

0xDBE 143.615 Released

Welcome a new 0xDBE 1.0 EAP. See [Notable Changes](#) for more details on what's inside.

Download	Description
0xdbe-143.615.4.exe	Windows installer
0xdbe-143.615.4.zip	Windows zip archive
0xdbe-143.615.4.tar.gz	Unix archive
0xdbe-143.615.4-custom-jdk-linux.tar.gz	Unix archive with JRE 1.8u51 custom build
0xdbe-143.615.4.dmg	Mac installer
0xdbe-143.615.4-custom-jdk-bundled.dmg	Mac installer with JRE 1.8u51 custom build

Notable Changes

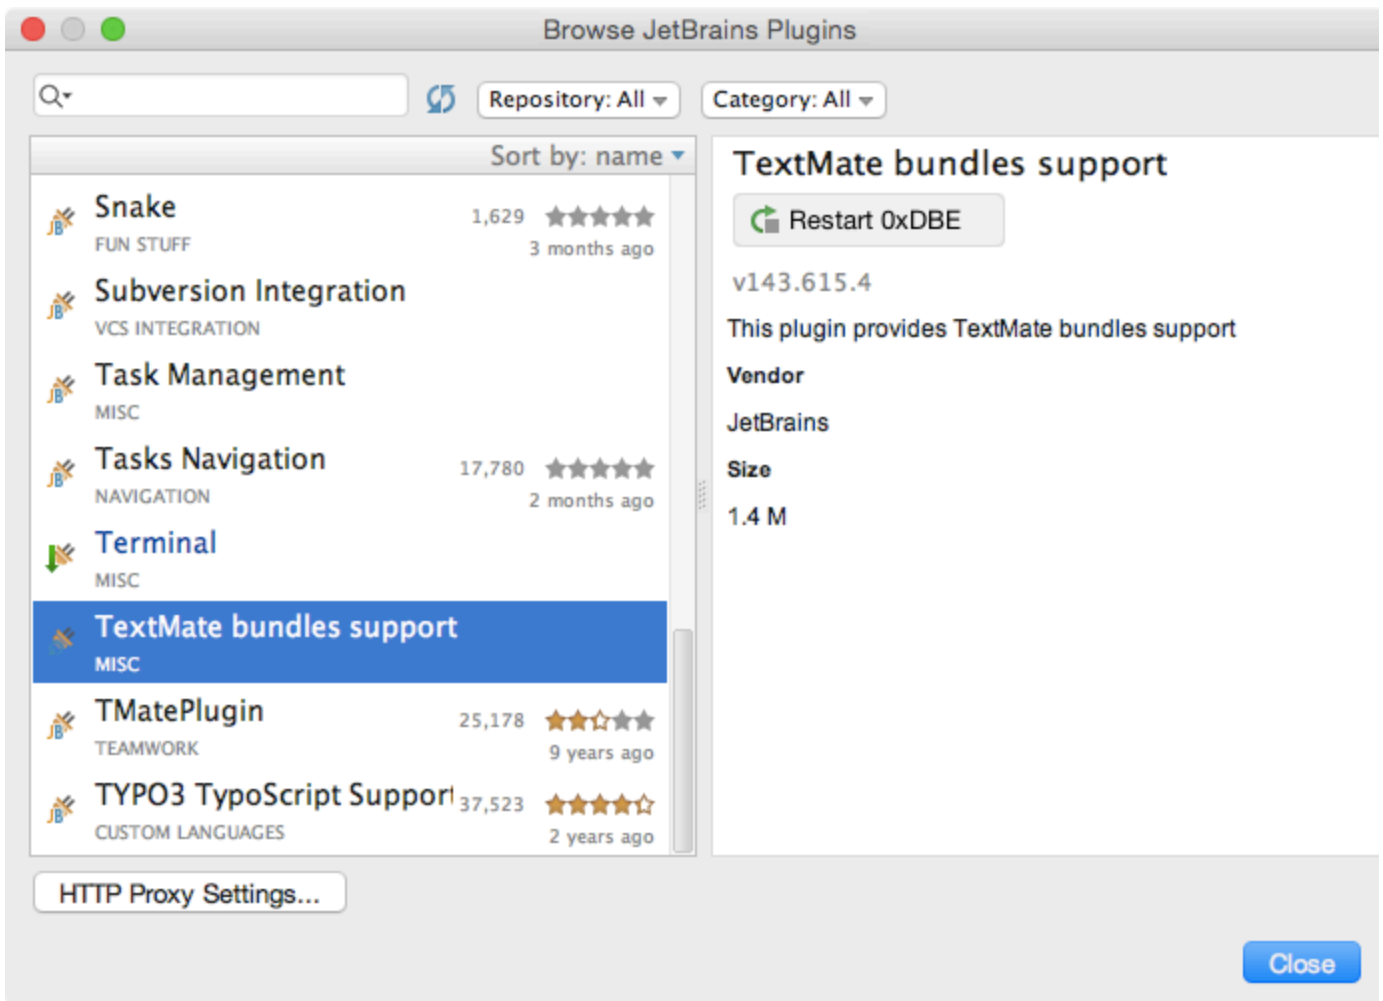

Now you can get syntax highlighting for any language supported by a TextMate bundle:

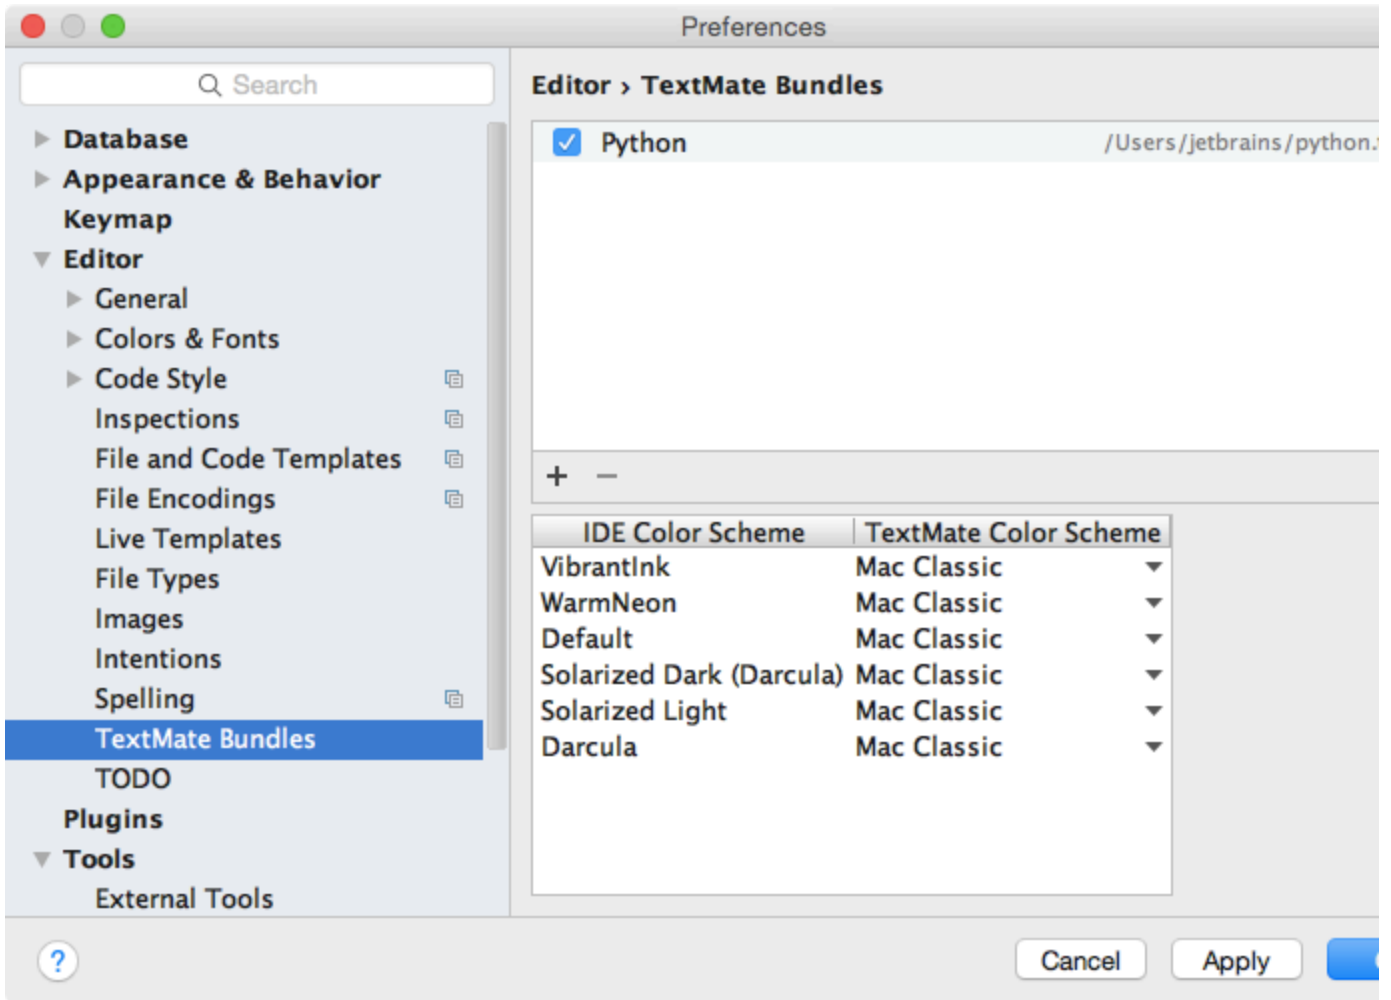

The screenshot shows the 0xDBE IDE interface. The title bar reads "Demo PostgreSQL.sql - 0xDBE (Natasha) DB-143.615.4". The breadcrumb navigation shows "DB Consoles > Demo PostgreSQL > Demo PostgreSQL.sql". The editor displays a PostgreSQL query with Python code syntax highlighted. The code is as follows:

```
CREATE TYPE named_value AS (  
  name text,  
  value integer  
);  
  
CREATE FUNCTION make_pair (name text, value integer)  
  RETURNS named_value  
  AS $$  
  class named_value:  
    def __init__(self, n, v):  
      self.name = n  
      self.value = v  
  return named_value(name, value)  
  
  # or simply  
  class nv: pass  
  nv.name = name  
  nv.value = value  
  return nv  
  $$ LANGUAGE plpythonu;
```

To get it, install the TextMate bundles support plugin in Settings Plugins.

And then, add the corresponding bundle in Settings Editor TextMate bundles:

Apart from that, the build also brings many other [fixes and enhancements](#).

Getting started

Be sure to check the [documentation](#) to learn how to quickly get started with 0xDBE.

Feedback

0xDBE is still under development and we really appreciate your feedback. Please submit bug reports and feature requests directly to the [issue tracker](#). In case you have a question, don't hesitate to ask it on our [discussion forum](#).

 If you'd like to get EAP news via email, be sure to sign up for the EAP at <http://www.jetbrains.com/dbe/eap/>.
