity is deployed under non empty context
- [TW-20650](#) - DotCover version is 1.2.352.19. This version is newer than TeamCity and may not be fully supported.
- [TW-20651](#) - Manual reset of parameters in copied configuration is required after project copy operation if configuration was inherited from a template

- [TW-20656](#) - Always display parent project near build configuration in 'Add New Snapshot Dependency' dialog
- [TW-20661](#) - No package is shown in the NuGet feed if all packages have pre-release version
- [TW-20671](#) - REST-API lists builds triggered by deleted user when filtering by existing user
- [TW-20674](#) - Error on server start: ... does not contain any non-empty event listening method implementations.
- [TW-20681](#) - IDEA project runner cannot parse library from .idea project if library name contains space or dash character
- [TW-20688](#) - Artifact download cache is created under agentTmp folder, not under agent's system folder
- [TW-20695](#) - IDEA settings parser cannot find path variables in project libraries if .idea directory is placed in subdirectory
- [TW-20696](#) - Could not load type BuildEventContext
- [TW-20702](#) - Nuget install Path to solution file without .sln
- [TW-20704](#) - Batch fetch fails for JIRA
- [TW-20713](#) - Maven test-jar dependencies not respected
- [TW-20720](#) - Failing/successful labels on collapsed main overview page are stuck together
- [TW-20738](#) - Unable to start nuget pack
- [TW-20742](#) - Cleanup might leave empty directories in build artifacts after artifact cleanup (directories with only directories as children case)

Exception

- [TW-18756](#) - IOException in ClearCase log
- [TW-19838](#) - Exception upgrading to 7.0 (No visible effects on server though)
- [TW-20424](#) - EA-33935 - assert: MarkupModelImpl.<init>
- [TW-20429](#) - Exception from NuGet trigger on server shutdown
- [TW-20430](#) - NuGet plugin may not start if Jersey classes are available on the server
- [TW-20445](#) - Cannot access a disposed object. Object name: 'MenuDataSource'.
- [TW-20470](#) - The component `ВЪНJetBrains.TeamCity.VsPackage.ShowTeamCityToolBarHelper`, `JetBrains.TeamCity.VsPackage`, `Version=7.0.613.69`, `Culture=neutral`, `PublicKeyTok`
- [TW-20572](#) - logfile exception: `java.lang.IllegalArgumentException` Argument 1 for `@NotNull` parameter of `jetbrains/buildServer/serverSide/auth/AuthUtil.hasReadAccessTo` must not be null while processing request: `POST /runtimeError.jsp'`
- [TW-20581](#) - Accessing Build Queue -> Error message: `javax.servlet.jsp.JspException: javax.servlet.jsp.JspException: javax.el.ELException: Problems calling function 'fn:length'`
- [TW-20624](#) - EA-34381 - assert: `ApplicationImpl.invokeAndWait`
- [TW-20626](#) - EA-34159 - IAE: `ObjectWrapper.invoke`
- [TW-20636](#) - Inspections (.NET) execution failure
- [TW-20653](#) - Cannot set the caret outside the document lines. Within the valid lines, on the contrary, setting the caret into the virtual space is usually allowed.
- [TW-20743](#) - Agent pools: Truncation exception on long pool name
- [TW-20756](#) - CME in IDEA plugin

Performance Problem

- [TW-20518](#) - Opening build queue popup on a build configuration can be slow
- [TW-20569](#) - `changes.html` request can be too slow
- [TW-20703](#) - Slow `JetBrains.TeamCity.Utils.AssemblyResolver` inside .Net 4.0 `NUnitLauncher`

Usability Problem

- [TW-17292](#) - Command buttons are hidden on custom build UI when the project has many parameters
- [TW-18148](#) - Overview page: popups on the build status messages are incorrectly laid out.
- [TW-19837](#) - Test details popup has confusing yellow color - does the build include my changes?
- [TW-20008](#) - Parameters can be displayed not sorted
- [TW-20399](#) - Add / after ! in links to files inside archives

Cosmetics

- [TW-18752](#) - Failing/successful columns on collapsed main overview page should be right-aligned
- [TW-20425](#) - Project Overview: small glitch in tooltip
