

Calcutta EAP (build 8111) Release Notes

This EAP build is a move towards 4.0.1 bugfix release, so there are only fixes in minor improvements included.

- Search improvements: search term highlighting, displaying build comment and pin status in the search results
- Improvements in project page report tabs configuration
- Support for build artifacts larger than 2Gb
- Several ClearCase issues fixed (detecting more changes/not detecting changes with some configurations)
- Performance improvements
- Miscellaneous fixes
