

IDEA 12.1 EAP

What is Early Access Program

We at JetBrains believe that making tools for developers should greatly involve listening to developers. Our Early Access Program lets development community closely participate in discussions devoted to IntelliJ IDEA and influence development planning, from early stages onwards. Early Access Program allows you to try pre-release versions of our software to evaluate features that will be added to the next release.

Be Careful

It is important to distinguish EAP from traditional pre-release software. Please note that the quality of EAP versions may at times be way below even usual beta standards.

What is IntelliJ IDEA 12.1?

IntelliJ IDEA 12.1 is minor feature update version of IntelliJ IDEA 12, released at 3rd of April 2013. IntelliJ IDEA 12.1 is a free update for users of IntelliJ IDEA 12.

Download IntelliJ IDEA 12.1

IntelliJ IDEA 12.1.7 has been released. Please download it from <http://www.jetbrains.com/idea/download/>

Download IntelliJ IDEA 12.1 Community Edition

IntelliJ IDEA 12.1.7 has been released. Please download it from <http://www.jetbrains.com/idea/download/>

Plugin Development Kit: Since the open-source Community Edition was released, we no longer provide the plugin development kit as a separate download. Please see <http://www.jetbrains.org/display/IJOS/Writing+Plug-ins> for instructions on setting up a plugin development environment.

Major changes in IntelliJ Idea 12.1

- Initial code-insight in JavaFx .fxml files
- In-editor preview of the first autopopup completion variant
Can be accepted by Enter or Tab, not by dot (Ctrl+Dot works instead), space and other chars
- Completion can be used to override/implement methods in Java
- Support of Gradle wrapper
- Improved outdated libraries processing for gradle-backed projects
- Configurable Gradle home location

- Byte Code Viewer available in Community Edition
- Initial support for new graph inference available in latest java 8 lambda builds (> b. 75)
- Spring: mixed filesets (annotation/XML), "parent" dependencies across modules, highlight circular dependencies, configuration UI improvements
- Spring: smarter "create unresolved bean" quickfixes (XML)
- Spring Web Flow: JSP: smarter variables resolving/performance enhancements, support index access notation for <binding>
- Plugin Development: "Register extension" quickfix on an unused class that implements an extension point interface, to put correct registration into plugin.xml automatically
- Diff: "Go to file" action in diff dialog
- Git: improved Git executable detection on Windows; multiple usability fixes in cherry-pick.
