

# Hajipur 9.0 EAP4 (build 31963) Release Notes

- [Project Import Improvements](#)
- [Other Improvements](#)

## Project Import Improvements

We continue improving importing projects and in this EAP:

- now investigations are imported properly ([TW-38794](#), [TW-38775](#), [TW-38828](#))
- user's and group roles import has been [fixed](#)
- mutes are imported for the users already existing in the database for the target server [TW-38823](#).

## Other Improvements

- Git agent repository cache (mirrors) is [enabled by default for newly created Git VCS roots](#)
- NuGet feed supports API v2. Feed performance should be much better.
- The bundled Java has been [updated to version 1.7.0\\_72](#)
- [fixed issues](#)
