

# LiveEdit ChangeLog

ChangeLog is not updated anymore since LiveEdit bundled with WebStorm.

## 0.3.2, August 14

## 0.3.1, August 10

## 0.3, August 7

- Plugin renamed to LiveEdit.
- Changes are not applied while you are typing. Now that is not so aggressive but maybe it is not so live — if you disagree, please [open discussion](#).
- [Issues](#).

## 0.2.14 (0.2.27), August 2

- JavaScript HotSwap (inlined javascript is not yet supported).
- Compatibility with Google Chrome 21.
- [Issues](#).

## 0.2.13, July 24

## 0.2.11, July 12

- Fix exception in element highlighter.

## 0.2.10, July 11

## 0.2.9, June 18

- Improve CSS editing, you can now edit Drupal CSS files (theme for example) instantly.
- First attempt to support [php view editing](#).

## 0.2.8, June 15

- Improve support Google Chrome 20 beta (but [WI-11490](#) is still actual).
- Don't launch Chrome if we need add/force update extension (only unix-based OS, Mac OS X or Linux (Ubuntu)).

## 0.2.7, June 14

- [Issues](#).
- Element highlighting in browser.
- Autoupdate Google Chrome Extension on IDE Plugin update (otherwise you need to open `chrome://chrome/extensions`, enable "Developer mode" and click "update Extensions now").

## 0.2.6, June 7

- Improve target element selection (unwanted modification on unrelated pages).

## 0.2.5, June 1

- [Issues](#).
- Partial [WI-11445](#)

## 0.2.4, May 30

- [Issues](#).
- Partial [WI-11445](#), [WI-11424](#) and [WI-11423](#).
- "Instant HTML/CSS editing" menu item moved to "View" (was in: "Run").

### 0.2.3, May 17

- Sync html structure change without page reload.

### 0.2.2, May 17

- Plugin "Web Browser Connector" merged to this. Please uninstall "Web Browser Connector" plugin.

### 0.2.0, May 16

- PhpStorm/WebStorm compatibility.
- Ability to sync when Web Inspector is opened.
