

TeamCity 5.1.3 Release Notes

Feature

- [TW-12374](#) - Use git from PATH environment variable for agent-side checkout if others are not found

Bug

- [TW-9382](#) - Clearcase Version 1 of file not recognised as a change.
- [TW-9984](#) - TeamCity VSS user's ini file (ss.ini) gets reset to temp file frequently
- [TW-11820](#) - Deadlock in Java coverage
- [TW-11891](#) - Exception in IDEA plugin
- [TW-11899](#) - Builds that are finishing during backup creation can be lost
- [TW-12228](#) - Git checkout with submodules on agent is not supported
- [TW-12230](#) - Excessive logging "Flush queue finished, number of virtual agents assigned"
- [TW-12241](#) - Agent matrix displays wrong data (popup does not match row label)
- [TW-12245](#) - Add New Schedule Trigger: fails with "Unexpected Error"
- [TW-12291](#) - Work of responsibilities filter seems broken
- [TW-12317](#) - User can occasionally lose all group-assigned permissions on server restart
- [TW-12326](#) - Build agent upgrade fails with NPE in the upgrade.log
- [TW-12337](#) - Swabra settings are missing from Visual Studio (sln) runner
- [TW-12350](#) - A perforce change can be not detected at all (missing p4 changes command output)
- [TW-12410](#) - SVN checkout on agent fails with "XML document structures must start and end within the same entity."
- [TW-12489](#) - EC2 profile can switch to error state and never recover by itself after intermittent database connection failure
- [TW-12502](#) - Build history clean-ups keep server offline for hours (too many builds to cleanup with clean_artifacts level)
- [TW-12515](#) - NPE in git fetch over ssh in separate process
- [TW-12526](#) - can not add vcs build trigger
- [TW-12629](#) - Switching Framework-Version inbetween two msbuild-Executions (NAntContrib)
- [TW-12656](#) - Error message: Cannot read property: pendingChanges
- [TW-12663](#) - Hanged build when error creating tar archive
- [TW-12727](#) - User with Project Administrator role can't create project report tab: access denied exception is thrown
- [TW-12757](#) - Error creating patch with no updates.
- [TW-12778](#) - TeamCity 5.1.2 - Clearcase labeling fails
- [TW-12785](#) - Mercurial plugin launches hg without inheriting environment from the parent process
- [TW-12793](#) - Eclipse: NullPointerException in git integration
- [TW-12794](#) - Incorrect date sorting in My Changes view

Exception

- [TW-12001](#) - There is no Application Shell running.
- [TW-12138](#) - Cannot access a disposed object. Object name: 'VSSolutionImpl'.
- [TW-12210](#) - System.Collections.Generic.KeyNotFoundException : The given key was not present in the dictionary.
- [TW-12332](#) - Enumerable contains no matching element
- [TW-12348](#) - Idea critical error: getLastFinished: java.net.SocketException: Connection reset
- [TW-12365](#) - There is no Application Shell running.
- [TW-12382](#) - Object reference not set to an instance of an object.
- [TW-12395](#) - There is no Application Shell running.
- [TW-12537](#) - Error executing dispatcher action LocalChangesViewController::UpdateTrackingRoots on <NULL>:1. There is no Application Shell running.
- [TW-12630](#) - Error executing dispatcher action FileSystemChangesCollector::FlushAccumulatedChanges on <NULL>:1. There is no Application Shell running.

Performance Problem

- [TW-12273](#) - Speedup Perforce getCurrentVersion
