

Hajipur 9.0 RC1 (build 32023) Release Notes

Project import improvements

Now the imported users are placed into a separate group on the target server for the ease of monitoring.

Other improvements

- TeamCity audit now includes operations with issue trackers, enabling/disabling project settings synchronization with VCS, and changes to the `plugin-settings.xml` file
- The bundled Tomcat has been upgraded to the latest version 7.0.57
- [Fixed issues](#)
