

Eluru 6.5.6 (build 18130) Release Notes

Feature

- [TW-15970](#) - Support configuration parameters in custom run dialog

Usability Problem

- [TW-19277](#) - Improve logging on authentication token input

Bug

- [TW-12688](#) - Idea Plugin: Coverage: should load last available coverage data
- [TW-13822](#) - Failed to commit pre-tested commit: no revision for the current file
- [TW-14600](#) - Duplicates runner .NET should remove it's report.xml files at the end
- [TW-15282](#) - Cucumber Formatter blows up with Cucumber 0.10.0
- [TW-15346](#) - Sections on server statistics are not ordered
- [TW-15613](#) - Current choice of the list can be not highlighted on first opening the list
- [TW-16534](#) - Inspections / duplicates and coverage "Show in Editor" action invoked from the IDEA plugin does not update summary
- [TW-16727](#) - Muted tests are opened in IDE on 'Open Failed Tests' action.
- [TW-16801](#) - Hide configuration icon is shown for guest user on overview page
- [TW-17462](#) - Cannot perform commit, however version is latest
- [TW-17697](#) - exception in teamcity causes junit test failure to be recorded as success
- [TW-18715](#) - Make teamcity.build.checkoutDir be published as build finish parameters
- [TW-18750](#) - incremental patch fails [server-side checkout, Perforce ticket-based authentication]
- [TW-18774](#) - Server won't start on SQL query exception: "ORA-01795: maximum number of expressions in a list is 1000"
- [TW-18783](#) - Copy project with template reorders inserted build steps
- [TW-18784](#) - Duplicates Finder .NET cannot start (Invalid option 'output')
- [TW-18839](#) - Git-plugin doesn't work with submodule on commit reachable only from tags
- [TW-18845](#) - VS Addin: Customization of configuration parameters does not work
- [TW-18846](#) - Administration->Audit produces error
- [TW-18861](#) - Agent listener may not be unregistered if unexpected error occurred during agent registration
- [TW-18875](#) - Do not show link on user name for guest user
- [TW-18937](#) - TestNGEventsAdapter prevents TestNG 6.0 tests from running
- [TW-19007](#) - Exception while looking up Show History
- [TW-19027](#) - Project Copy Doesn't Carry-over Build Trigger "Successful" Flag
- [TW-19046](#) - Warning 'Parameter "system.teamcity.build.workingDir" is undefined.' after upgrading from 6.5.3 to 6.5.5
- [TW-19088](#) - IDEA Remote run dialog: "Customized" text floats on dialog resize
- [TW-19130](#) - BuildServerAdapter references class not available in devPackages (com.intelij.openapi.util.Pair)
- [TW-19211](#) - Fail on error logged condition may break the build without any errors in log
- [TW-19282](#) - IDEA Plugin: Cannot remote run changes/outgoing changes (UnsupportedEncodingException: NATIVE_TO_ASCII_MacRoman)
- [TW-19301](#) - Statistics graphs break when switching form month to other range
- [TW-19340](#) - Investigate dialog does not work if invoked from test popup
- [TW-19354](#) - Agent statistics tab throws exception

Exception

- [TW-18580](#) - Could not query the service provider for the service ID {04A72314-32E9-48E2-9B87-A63603454F3E}.
- [TW-18704](#) - [SVN] GetWorkingCopyRoots: Subversion directories collection is empty
- [TW-18756](#) - IOException in ClearCase log
- [TW-18869](#) - Error while parsing log output - Mercurial - CodeBetter
- [TW-18876](#) - EA-31160 - NPE: TeamCityColoredTreeRenderer.dispose
- [TW-18962](#) - Requested Clipboard operation did not succeed.

Performance Problem

- [TW-16335](#) - Mercurial clone with --pull
- [TW-16796](#) - Mercurial plugin does unnecessary clone while building full patch
- [TW-18540](#) - VCS root parameters resolution can be slow
- [TW-18976](#) - Changes collecting for build chain can be slow in case of parametrized VCS roots

Cosmetics

- [TW-16165](#) - Refine text about filtering by not related to current project more
