[TeamCity 8.0 Release Notes](#)

## Feature

- [TW-25128](#) - Add command line of the waited external process to the thread name

## Usability Problem

- [TW-29813](#) - IDEA plugin UI bloopers
- [TW-30034](#) - Regexp parameter type always requires non empty value

## Bug

- [TW-20587](#) - .NET Inspections runner failed to resolve references to generated COM interop assemblies
- [TW-23283](#) - Popups may not be rendered fully in Chrome/Win
- [TW-26397](#) - Build Step .NET Code Inspection reports wrong XAML Errors
- [TW-28558](#) - Error in UI on running build: bean dependenciesBean not found within scope
- [TW-28735](#) - Perform 'git remote prune origin' in Git mirrors everyone run on agent
- [TW-28808](#) - Filter by tag does not work on configuration overview
- [TW-29325](#) - Android Studio +TeamCity plugin. Remote Run does not start build.
- [TW-29437](#) - Entering not valid target project id in copy dialog suggest invalid ids in the mapping
- [TW-29509](#) - Server health report loses context on deleting a VCS root
- [TW-29754](#) - Muted errors cause exception in TeamCity
- [TW-29890](#) - TeamCity shows that archive is empty while it is not
- [TW-29953](#) - Eclipse TeamCity plugin failed to push git changes after remote-run
- [TW-29996](#) - Could not build an Idea project: The data "null" is not legal for a JDOM attribute: A null is not a legal XML value.
- [TW-29999](#) - Build failed because Ant runner could not store file under C:\BuildAgent\temp\agentTmp
- [TW-30002](#) - Project-level statistics chart properties are reset on changing build configuration id
- [TW-30013](#) - Default project statistics are not shown (external id != internal id case)
- [TW-30023](#) - Link "show 1 more..." does not work in large build log health item
- [TW-30035](#) - After upgrade to v8.0.1 Cleanup takes a very long time on the BuildIndexCleaner (6-7 hours) stage
- [TW-30140](#) - Can't change the 'API Level' property for idea android build step
- [TW-30144](#) - Not applied changes are shown on the Configure chart axes dialog
- [TW-30147](#) - Strange positioning of "accept license agreement" form
- [TW-30157](#) - Negative size values on charts are always displayed in bytes
- [TW-30159](#) - Copy project should copy guest permissions
- [TW-30160](#) - Guest roles should be sorted by project name
- [TW-30165](#) - Improve texts - Meta-runner
- [TW-30186](#) - VCS root becomes detached from build configuration after ID change
- [TW-30188](#) - Compilation error on build overview tab has no information when expanded
- [TW-30189](#) - Unformatted server health page after deleting an unused vcs root
- [TW-30212](#) - "Discard your changes?" dialog appears multiple times on leaving VCS root edit page
- [TW-30213](#) - Message urging user to choose save option appears on edit VCS root attached to a project
- [TW-30220](#) - Cannot read property 'documentElement' of null when saving VCS root in Chrome
- [TW-30230](#) - External project id can be displayed to the user who do not have permissions to view the project (redirect from internal id case)
- [TW-30236](#) - Bundled java mail is outdated ("Could not connect to SMTP host, Network is unreachable: connect" under win7)
- [TW-30237](#) - Recursive configurations of the SVN externals can make TC server non-functional due to OOM errors
- [TW-30259](#) - java.lang.ClassCastException: jetbrains.buildServer.vcs.impl.VcsRootInstanceImpl\$InaccessibleVcsRoot cannot be cast to jetbrains.buildServer.vcs.SVcsRootEx
- [TW-30265](#) - Artifact archive itself is copied to destination directory when extracting files
- [TW-30270](#) - buildTypesFilter tag should propagate external buildtype ids
- [TW-30273](#) - "Cannot read property: visibleChanges" error while opening a run custom build dialog
- [TW-30338](#) - LDAP sync disabled upon upgrade (space after "true" value in properties file)
- [TW-30399](#) - No validation errors are shown on build step editing page if selected runner is based on Meta-runner
- [TW-30415](#) - LDAP plugin creates/removes users during user synchronization, which breaks compatibility with 7.1.x
- [TW-30416](#) - NullPointerException in DiskUsageController
- [TW-30417](#) - Tray notifier login page broken when there is welcome text
- [TW-30423](#) - Only system administrator can stop build queue
- [TW-30441](#) - Default project statistics charts cannot be filtered by build configuration external id
- [TW-30468](#) - JavaScript error when empty Date is used in Date field on Build Schedule tab.

- [TW-30471](#) - NTLM auth fails for e-mail notification plugin
- [TW-30485](#) - Error collecting changes: `IllegalArgumentException: Invalid id`
- [TW-30644](#) - Editing `roles-config.xml` file on disk breaks user's groups roles propagation until server restart
- [TW-30647](#) - Missing project hierarchy nodes in test history build configuration filter
- [TW-30676](#) - TFS plugin from TeamCity 7.1.5 is not compatible with TeamCity8.0
- [TW-30698](#) - TFS operations may hung in Windows Server 2003
- [TW-30716](#) - LDAP sync could delete users in case of fatal error during users fetch
- [TW-30741](#) - No %-references completion for Meta-runner text values
- [TW-30770](#) - Incorrect client mapping generation for performe when `-:` is used

## Exception

- [TW-30030](#) - Edit Build parameter -> Save -> Error message: String index out of range: -5

## Performance Problem

- [TW-29891](#) - `ResponsibilityRemover.buildFinished` is too slow

## Cosmetics

- [TW-29396](#) - change Save dialog
- [TW-29968](#) - Compilation error text may duplicate in build problem description
- [TW-30029](#) - Incorrect message on remote run result dialog
- [TW-30164](#) - Improve texts on Builds Schedule and Shared Resources tabs
- [TW-30180](#) - Improve texts on the General Settings of the build configuration page
- [TW-30181](#) - Improve text on the VCS settings page
- [TW-30184](#) - Improve Texts on the New Build Step page: Ant, .NET, Command Line, Duplicates finder.NET
- [TW-30442](#) - Checkbox in the header of a table is not aligned with the checkboxes in the rows (Roles user's tab)
