

# TeamCity 6.0 Release Notes

(view in [issue tracker](#))

## Feature

- TW-2 - Use collapsable tree for build log
- TW-912 - Re-run failed test from within Teamcity log console
- TW-1021 - Implement highlighting and navigation from compilation errors after "remote run"
- TW-1281 - Support TestNG tests in Ipr runner
- TW-1369 - Possibility to view build agent logs in web
- TW-1500 - Use IDEA's shared run configurations to set up tests in ipr runner
- TW-2103 - The ability to checkout to a build agent with Perforce SCM.
- TW-2252 - More convenient UI for artifact dependencies configuration
- TW-2438 - Produce WAR/EAR build artifacts on IPR build like IDEA does
- TW-2555 - Option to hide cancelled builds full build configuration history
- TW-2813 - Add ability to depend VCS triggering rules on commit message
- TW-3098 - Ability to run dependent build on the same agent
- TW-3581 - Support pin/unpin action via REST API
- TW-3649 - Mark newly failed tests on the "Failed tests" tab
- TW-3660 - Support multiple build runners per build configuration
- TW-3677 - Option for a dependency trigger to trigger a build even if the dependent build failed
- TW-4344 - VCS rules for the schedule based triggers
- TW-4634 - MSBuild: Autoselect ToolsVersion based on user script
- TW-4690 - NUnitLauncher does not provide enough logging
- TW-4905 - Ability to disable task replacement for MSBuild Build Runner
- TW-5166 - "Internal error" failure status
- TW-5201 - Ability to specify Java to use for Ipr-based runner builds
- TW-5241 - Enhance agent checkout by "svn cleanup" support
- TW-5279 - Priorities for build configurations (make build queue a priority queue)
- TW-5323 - Ability to hide certain artifacts
- TW-5558 - Detect .NET Frameworks and Visual Studio with build numbers through Registry.
- TW-6051 - View agent internal logs in web
- TW-6052 - .NET: enable debug logging checkbox
- TW-6433 - Ipr runner: automatic generation/export of JAR file artefacts
- TW-6977 - Ipr runner should be able to run Groovy tests
- TW-7003 - Provide server URL as property inside the build script
- TW-7084 - Use IDEA headless build for IPR runner
- TW-7176 - Process stacktraces in the build log to show links to the code
- TW-7954 - MSBuild build may not rebuild assembly after personal build if no rebuild option is set.
- TW-8046 - DelayedCommitCookie should use 2-phase commit
- TW-9355 - Checkout mode on agent should be supported for ClearCase base CMT
- TW-9818 - Ability to filter Change Log by changed file path
- TW-9976 - Allow to download backup file form TeamCity web UI
- TW-10229 - Upgrade bundled JRE to the latest version
- TW-10321 - List agent-provided properties in properties suggestion popup
- TW-10504 - Allow remote runs to be compared to current checkout in IDE
- TW-10558 - Ability to run custom build as hidden/personal
- TW-10662 - Can not start using TC Remote Run and TC Local Changes tab without initializing Perforce support
- TW-10725 - Record dependency versions used in Maven Builds
- TW-10741 - Agent-side checkout for Git
- TW-10783 - Add support for Gradle
- TW-10973 - Support collecting code coverage for MSTest tests (PartCover+NCover)
- TW-11004 - Add build pin/tags info to custom artifact dependency chooser in Custom Run dialog
- TW-11056 - Warn user in web UI before upgrading database and data directory data
- TW-11060 - Allow to create backup of old data before upgrading
- TW-11063 - Allow to backup data of previous TeamCity version
- TW-11137 - Allow to narrow/filter users while assigning tests responsibility
- TW-11233 - TeamCity doesn't understand JAR directories in Ipr runner
- TW-11444 - RVM (local) support for TeamCity Rake runner
- TW-11556 - Make it possible to create build configuration without Buildrunner
- TW-11564 - Allow to temporarily disable sending notifications via email or Jabber notifiers
- TW-11595 - Make collecting suitable configuration progress cancelable
- TW-11670 - Add "open in browser" action to build details pane
- TW-11725 - Sign TeamCity plugin for Eclipse
- TW-11744 - Support NUnit 2.5 XML report format
- TW-11746 - Amazon EC2 integration should generate agent name base on agent properties
- TW-11815 - Support NUnit 2.5.5
- TW-11876 - Support creating Maven configurations from an svn+ssh:// url

- TW-11911 - Allow to assign responsibility for several tests at once
- TW-11971 - Include lib and plugins directory into server backup
- TW-12002 - Rework backup settings to provide several top-level options
- TW-12003 - Rework server data backup UI by merging start backup and configure backup tabs
- TW-12094 - Support maven-failsafe-plugin for Maven coverage
- TW-12100 - Output targets from MSBuild
- TW-12116 - Support Asia Passific EC2 region
- TW-12212 - Display "notificator is paused" note on user profile while configuring affected notifications
- TW-12259 - Support presets for diagnostics logging
- TW-12351 - Display total server log size on server log list
- TW-12374 - Use git from PATH environment variable for agent-side checkout if others are not found
- TW-12383 - Make it possible to apply Delayed Commit changes to workspace after starting Personal Build in VS add-in
- TW-12553 - RSpec 2.0 test reporter support
- TW-12694 - Support PMD CPD XML reports
- TW-12697 - Transparent support of maven-failsafe-plugin reports
- TW-12751 - MaintainDB tool: Allow to specify path to jdbc drivers when data directory is not specified.
- TW-12756 - Swabra does not have the option to clean after the build
- TW-12853 - Support Tomcat 7
- TW-12854 - Support NUnit 2.5.6
- TW-12972 - Add an extension that allows contributing to the build runner parameters on the agent side
- TW-13076 - Display error message in addition to "Failed to start build"
- TW-13078 - Use filtering control instead of standard drop-down in more selectors in UI
- TW-13151 - Add more data into saved/displayed server thread dumps
- TW-13176 - Assigning responsibility to multiple tests: add indication which tests are new
- TW-13188 - Re-run failed build's test locally
- TW-13264 - Keyboard navigation to expand/collapse blocks on changes page
- TW-13272 - Add a keyboard shortcut to invoke "All projects" popup menu
- TW-13351 - Ability to list running builds via REST
- TW-13389 - Extension point to influence agents that a queued build can run on
- TW-13412 - Allow to assign a responsibility for tests to other users
- TW-13413 - Provide view for browsing compilation errors of a build
- TW-13439 - Build log should identify each build step clearly
- TW-13463 - Use filtering drop down for selecting runner type on a build step settings
- TW-13469 - Support IDE usage statistic for VS
- TW-13471 - Support IDE usage statistic for Eclipse
- TW-13476 - Ability to create new users via REST API
- TW-13484 - .NET duplicates: report statistics in xml report
- TW-13487 - Use filtering build configuration control in copy and move build configuration dialogs
- TW-13511 - Standalone test runners
- TW-13548 - Allow to open unified diff patch for a change in IDE from web UI
- TW-13585 - No logging on server startup while in maintenance mode
- TW-13586 - Maintenance mode should be able to be turned off via internal property
- TW-13660 - Allow to write authentication plugins that can derive login credentials from HTTP request
- TW-13810 - Open unified diff patch for a change in IDEA plugin
- TW-13952 - Support NUnit 2.5.8
- TW-13953 - Report overall Class & Method coverage stats for dotCover
- TW-14026 - Store log4j configuration under .BuildServer
- TW-14072 - Open unified diff patch for a change in Eclipse plugin
- TW-14145 - Support collecting code coverage for MSTest tests (dotCover)
- TW-14279 - Use filtering chooser for agent requirement type
- TW-14386 - System wide rvm support

## Usability Problem

- TW-388 - Don't show end time of build if it's same as start time
- TW-866 - Display a single change detected in several VCS roots pointing to the same repository as a single change on My Changes
- TW-3229 - Log Viewer: Scroll-To-End If Caret Is at End
- TW-3253 - Show Login dialog if user is not logged in
- TW-3370 - Display time of thread dump request on the page
- TW-3801 - Make Remote run action to be available while logged off from TeamCity
- TW-4343 - Improve MSBuild validation error message
- TW-4415 - Collapsed state for watched projects is not remembered between refreshes
- TW-7416 - Keyboard accessors for TeamCity actions in Commit dialog
- TW-7417 - Rename OK button in Remote Run dialog
- TW-7667 - IDEA plugin: remote run when disconnected from server requires leaving commit dialog
- TW-8035 - Agent explicit selection of compatible build configurations to run should show the total number of configurations selected
- TW-9030 - Not informative message on delayed commit to TFS
- TW-9819 - Need detailed message for failed remote run check-in attempt (TFS access rights case)
- TW-10380 - Refine TeamCity status in Eclipse status bar

- TW-11111 - Note template name on the Project admin page
- TW-11594 - Add Build Dependency Trigger menu does not work well for long configuration names
- TW-11661 - Unify build trigger names
- TW-11716 - Make server URL a link in TeamCity Incompatible Version dialog
- TW-11860 - Text boxes cannot be resized in IE8
- TW-12293 - Overloaded Responsibilities tab
- TW-12491 - Brush up configuration problem presentation when there is no additional information
- TW-12548 - Unexpected build failure
- TW-12619 - "Show test names only" mode should be kept on clicking "Show all ... failed tests" hyperlink
- TW-12892 - Showing test names only hides "First failed in" and makes it impossible to show this information for particular test
- TW-12926 - Disable "open in browser" icon in master details panel in IDEA plugin if build is not selected
- TW-12990 - Add a note to "Custom script" option of command line runner
- TW-13003 - Do not display Tests and Compilation Errors tabs for build results with no according data
- TW-13040 - Choice between Executable with parameters and Custom script should be select box in Simple Runner
- TW-13088 - Mark licenses with maintenance period before current server release date
- TW-13173 - Provide more details on failed tests on the responsibility page
- TW-13177 - Improve user's filter on Responsibilities page
- TW-13256 - It should be possible to view text files right in the browser, without downloading them
- TW-13275 - New experimental "Changes view" should warn about missing "Version Control Username Settings" as the old one did
- TW-13279 - MyChanges: Carpet rows for personal builds
- TW-13287 - MyChanges: separate Carpets of different projects
- TW-13331 - On the new My Changes page it's hard to find a link to a single change page
- TW-13378 - New UI for agent compatible configurations
- TW-13384 - Add platform (32/64) to .Net runners description in build steps
- TW-13428 - Unfriendly message "Unable to find java executable" in Inspections runner
- TW-13437 - Do not redirect to build configuration steps list on saving build step settings
- TW-13461 - Keyboard accessor for Remote Run action in TeamCity menu
- TW-13472 - Filter by path on change log page should offer "more" link at the bottom of the page
- TW-13521 - On opening artifacts tree, automatically expand nodes if it is a single child
- TW-13674 - Build configurations drop down for build problems on my changes page should show project name if configurations are from different projects
- TW-13727 - Run configuration names are case sensitive. A caution about that would be nice.
- TW-13944 - Confusing my changes status data on My Changes (compilation error case)
- TW-13982 - If change affects small number of configurations new my changes page looks strange
- TW-13983 - Idea runner settings on the view settings page: run configurations are not shown
- TW-14002 - Remove "No suggestions found" line for property value field in Agent Requirement dialog
- TW-14017 - Reconsider checkboxes meaning on agent's Compatible Configurations/Run selected configurations only
- TW-14019 - Editing agent's compatible configurations: use checkbox in the table header to select all/none instead of links
- TW-14073 - On wrong authentication token input in maintenance mode, display appropriate message in UI
- TW-14082 - No startup error is reported on missing database and configs from previous version
- TW-14091 - Make branch specification optional (or drop it) for git remote run from Eclipse
- TW-14098 - New My Changes is not suitable for many compatible configurations case
- TW-14101 - Disable agent dialog disappears if page refreshes
- TW-14138 - Change problems summary text is too small
- TW-14139 - Change problems summary text can be wrapped (and reads as part of commit comment)
- TW-14144 - Coverage options should not appear in Visual Studio runner
- TW-14166 - "another error" note is confusing on my changes
- TW-14178 - Confusing changes display on change problems list
- TW-14215 - Allow a relative path for the default backup directory in the 'main-config.xml' file.
- TW-14224 - Describe .Net Coverage options on NAnt and MSBuild runner settings
- TW-14281 - Improve validation message on trying to add a license with expired maintenance period
- TW-14290 - Duplicated line in the build log for a failed test (XML reporter for NUnit case)
- TW-14310 - Paraphrase "Error on step: Entering system maintenance mode..."
- TW-14312 - Do not dump maintenance authentication token if there is no maintenance screen available
- TW-14316 - Improve server startup error message on no database driver found
- TW-14379 - Brush up Swabra text option and descriptions
- TW-14425 - Add label to logging preset control on Diagnostics
- TW-14553 - Improve reporting of free disk space sizes
- TW-14573 - Create configurations action are jumping from left to right on adding the first build configuration
- TW-14617 - Improve "Maintenance authentication token:" in the logs/server stdout
- TW-14674 - Note what runner to use instead of Ipr runner

## Bug

- TW-1598 - No way to escape % used for properties referencing
- TW-3665 - Handle absent runner in build configuration runner settings
- TW-4732 - When connection for SVN server hangs, the build is running forever in "Checking for changes" state
- TW-4987 - Do not execute post-build script if the build failed

- TW-5357 - "Directory is null or not a directory: <null>" agent message
- TW-5540 - Ctrl+Enter does not commit dialog in web under some browsers
- TW-5620 - TFS pretested commit should not commit if active TFS workspace was changed or switched to another one during Remote Run
- TW-6032 - Long time between last "Publishing artifacts" and "Build finished" messages
- TW-6040 - directory.map does not list builds that failed to download artifacts
- TW-6324 - Wrong file is opened in IDE
- TW-6340 - My Changes window shows build configuration only when the build has started
- TW-6846 - IPR runner requires JDK 1.5 set in JAVA\_HOME on agent
- TW-7706 - Make failed personal build dialog more outstanding
- TW-7760 - Review ClearCase logging
- TW-7901 - NT authorization can stop working: jcifs.smb.SmbException: Connection in error
- TW-8253 - Clean unused Git repository clones
- TW-8773 - On opening Remote Run dialog, tree in RR view collapses
- TW-8878 - Not all values on Report Tab settings tab are properly escaped
- TW-8889 - Service messages should not be parsed in the last "Ant output:" message from a failed build
- TW-8980 - Performer label failed with spaces in Build Configuration name
- TW-9051 - Production code contains SQL with parameter values injected into SQL text
- TW-9135 - Starving snapshot builds
- TW-9197 - Backup/restore: detect restore scope from backup file
- TW-9382 - Clearcase Version 1 of file not recognised as a change.
- TW-9407 - Inability to delete empty build checkout directory should not fail the build
- TW-9539 - Nunit Task stopped working when using msbuild with parallel option (msbuild.exe /m:2)
- TW-9574 - Git : Build hangs forever during stage called "Checking for changes"
- TW-9773 - Display only project committers in responsibility user lists
- TW-9906 - Rework mandatory properties approach to use configuration parameters instead
- TW-9931 - TeamCity server doesn't stop by the "runAll stop" command if it was started with wrong jdbc url.
- TW-9933 - Wrong error message on inaccessible repository: "URI not supported"
- TW-9975 - Backup history should display backup finish status (success/error)
- TW-9984 - TeamCity VSS user's ini file (ss.ini) gets reset to temp file frequently
- TW-10126 - Eclipse plugin installation should not warn about unsigned files
- TW-10170 - Unfriendly error message on trying to login from IDEA plugin when server is starting
- TW-10174 - Non consistent icons for successful/failed personal build in right pane of My Changes toolwindow
- TW-10184 - Reduce default .Net build step names (it would be good if we could configure them)
- TW-10269 - Document Maven repository used in Maven artifact trigger
- TW-10279 - Truncated error message for git test connection
- TW-10298 - Default agent name change
- TW-10373 - Can't create Maven project via pom uploading: CM URL is not resolved
- TW-10386 - IPR-based runners do not display path to IDEA project on Settings tab
- TW-10401 - Occasional TransportException: Remote does not have refs/heads/master available for fetch.
- TW-10404 - Improve download server logs individual log page
- TW-10406 - Server logs view links should support middle-click
- TW-10414 - Sort build configurations in template's "used in build configurations" popup
- TW-10489 - Long builds Git checking for changes stage
- TW-10553 - Artifact dependency not downloading files without file extension if the files reside inside directory with dot (".") in the name
- TW-10634 - Single EC2 error can disable a cloud image
- TW-10659 - Local changes view is not refreshed after adding files into version control
- TW-10749 - Moved/renamed files in Performer are marked as edited throughout TC web GUI, but should be added/deleted
- TW-10779 - Check free disk space after sources checkout and after artifacts download
- TW-10856 - Collecting mercurial changes can fail for non-english system locale
- TW-10937 - I'd tried to save youtrack.war on disk, but IE8 downloads it as zip file
- TW-10939 - Ensure git caches are compacted regularly
- TW-10984 - MSBuild problem with .NET Framework 4 RC1 x64
- TW-11109 - Test responsibility actions become disabled after any test responsibility action
- TW-11153 - Long time detecting changes in SVN for R# VCS root
- TW-11158 - User sees link to the group details but clicking the link produces "You do not have enough permissions to modify group roles"
- TW-11163 - Inspections runner cannot find project file in VCS when checkout rules use references
- TW-11291 - Confusing "Unsupported version of Git is detected" message on agent
- TW-11538 - MSBuild build runner/ mono xbuild not finding .net 3.5 assemblies
- TW-11599 - Reference to generated changed file name via predefined system property is considered unresolved
- TW-11602 - Launched EC2 instance can be not recognized by the server
- TW-11613 - Remove stack trace when HSQLDB database is already opened by another process
- TW-11616 - Inspection results are cleaned using artifact cleanup level
- TW-11629 - Unable to run unit tests on agent with MSBuild 4.0 when mixed mode assembly is built against version '\2.0.50727'
- TW-11690 - "Check/Reparse Project" for newly created ipr-based idea project may not work
- TW-11699 - NAnt build runner silently fails without error messages when the build file content is invalid.
- TW-11702 - Service messages protocol should support 0x2028 line terminator
- TW-11720 - Rake runner doesn't detect TestUnit tests if test-unit gem is installed (ruby 1.8.6 case)

- TW-11722 - Selection can jump to the parent node and right pane become empty on My Changes tool window
- TW-11731 - NPE in .BuildServerRunner\$BuildServerWorker.shutdown
- TW-11757 - ClearCase: file removed and re-added with the same name doesn't appear in checkout directory
- TW-11766 - plugin-settings.xml loading error is not cleared after file fix
- TW-11787 - Guest user gets 'You do not have permission' when clicking on "customize" link for a feed
- TW-11790 - No way to reset build configuration reordering
- TW-11804 - TC: 5.1 - It appears the .TRX Import is miscounting the number of failed/succeeded tests.
- TW-11808 - TeamCity fails to start NCover x64
- TW-11817 - Having NCover enabled causes NullRef Exception
- TW-11820 - Deadlock in Java coverage
- TW-11831 - Jabber: Support disabling the Jabber notifier
- TW-11839 - NAnt runner error on LINUX after upgrade
- TW-11870 - .NET Duplicates runner failed to find solution at path ".\AAA\Solution.sln"
- TW-11891 - Exception in IDEA plugin
- TW-11896 - MHT files form artifacts are not opened in browser (no mime type support)
- TW-11898 - Messages of XML reporter can appear as test output within the test block
- TW-11899 - Builds that are finishing during backup creation can be lost
- TW-11906 - Non-existent artifact path does not log a message in the build log anymore
- TW-11914 - Pass password to p4 perforce client not using the command line
- TW-11917 - Improve Compatible Configurations view for an agent (only several configurations are compatible case)
- TW-11945 - Test(s) failed. System.InvalidOperationException : Late bound operations cannot be performed on types or methods for which ContainsGenericParameters is true.
- TW-11960 - Do not start personal build on server, when starting remote run with delayed commit and there is an error during preparing to commit.
- TW-11963 - Create Build Configuration From template pop up has text boxes that extend past the form border when using Chrome browser
- TW-11968 - Build Scheduler Starting Builds on Change
- TW-11995 - Cron trigger that should never trigger a build triggers builds all the time
- TW-11996 - NPE on saving cron trigger
- TW-11997 - No link to documentation from Schedule cron trigger
- TW-11998 - Password for vcs root account corrupted when upgrading to 5.1.1 from 4.5.1
- TW-12029 - Command line remote run tool version is @Plugin\_Version@
- TW-12035 - All subversion-related builds are stuck in "Checking for changes"
- TW-12042 - Recalculate build status (new test count) if this counter differs from data on build results page
- TW-12047 - A build can be triggered excluding last git merge commit
- TW-12048 - Improve git checkout logging on agent-side git checkout
- TW-12052 - Quiet period can be not respected if TeamCity server clock is not synchronized with VCS server one
- TW-12086 - Run custom build from main page occasionally does not work
- TW-12089 - Build Configuration name can be truncated in enforce clean checkout dialog for an agent
- TW-12114 - Avoid double dots in notifications
- TW-12115 - Error in event handler DBDuplicatedRowException: SQL query: INSERT INTO projects
- TW-12122 - Git submodule checkout error: "Commit could not be resolved"
- TW-12134 - Clashing HTML elements ids on edit dependencies page
- TW-12136 - Agent does not connect with DBDuplicatedRowException (several environment variables with diffs in name case only)
- TW-12144 - Swabra plugin should not completely override build status text
- TW-12161 - Cannot run MSBuild under Mono: Unable to find build property system.Mono2.0 required to locate mono instance on the agent
- TW-12171 - Print TeamCity version along with data version on data restoration
- TW-12193 - MSTest - List assembly files - wrong validation rule.
- TW-12200 - Not all tests that are run are being reported.
- TW-12216 - Perforce labeling fails if client mapping contains space: "Wrong number of words for field 'View'"
- TW-12228 - Git checkout with submodules on agent is not supported
- TW-12230 - Excessive logging "Flush queue finished, number of virtual agents assigned"
- TW-12239 - Updating roles on All Users group hangs web UI
- TW-12240 - System.ArgumentNullException in JetBrains.TeamCity.Utils.EnumerableEx.EnumerableEqualST
- TW-12241 - Agent matrix displays wrong data (popup does not match row label)
- TW-12242 - Git submodules fail (permission + recursive submodules case)
- TW-12245 - Add New Schedule Trigger: fails with "Unexpected Error"
- TW-12276 - Projects collapsed state is shared between all guest users
- TW-12291 - Work of responsibilities filter seems broken
- TW-12301 - There is no Application Shell running.
- TW-12303 - NUnit runner should warn if it was started with empty set of assemblies to test
- TW-12305 - MSBuild 2.0 projects not building after upgrade to TC 5.1.2 from 4.5.4
- TW-12308 - Error while applying ReferencesConverter: CDATA cannot internally contain a CDATA ending delimiter (]]>)
- TW-12313 - Do not display ellipsis (...) for a single-line commit comment in Changes view
- TW-12317 - User can occasionally lose all group-assigned permissions on server restart
- TW-12326 - Build agent upgrade fails with NPE in the upgrade.log
- TW-12331 - Attach VCS root list can display VCS root names truncated
- TW-12335 - "Failed to get server UUID for path" in Visual Studio addin
- TW-12337 - Swabra settings are missing from Visual Studio (sln) runner
- TW-12350 - A perforce change can be not detected at all (missing p4 changes command output)

- TW-12369 - Build priorities: Add configuration to priority class dialog is TOO slow in some situations
- TW-12370 - OutOfMemory error after starting Subversion remote run
- TW-12372 - Schedule Triggers show as server timezone, not client
- TW-12398 - Opening Duplicates tab can invoke SVN externals collections in several threads
- TW-12410 - SVN checkout on agent fails with "XML document structures must start and end within the same entity."
- TW-12429 - Assertion on logger initializing
- TW-12435 - JavaScript error: "BS.ServerLogs is undefined" on Server Logs
- TW-12436 - Do not include full server file path into view server log link
- TW-12469 - Certain kinds of sources checkout failures are not reported as "cannot start" errors
- TW-12489 - EC2 profile can switch to error state and never recover by itself after intermittent database connection failure
- TW-12498 - Do not dump stacktrace into the build log on artifact download error
- TW-12502 - Build history clean-ups keep server offline for hours (too many builds to cleanup with clean\_artifacts level)
- TW-12511 - Incorrect executable (added parameters into the same field) for command line runner can result in cryptic error
- TW-12515 - NPE in git fetch over ssh in separate process
- TW-12526 - can not add vcs build trigger
- TW-12527 - "The path is not of a legal form" exception in Visual Studio addin
- TW-12529 - Brush up build failure messages on checking for changes error
- TW-12532 - This page is about MSTest support for VS 2005, 2008 and 2010
- TW-12542 - Failed to collect pending changes in Perforce. Error: File couldn't be 'resolved' and 'unresolved' in a moment.
- TW-12549 - Automatic recover from "Failed to perform checkout on agent ... .git/index.lock!: File exists" error
- TW-12550 - "Cannot start build" error is not reported for "Failed to create agent temp directory" error
- TW-12552 - UI is displaying obsolete information
- TW-12563 - Create Cloud Profile location is saved as 'EU West' when selecting 'US West'
- TW-12582 - Priorities for build queue version should be specified
- TW-12585 - Mono detection from custom location not working
- TW-12601 - On server restart, cloud agents can be terminated due to idle timeout while they are running builds
- TW-12606 - Indicate manually submitted change of a pre-tested commit in UI and logs
- TW-12621 - Make "view details" link on Configuration error stripe stand out
- TW-12623 - Spelling Error on TFS Settings page
- TW-12629 - Switching Framework-Version inbetween two msbuild-Executions (NAntContrib)
- TW-12643 - Full file name tooltip appears right under the mouse making link unable to click
- TW-12646 - JS error occurs on the project change log
- TW-12656 - Error message: Cannot read property: pendingChanges
- TW-12663 - Hanged build when error creating tar archive
- TW-12701 - Perforce on agent may not delete removed files
- TW-12727 - User with Project Administrator role can't create project report tab: access denied exception is thrown
- TW-12757 - Error creating patch with no updates ("no differing files" error in Perforce 2010)
- TW-12780 - Can create Retry Build Trigger with negative value
- TW-12782 - undefined method `print\_tag\_limit\_warnings' for #<Teamcity::Cucumber::Formatter:0x211e40> (NoMethodError)
- TW-12785 - Mercurial plugin launches hg without inheriting environment from the parent process
- TW-12793 - Eclipse: NullPointerException in git integration
- TW-12794 - Incorrect date sorting in My Changes view
- TW-12795 - Build "Failure" after upgrading to 5.1.2 (build 13430) from 4.0.2
- TW-12808 - Invalid HTML for graphs
- TW-12811 - Duplicates finder (.NET): crashes with out of memory - running as 64-bit process?
- TW-12812 - LDAP user/groups matching should be case-insensitive for LDAP DNs
- TW-12813 - Inspection build crashing, agent doesn't notice
- TW-12857 - .NET duplicate finder fails due to long names
- TW-12900 - Brush up text alignment in configuration error red box
- TW-12902 - Linux agent disconnect after exception
- TW-12909 - InternalError service message does not lead to build failure
- TW-12911 - VS add-in version is 'unknown' in VS 2010
- TW-12928 - A bottom build in a chain may be not run in a personal builds with mixed snapshot reuse options
- TW-12934 - Configuration parameter added with system. prefix is visible in UI and in build as system property, but is not accessible via internal API
- TW-12936 - Unnecessary "Build preparation done" message in the build log
- TW-12940 - Do not print stacktrace on known VCS errors into the build log
- TW-12943 - Brush up missing executable reporting for the command line runner
- TW-12952 - Sort users by their names (ignore case) in assign responsibility dialog in IDEA plugin
- TW-12962 - Add blocks into build log for each build step/runner
- TW-12971 - When surefire reports are not found it adds 3 seconds per a test
- TW-12973 - "Include canceled builds" checkbox hides "failed to start" builds
- TW-12977 - Some JUnit tests are reported without suite
- TW-12982 - Build log highlights directories as links but they do nothing on click
- TW-12983 - Not all files are highlighted in the build log (/build.xml case)
- TW-12992 - Cannot update Eclipse plugin: Cannot complete the install because one or more required items could not be found.
- TW-12993 - Watched projects list titles looks broken

- TW-12994 - Rework right pane of Watched Projects
- TW-12995 - Toolbar brush up for Watched Projects
- TW-12996 - Make server URL not standing out in Watched Projects/Changes views
- TW-12997 - TeamCity plugin help indexing issue
- TW-13001 - Review tooltip over Watched projects icon in status bar
- TW-13002 - Adjust default coverage lines highlighting so that it can be turned as background
- TW-13009 - Exception on git submodule update on windows
- TW-13017 - Improve coverage percentage numbers formatting
- TW-13018 - Sometimes list of build configurations with coverage is empty
- TW-13019 - On empty list of build configurations with coverage, display helper text detailing the reason
- TW-13020 - Display coverage data information
- TW-13025 - Error migrating to EAP 15311 from 5.1.3 release
- TW-13026 - Pre-tested commit into Perforce 2005 failed
- TW-13030 - Erroneous Configuration problem found (view details) displayed for all ClearCase build specs
- TW-13034 - An ordered test (mstest) which contains ordered tests (aggregate tests) doesn't report problems in the child ordered tests lists and the tests are reported as Ok?!
- TW-13036 - Broken layout of filtering controls in IE8 on Change log (new filtering drop down)
- TW-13046 - TFS checking for changes/checkout on server is slow (starts too many processes to process one root)
- TW-13059 - Some Parameters not expanded for Artifact paths.
- TW-13060 - Maven builds fail with an exception from the Maven Watcher
- TW-13061 - jetbrains.buildServer.TeamServerSummary should not contain information about archived projects
- TW-13067 - Notifier is outdated in 6.0 EAP (build 15311)
- TW-13069 - HTML email notification does not escape change comment
- TW-13070 - Reference to agent-defined configuration parameter is listed in "Configuration Parameters" with red "<value is required>"
- TW-13080 - TFS one-process reuse may stop working
- TW-13082 - Artifacts chooser in artifact dependencies inserts incorrect path for files within directories
- TW-13083 - Extracting a template from runner settings page renders broken page
- TW-13085 - NumberFormatException: For input string during build starting
- TW-13091 - RuntimeException: Cannot load TeamCity runtime properties if properties file is missing
- TW-13100 - OS temp directory is used instead of "../temp" when tempDir is not specified in buildAgent.properties file
- TW-13101 - Loading build log by IDEA plug-in freeze UI
- TW-13106 - Backup of build 15311 could not determine version of database in HSQL DB
- TW-13108 - Javascript error on backup page: can't change backup options
- TW-13109 - Provide a friendly URL for downloading single agent log file
- TW-13113 - Java written errors on build agent start under Windows7 with enabled UAC
- TW-13115 - Improve unsupported VCS type message on creating Maven configuration from pom
- TW-13122 - StackOverflowError during inspection build
- TW-13124 - Improve Jabber/email disabling controls
- TW-13129 - Maven project inspection causes thread blocking problem if required to resolve slow SVN externals references
- TW-13130 - Display responsibility status in status bar without adding one more icon
- TW-13131 - Plugin-added environment variables are not passed into process run by command line runner
- TW-13133 - DotNet Coverage does not work if multiple runners are used.
- TW-13134 - DotNet Coverage uses .NET v2.0 x86 in spite of coverage options
- TW-13138 - Error page for changes page of a build under MS SQL: Argument 1 for @NotNull parameter of MapParametersProviderImpl.put must not be null
- TW-13147 - "Unexpected Error" when user click on myChanges
- TW-13148 - Naming of build runners
- TW-13155 - Emma coverage suites are not loaded in IDEA plugin
- TW-13163 - New file on CVS branch not caught
- TW-13185 - TeamCity failed to register Partcover 4.0 COM server
- TW-13203 - NPE from PersonalBuildStatus.getTooltipText
- TW-13204 - NLS missing message: ConnectCoverageAction\_hide\_name in: jetbrains.teamcity.coverage.ui.messages
- TW-13211 - Checkout rules editor is confusing when lines are wrapped
- TW-13217 - Double tooltip on changes view in Chrome
- TW-13220 - Getting error loading "My Settings & Tools"
- TW-13221 - Lack of JDBC drivers causes a strange error while running maintainDB
- TW-13223 - MaintainDB tool doesn't migrate database correctly
- TW-13227 - Exception on agent logs tab
- TW-13233 - Highlight selected configurations on Agent's Compatible configurations in manual mode
- TW-13245 - The same agent can appear twice
- TW-13246 - Sort properties on Agent Parameters lexicographically
- TW-13254 - Wrong issues from Jira are detected by TeamCity
- TW-13255 - New filtering combobox accepts selection on clicking outside, while it should not
- TW-13262 - Exception on changes page
- TW-13269 - Remove db.jar from the web application root
- TW-13274 - Do not show empty personal change for personal custom builds in UI
- TW-13277 - Commit from VS add-in into Perforce failed, if comment is like 'sms\nsms: sms'
- TW-13278 - New MyChanges: wrong icon for a personal build that has no failures but has not finished yet
- TW-13289 - minor correction to migration docs
- TW-13301 - Notification is sent to a user who marked some tests as fixed

- TW-13306 - Tooltip about responsibility is shown on hovering any build configuration
- TW-13311 - Vault MoveTo and ShareTo are processed incorrectly
- TW-13317 - Mercurial URL must be properly escaped
- TW-13320 - IllegalArgumentException in IPR runner
- TW-13322 - NoSuchMethodError from org.jfrog.teamcity.agent.ivy.IvyBuildRunner on agent startup
- TW-13326 - Unable to update subversion repositories if externals are removed
- TW-13330 - git fetch fails with unspecific error
- TW-13332 - Custom build tabs display file download dialog
- TW-13333 - JavaScript error BS.EditArtifactDependencies is undefined on reports tabs configuraiton
- TW-13342 - VS plugin is missing
- TW-13343 - "Download all" link for artifacts uses server address from settings, not from the request
- TW-13350 - Changes that are failure may become normal for a while
- TW-13355 - email notifier: Test connection complains when having a display name on the from email address
- TW-13358 - Add timezone note on scheduled trigger configuration
- TW-13359 - TeamCity must correctly parse versioned paths in ClearCase
- TW-13364 - TeamCity ignores aborted tests - Doesn't Report Error
- TW-13368 - Cannot view server log in admin UI
- TW-13371 - Build step settings might be saved into another step when edited in sibling tabs in a browser
- TW-13385 - [Execution timeout] may be set to build status by mistake
- TW-13392 - Incorrect scroller position on adding new build step
- TW-13393 - "displayWarning is not defined" JavaScript error on adding XML report into several build steps
- TW-13397 - Error starting second step of two-step build should not mark build as "Failed to start"
- TW-13400 - When a same test runs and fails 100 times in one build, for "Change problems" this is treated as failure in 100 builds
- TW-13422 - SourceGear Vault changes date is one month in the future
- TW-13433 - TeamCity plugin to IDEA should have accelerators in main menu
- TW-13434 - Exception in server logs
- TW-13436 - VCS error can be not displayed on VCS roots list page for build configurations that occur twice on the page
- TW-13440 - Open in IDE from inspections results does not position the opened file on the line number
- TW-13442 - TeamCity does not report error on missing trx file
- TW-13443 - Editing VCS root for a single configuration fails to attach the root to the configuration if the configuration uses template
- TW-13448 - Prevent recursive parameters resolution
- TW-13456 - Cannot apply patch downloaded from TeamCity (spoiled Unicode symbol case)
- TW-13467 - Confusing message in teamcity-server.log on backup startup
- TW-13474 - Project Change Log does not have notes on the number of changes actually searched
- TW-13475 - Error occurred while starting build: Build promotion ... cannot be associated with build ..., because it is already associated with build: ...
- TW-13480 - Click on "More" link on "My changes" page sometimes overwrite shown changes with new
- TW-13481 - Incorrect Java paths are reported for our FreeBSD agent
- TW-13482 - Statistics page prints out garbage text between graphs (apostrophe in build status text case)
- TW-13486 - Magic carpet changes it's size on expand collapse on chrome
- TW-13488 - Copying a project with templates reuse can result in original project template depending form the copied project
- TW-13490 - IncompatiblePluginError is displayed as not processed error in IDEA exception reporter
- TW-13492 - "Failed to process some PMD reports" message shown instead of real build error
- TW-13494 - Artifact dependencies can occasionally download artifacts from personal builds (changing build number case)
- TW-13496 - Can't type "p" in drop-down: projects popup is opened
- TW-13503 - Failed to start build due to SocketTimeoutException: Read timed out should be reported as "Failed to start" error
- TW-13505 - Internal runner errors should result in "Failed to start build" build status
- TW-13513 - MyChanges: the carpet is green while the change is red
- TW-13515 - My Responsibilities tab should support F4
- TW-13518 - Improve reporting of unsupported git authentication for agent-side checkout
- TW-13525 - Truncate agent log tail on newline
- TW-13535 - VS add-in version cleared from registry when use 'Change...' options of installer
- TW-13538 - JavaScript error: this.labels is undefined on Dependencies page with snapshot dependency defined
- TW-13546 - [REST] Add TC user info to Change attributes
- TW-13550 - I want to mark failed tests as fixed in IDEA plugin
- TW-13558 - IDEA plugin warning: Access to realized (ever shown) UI components should be done only from the AWT event dispatch thread
- TW-13561 - Responsibility notification has wrong title in IDEA notifications (Support all event types in IDE notification messages)
- TW-13579 - Execeptions in log when building .net with msbuild ("Failed to scan assembly")
- TW-13587 - Special user-friendly reporting for missing .iml of IDEA project
- TW-13589 - Rename URL for maintenance mode
- TW-13590 - Cannot start server after first start (missing data version in main-config.xml file after initial data creation)
- TW-13600 - Buttons are aligned incorrectly
- TW-13606 - Remote Run fails silently in case of underlying VCS support error in IDEA
- TW-13609 - Make usage statistics keys shorter
- TW-13610 - Empty artifacts are displayed for a build with only hidden artifacts

- TW-13611 - Total size of artifacts counts hidden artifacts even when they are not displayed
- TW-13612 - Create messages file with new extension
- TW-13613 - arrowCollapsed.png not loading
- TW-13616 - %teamcity.build.checkoutDir% is not resolved in Edit Artifact Dependency / Destination path
- TW-13626 - Plugin does stops updating from server randomly
- TW-13632 - Use default run configuration settings for tests re-running
- TW-13639 - Compatible Agents number is not updated on changing agent requirements in the template that the build configuration is using
- TW-13642 - Module with no tests fails Maven build (Surefire reports watcher fails)
- TW-13673 - "IntelliJ IDEA Project" build runner doesn't start JUnit build configuration when "All in Package" is selected and no package is defined
- TW-13675 - Error running command line with custom script: "custom\_script.cmd : file not found"
- TW-13677 - Working directory (teamcity.build.workingDir) is not resolved in global build settings
- TW-13681 - Incorrect data in UI on unable to upgrade server due to not enough database user permissions
- TW-13691 - teamcity/postgres error "Unexpected exception occurred during message processing"
- TW-13695 - In the "Version Control Username Settings", link "Add new VCS username" is inoperative
- TW-13698 - Issue Log - 'Show only resolved issues' seems to have the opposite effect (Bugzilla)
- TW-13725 - TeamCity throws "Cannot replace a directory from within" when a non-existent external is created
- TW-13732 - Unable to restore backed up TeamCity
- TW-13752 - AssertionError on server startup
- TW-13754 - Typo in parameter name passed to java.exe - teamcity.configuration.properties.file
- TW-13756 - Configurations steps in chrome and firefox are overlapping
- TW-13760 - Coverage in Maven runner does not work if checkout directory contains spaces
- TW-13762 - Fix assign responsibility dialog layout
- TW-13768 - Mercurial connection problem
- TW-13775 - IDEA Project runner: "Cannot find java executable, will use current java" - for each run configuration
- TW-13777 - Maven build fails when run from space-named directory (e.g. C:\Program Files\...)
- TW-13778 - Scrollbar obscures input value in Add Property dialog
- TW-13787 - After updated to 15509 from 15400 we are seeing errors when writing to the build log
- TW-13788 - Do not show personal builds with no changes on My Changes page
- TW-13789 - Teamcity plugin for IDEA locks UI
- TW-13793 - 'Enter' key on the project name in All projects popup does not work
- TW-13804 - Exception on Compatible configurations tab when agent disconnected
- TW-13808 - Build failed because of error while applying patch, but there were no problems shown on MyChanges page
- TW-13815 - Changes page carpet layout is broken on chrome
- TW-13834 - Cannot edit project settings with IE 6
- TW-13864 - Priority classes disappearing
- TW-13881 - Resolving artifact dependencies failure doesn't shown as problem on MyChanges page.
- TW-13883 - Exception in queue reordering plugin
- TW-13914 - Agent running as service fails to upgrade with cryptic error in the logs (probably not enough user permissions case)
- TW-13915 - Installer typo: "Agent Properties was saved..."
- TW-13921 - Failed to load .chm file artifact by IE
- TW-13922 - ConcurrentModificationException on usage statistics page
- TW-13935 - Cannot run remote run via slow connection: timeout error occurs
- TW-13939 - Help link points to TCD5 documentation in 6.0 VS add-in
- TW-13954 - Two dialogs are opened on server version incompatibility
- TW-13962 - NoRemoteRepositoryException when checking out from git-daemon using user paths
- TW-13965 - Fix spelling in error message
- TW-13966 - NUnit and MSTest separation from sln runner causes tests not be executed (path relative to sln case)
- TW-13978 - TC got in stuck if the database URL contains a wrong host name.
- TW-13979 - @NotNull method jetbrains/buildServer/serverSide/impl/InaccessibleTemplate.getLabelPattern must not return null
- TW-13981 - Remove "Save Changes" button from Compatible Configurations tab if current policy is "Run all compatible..."
- TW-13984 - Backup UI: the presets selector is not disabled when backup is running
- TW-13989 - teamcity plugin for eclipse does not track change to git project
- TW-14003 - Exception on my settings page
- TW-14005 - Rework names on Server Statistics tab
- TW-14007 - Maintenance pages must not be available after the server startup
- TW-14008 - Error pages functionality is no longer works If an unexpected exception occurred during server startup
- TW-14011 - Cannot upgrade from 4.5 to build 15611
- TW-14012 - Do not allow to open maintenance mode pages from localhost by default
- TW-14014 - "Delete Project" action from the "more" pop-up does not refresh the page
- TW-14015 - "Discard your changes" browser confirmation opens together with Add configurations dialog
- TW-14024 - Incorrect build tabs display when custom report tabs have numeric names
- TW-14025 - Cannot edit Report tab in web if tab name has quotes (JavaScript error)
- TW-14031 - Current project is not selected in Copy Project dialog
- TW-14040 - Cannot parse PMD CPD report: "is not parsable by PMD CPD parser" (Invalid encoding name "Cp1252" case )
- TW-14041 - No file content in duplicates report by PMD CPD
- TW-14046 - When VCS root is saved as a copy, the original root remains attached (using template case)

- TW-14053 - Duplicated path in "The following paths do not contain NAnt:" messages of the build log.
- TW-14054 - Can't start fresh TeamCity with MySQL (errno: 139)
- TW-14056 - Brush up ClearCase agent logging on agent start
- TW-14058 - Confusing "Can run on" info in the queue for build with "Run build on the same agent" option
- TW-14059 - Occasional no tooltip text for a "Time to start" value in the build queue
- TW-14060 - Changing agent in custom run build dialog switches changelist selector
- TW-14062 - No builds are starting while there is compatible agent "deadlock" with "same agent " setting
- TW-14069 - Service Message escaping behaviour differ from documentation
- TW-14078 - version.txt in backup created on server start contains data version of the server, not database
- TW-14079 - dotCover report generator is not able to find sources even if they present in the build checkout directory
- TW-14081 - Maintenance screen should display startup error (if any)
- TW-14083 - Report errors that occurred during backup on server upgrade
- TW-14086 - UnsupportedOperationException on opening Changes tab for a build
- TW-14095 - [TeamCity Addin] Errors in labels in the TeamCity Subversion Options dialog.
- TW-14102 - Build status is displayed truncated in builds of a build configuration
- TW-14107 - Log file grows fast when using Perforce as VCS provider in VS add-in
- TW-14116 - Run on same agent does not consider directly assigned agent for a depending build configuration
- TW-14124 - Old parameter values are shown in customize dialog for remote run
- TW-14127 - dotCover should exclude JetBrains.\* from coverage report by default
- TW-14132 - Tests-Tab does not show all tests (MSTest Runner)
- TW-14136 - No noticeable title for new test failures on Change Details/Failed tests page
- TW-14137 - Red problem summary text might be not displayed on node collapsing
- TW-14149 - Documentation page "Backing up TeamCity Data" for TCD5 contains inaccuracy in "--backup-file" parameter description
- TW-14150 - Vault VCS plugin fails to checkout undeleted file
- TW-14171 - [TeamCity Addin] Irrelevant tooltip for the Apply icon in the My Changes tool window.
- TW-14181 - Maven Watcher fails to gather dependency artifacts information on "install" goal projects built with Maven 3
- TW-14188 - dotCover plugin is not working (missing temp directory case)
- TW-14189 - TeamCity doesn't respect ~/.ssh/config for some operations (e.g. submodules checkout)
- TW-14191 - Do not show colors legend if there are no changes to show
- TW-14193 - TeamCity installer under Windows 7 might result in "This program might not have installed correctly"
- TW-14195 - Cancel on runner settings redirects to Project page
- TW-14197 - [IDEA plug-in] 'Open in Browser' context menu action navigates to incorrect web pages.
- TW-14198 - Manual commit after failed pre-tested commit displayed with hourglass icon even after build is finished
- TW-14201 - Missing version.dat file when upgrading from pre-6.0 TeamCity versions does not report any error on startup
- TW-14204 - Remove backup warning note from TeamCity Windows installer on upgrade
- TW-14208 - VS addin: "Open in web" action navigates old My Changes page
- TW-14219 - java.lang.NoClassDefFoundError when trying to execute a gradle build
- TW-14225 - Drop not used parameters from converted .Net runners
- TW-14229 - JS error on my changes page
- TW-14231 - Missing closing bracket in Run Custom Build Dialog
- TW-14232 - Prevent 'More' link on MyChanges page from reentrancy
- TW-14249 - Error occurred in IDEA after the open patch in IDE
- TW-14253 - Property completion icons are not repositioned on dialog layout change
- TW-14254 - Command line runner reports wrong error message for non-existing executable with spaces in path
- TW-14261 - Produce user-friendly message on inability to find IDEA project
- TW-14262 - Duplicating error message in build log
- TW-14263 - Build is considered successful despite java hasn't been able to start
- TW-14268 - Invalid link to TeamCity help from empty Statistics page
- TW-14277 - Correct the "permissions restricted" message on the Dependencies screen
- TW-14278 - MyChanges: Carpet is lying about the # of failed configurations
- TW-14280 - 'Move' button does not work in build configuration administration page
- TW-14301 - Copy configuration action attached copied configuration to another project
- TW-14302 - Wrong runner editor is shown after save click if I change runner type and some parameters
- TW-14303 - MSBuild runner - Using UNC path for "Build File Path" is no longer working
- TW-14304 - Parametrized tests are wrongly parsed in tests view
- TW-14307 - A build with artifacts to publish has two nested "Publishing artifacts" blocks
- TW-14333 - Unable to build projects with client side checkouts when VCS root is Clearcase
- TW-14338 - "VCS problem" red strips are mixed when there are more than one project on page
- TW-14339 - Exception from BaseTCHighlightingPass
- TW-14345 - Do not provide "Restore" button without functionality on TeamCity Maintenance Screen
- TW-14346 - Make "Create new database..." usual button without confirmation on maintenance screen
- TW-14348 - Paraphrase database connection description on maintenance screen for default database settings
- TW-14350 - Remove Gradle Worker N from the test name
- TW-14365 - No error in the server log on startup error ("TeamCity Data Format is Newer" case)
- TW-14367 - No "Updating sources" block in the build log
- TW-14378 - TeamCity ClearCase adapter and directories with name 'main'
- TW-14388 - Exception on startup
- TW-14394 - Server startup error displayed on maintenance screen is not logged into the log
- TW-14398 - "Express backup has cancelled" message on backup during server upgrade

- TW-14403 - Duplicate fragments highlighting becomes inconsistent after editing
- TW-14416 - Users with no log4j configuration can not get authentication token to enter maintenance mode
- TW-14417 - IE8 Server configuration page Javascript error on save
- TW-14433 - My Responsibilities tab toolbar weird behaviour on mouseover
- TW-14436 - IDEA plugin seems treats each test failure as comparison failure and offers a link "click here to view difference"
- TW-14437 - Exception is thrown on attempt to re-run failed tests from IDEA 9.0.4
- TW-14438 - IDEA plugin does not work with IntelliJ IDEA 8
- TW-14439 - Projects popup moves page scrolling on opening
- TW-14440 - Log tab does not work in IDEA 8
- TW-14441 - IDEA plugin incorrectly enables coverage in IDEA if include patterns consist of several lines
- TW-14442 - Invalid agent temp directory (tempDir) makes agent unable to start while it was ignored in 5.1.x
- TW-14444 - Linux cloud agent name contains IP instead of image name + instance id
- TW-14445 - Debug cloud logging is overly verbose
- TW-14455 - Responsibility dialog may hide on project responsibilities page
- TW-14458 - Invalid JVM options in documentation when use Tomcat 7
- TW-14464 - No mapping found for /teamCity/index.html in jetty 6.1, 7.2
- TW-14467 - 'Create Maven build configuration' link works in case there are more than 20 build configurations created in Professional mode
- TW-14468 - JavaDowser fails on Mac
- TW-14473 - Project Developer has access to "Agent Logs" tab
- TW-14475 - Fix link to Configuring+Authentication+Settings online documentation.
- TW-14476 - Visual Studio 2003 runner settings can be rendered with table layout broken
- TW-14482 - Agent list width in Clean Checkout Dialog
- TW-14484 - E-Mail Keeps Turning off (Pause Notifier keeps getting checked)
- TW-14486 - TeamCity Incompatible Version dialog contain html code
- TW-14487 - Search result reordering broken in Chrome
- TW-14490 - Error in JSP
- TW-14491 - Navigating Projects menu with keyboard arrows in IE8 causes the whole page to scroll
- TW-14492 - NPE on My changes page
- TW-14496 - Command line runner with custom script does not work under Mac OS X (wrong newlines in script case)
- TW-14501 - yjpagent.dll in agnet distribution
- TW-14504 - "Test ignored" XML test reporter messages are not hidden from build log
- TW-14508 - NPE during backup on upgrade
- TW-14511 - TeamCity plugin (build 15724) doesn't show build log in RubyMine 2.0.2
- TW-14525 - NPE in Git's Preference page if Git Team Provider is not installed
- TW-14527 - Select with udf doesn't work inside a modal dialog (firefox, chrome)
- TW-14531 - "IntelliJ IDEA Project" runner doesn't understand \$MODULE\_DIR\$
- TW-14546 - Opera: My Changes: when navigating changes with keyboard the window is scrolling
- TW-14558 - TeamCity fails on startup under Tomcat 7
- TW-14563 - A configuration using template from another project can lose own VCS roots on main-config.xml change
- TW-14566 - Download all stops on the first inaccessible file
- TW-14568 - CVS: "Delayed Commit" does not commit files in newly created directories
- TW-14571 - Attach to template action may change scope of VCS root but does not persist it on disk
- TW-14572 - Inspections and duplicates runners with pom.xml create new processes then can run after build finish
- TW-14576 - Failed to parse report with NUnit parser (wrong CDATA parsing case)
- TW-14577 - Dump XML test reporter messages into the log in verbose mode
- TW-14579 - My Changes keeps reacting on keyboard when dialog is shown
- TW-14582 - Re-run failed tests crash with exception "' is an invalid character in a configuration name"
- TW-14584 - Starteam UI shows ' instead of quotation marks under IE8
- TW-14586 - IE7/8: Add/Edit Trigger: property chooser icons out of their places
- TW-14595 - Exception in inspections highlighter
- TW-14597 - Server sartup maintenance pages does not work with jetty 6.1
- TW-14604 - VCS server log does not have any INFO messages on in progress checking for changes operations
- TW-14606 - Git should not start several fetch processes for collect/fetch changes from same repository
- TW-14607 - Too verbose SVN checking for changes logging
- TW-14615 - "Run tests locally" detects JUnit4 tests as JUnit3
- TW-14616 - Clean free space on build start may clean current build's checkout directory
- TW-14628 - Clicking on help icon for build or config parameter <value is required> disables whole page
- TW-14629 - Completion fails for agent requirement parameter name starting with %
- TW-14657 - Overly verbose cloud debug logging (canStartNewInstance is false)
- TW-14663 - Swabra kills file locking processes even if set to report them only
- TW-14671 - Do not dump maintenance authentication token if there is no maintenance screen available (normal start case)
- TW-14673 - Do not dump "Cannot meet free disk space requirement" several times int he build log
- TW-14695 - Wrong "Run configuration with name ... was not found" for Ipr file with several Run Configurations
- TW-14705 - Brush up database statistics on server statistics page
- TW-14707 - Could not start TeamCity without database (internal database case)
- TW-14749 - Specifying RVM interpreter as build feature doesn't work
- TW-14755 - Custom script build runner does not respect newlines in script

## Exception

- TW-9601 - VcsUserFriendlyException : Error during input checking
- TW-11816 - Could not load type 'Microsoft.TeamFoundation.Client.TeamFoundationServerBase' from assembly 'Microsoft.TeamFoundation.Client, Version=10.0.0.0, Cultu

- TW-14250 - exception in IDEA plugin
- TW-14293 - Path to Svn.exe is empty
- TW-14583 - Unversioned change again!

## Performance Problem

- TW-1219 - Large file number in artifacts makes artifacts tree displaying too slow
- TW-9867 - Slow mapFullPath for Git changes (slow personal change files display)
- TW-12039 - LDAP Synchronisation queries for all LDAP Users
- TW-12273 - Speedup Perforce getCurrentVersion
- TW-12647 - Filter by path on the project change log page works too slow and eats too much memory
- TW-12888 - Slow first loading of Agent details page (compatibility is calculated on loading agent details)
- TW-12925 - Agent logs tab is opening for too long
- TW-13327 - VS add-in sometimes recollect local changes when Local Changes tool window is not visible
- TW-13417 - Low server performance on several RSS requests (retrieving build short statistics case)
- TW-14075 - VS 2010 Add-in takes an age to initialize the check-in window.
- TW-14085 - VS 2010 check-in window very slow to type when chosen a work item.
- TW-14270 - AuditLogDataCleaner step can take several hours during clean-up

## Cosmetics

- TW-2520 - Ugly login error
- TW-5818 - Too long build status text can cause every history table line wrapping
- TW-10237 - UI problem when IDE plugin fails to connect to buildserver
- TW-11650 - Remove unnecessary spacing in Create Build Configuration Template dialog
- TW-11849 - Typo on "Properties and Environment Variables" page.
- TW-12004 - Extra letter in roles popup
- TW-12225 - Unnecessarily long configuration details field in IDEA Plugin
- TW-12263 - Builds tree in MyChanges view could be shown empty.
- TW-12477 - Fix spelling in MSTest settings
- TW-13260 - Remove "(JetBrains)" from the name of the TeamCity git plugin
- TW-13271 - IDEA plugin: please fix remote run dialog layout
- TW-13507 - Too tall Today/Older nodes in My Changes tree
- TW-13528 - Rename build runners blocks in the build log
- TW-13676 - Set project name to window title on My changes page if a project tab is selected
- TW-13776 - Hide 'view all problems' link, if there is no problems yet.
- TW-13923 - Increase left padding of expanded arrow on MyChanges page
- TW-13924 - Increase paddings near 'problems' label on MyChanges page
- TW-13934 - TeamCity Add-in name is too long: spoiled VS splash screen
- TW-13950 - Rename Help-related menu items in TeamCity add-in VS menu
- TW-14051 - The option is incorrectly specified as a required one on the Create TFS VCS Root page
- TW-14114 - Command line runner settings on Settings tab are not aligned
- TW-14115 - Use "Step" in the Settings of a multi-step build configuration
- TW-14266 - Visual Studio Add-in Downloadlink shows wrong tooltip
- TW-14332 - Review alignments at maintenance mode pages
- TW-14400 - Swabra UI requires minor polishing
- TW-14526 - Fix location of 'Hide' link on XML Report Processing -> FindBugs settings area
- TW-14587 - Build step runner name is misaligned (IE8)
- TW-14592 - Rename "Rerun test locally" to "Run test locally"
