

TeamCity 7.1 Release Notes

This is a list of all fixed issues in 7.1 release. See also [What's New in TeamCity 7.1](#) in the online documentation.

Feature

- TW-2529 - Manually mark build as failed or successful
- TW-5061 - Support using fixed revision for Perforce checkouts
- TW-5165 - Option to limit the count of repeating a failing build
- TW-6450 - Install server service with specified credentials
- TW-6885 - NTLM authentication SSO support
- TW-9146 - Transparent Windows (NTLM) authentication for Windows Tray notifier
- TW-9833 - Display where a property generating an unmet requirement is defined
- TW-10167 - Add ability to disable auto-unassign for test investigation (sticky investigation)
- TW-10217 - Compatibility views should list known cloud agent types to estimate/analyze compatibility without currently running cloud agents
- TW-10281 - Allow to set responsibilities to me automatically
- TW-10855 - Mark my responsibility somehow
- TW-11070 - Allow to build Perforce Label (instead of revision)
- TW-11385 - Urge users to install agent and server Windows service under specific user accounts not System
- TW-11893 - Option to shutdown cloud agent after one build
- TW-12497 - Add block times into downloaded build log
- TW-12914 - Ability to filter agent build history by build configuration name substring
- TW-13117 - Display number of cloud images running in the "Cloud" agents tab
- TW-13682 - Ability to run a build step even if previous step failed
- TW-13854 - Do not perform clean checkout for git when updating sources to earlier revision or another branch
- TW-13958 - Syntax highlighting in coverage reports
- TW-14286 - Allow to Stop instead of Terminate EC2 build agents
- TW-14493 - Configure ruby interpreter & gemset according to .rvmrc file
- TW-14670 - On admin build step settings page, make "Build Step(s)" in the subtitle a link to the build steps list
- TW-14725 - Server .exe installer should install server into specified account
- TW-15073 - Log how TC determined data directory path
- TW-15290 - Don't use %home%\buildServer for TeamCity Data Directory on Windows
- TW-15465 - Agent tools/plugins should have support for executable flags
- TW-15640 - Ensure not linked builds run on the same agent if they have another which depends on them with "run on the same agent"
- TW-16410 - Navigate to test history (web) from test source code opened in Idea
- TW-16419 - Amazon integration should support EBS based instances in profile
- TW-16848 - Provide bulk change investigation/mute on all test lists
- TW-17677 - Ability to view test's output for a passed test (for MsTest)
- TW-18117 - Add link to build log message that caused build failure
- TW-18252 - Support |0xNNNN escape sequences in service messages
- TW-18319 - Add an action to run all tests I responsible for (from a selection)
- TW-18389 - Report build feature usages in usage statistics
- TW-18675 - Add predefined build property for build step name
- TW-18696 - IDEA plugin: Group My Investigations by investigation type (build configuration, test)
- TW-18739 - Support running of ant before junit run configurations in IntelliJ IDEA runner
- TW-18912 - When cloning project muted tests should be copied too
- TW-18942 - Allow to import available configurations from the .xcodeproj file
- TW-18945 - Add support for OCUnit tests
- TW-19055 - Proper support of mintiest framework
- TW-19056 - Display current problems/investigations summary for build configurations on Overview page
- TW-19067 - Ensure Amazon EC2 cc2.8xlarge images supported
- TW-19145 - Add 'Created packages' section in NuGet packages tab of build results
- TW-19154 - Display compatibility summary in Pool/project cells on agent matrix
- TW-19262 - Do not allow to select content of nested archives as artifact dependency.
- TW-19331 - Support running build chains off a specified sources branch
- TW-19520 - Distinct AssemblyVersion from AssemblyFileVersion in AssemblyInfo Patcher
- TW-20271 - Ability to see what versions of ruby rvm contains on an agent
- TW-20342 - Test output is not merged on build log tree view
- TW-20402 - Proxy support for Nuget plugin
- TW-20428 - Provide a dialog to upload NuGet.Commandline.nupkg to TeamCity
- TW-20480 - Collect Xcode schemes during project parsing and show combobox instead of text field
- TW-20483 - Support building from Xcode schemes in AppCode runner
- TW-20521 - Add setting to treat custom builds (with changed VCS parameters like branch name) as regular builds: display them on Overview
- TW-20564 - Support CORS for REST
- TW-20623 - Support x64 bitness and add m1.medium instance type
- TW-20629 - Support .Net 4.5 (Visual Studio 2012) for MSBuild runner

- TW-20630 - Ensure build agent detects .NET 4.5 and VS2012
- TW-20660 - Show TeamCity test status near test source code
- TW-20698 - Option to update to prerelease versions in NuGet Installer
- TW-20755 - NuGet Update should be called for .sln file, not for packages.config
- TW-20759 - Support for Eclipse 4.x
- TW-20760 - Support MS SQL 2012 as external database
- TW-20939 - Xcode runner: add option to derive build location
- TW-20989 - Browser usage statistics
- TW-21055 - Support Microsoft Visual Studio 2012 for TeamCity add-in
- TW-21056 - Support TFS 2012
- TW-21057 - Support MSTest from Visual Studio 2012
- TW-21092 - Support Visual Studio 2012 projects in VS runner
- TW-21097 - Add popup showing running builds similar to build queue popup
- TW-21380 - Display current Maven module being built in the running build status/progress
- TW-21615 - IDEA project runner does not support Kotlin run configuration
- TW-21630 - Support for attribute filters in dotCover 2.0
- TW-21641 - Support step running conditions in REST
- TW-21683 - Support dotCover 2.0 for server coverage feature
- TW-21696 - Allow to limit set of HTTP authentication protocols used by the server
- TW-21698 - Ensure NAnt 0.92 is supported
- TW-21716 - Autocreate rvm gemset before running build steps
- TW-21737 - Allow to run a build step if a previous step failed, but not if the build is canceled
- TW-21813 - Windows tray notifier should support NTLM authorization
- TW-21816 - Allow user specify additional interpreter parameters
- TW-21839 - Support Visual Studio 2012 dark theme
- TW-21869 - Mark VCS roots used in a build on Change log
- TW-21900 - Support 'Visual Studio 2012 is installed on agent' frequently used requirement
- TW-21929 - List All NuGet Packages Published by Build in Report Tab
- TW-21981 - Show last finished build for each recent branch on Overview page
- TW-22046 - Take branches into account in investigation and mute auto resolve
- TW-22047 - Allow to filter by branch on test details (test history) page
- TW-22053 - Use VCS files list control for selecting project path in Xcode runner settings
- TW-22056 - Show all branches from all dependencies in custom build dialog
- TW-22169 - Format and rules for watched branch specification in DVCS root
- TW-22206 - Use monospace fonts for checkout rules, artifacts rules, artifacts paths, etc
- TW-22244 - Allow to use VCS root properties in external change viewer link configuration
- TW-22248 - Support Update By Packages.config
- TW-22378 - Display a note for a VCS root in revisions table on Changes page when the VCS root checks out fixed revision
- TW-22445 - Add current run start time into Flush Queue thread name
- TW-22474 - Display branch used to get DVCS root revision on build's Changes page
- TW-22829 - Make default build configuration branches filter "all active branches" instead of "all branches"

Usability Problem

- TW-2019 - In The Requirements List, Specify the Requirement Origin
- TW-5281 - Pager for the build changes page
- TW-9895 - Brush up Not found error for pom.xml
- TW-10673 - Implicit requirements are not obvious
- TW-11937 - Allow responsibility reassignment in a single step
- TW-12704 - Path to TeamCity Data directory specified during Windows install is not consider when using the maintainDB.cmd
- TW-14397 - Display/log TeamCity data directory normalized whenever possible
- TW-14677 - Improve build log message on not found run configuraiton
- TW-14686 - VS addin: Non-standard colors on build log view (black on gray)
- TW-15426 - TeamCity server windows service can use different data directory location then the server run from console
- TW-15680 - Create a build configuration from the BC template is not easy to find
- TW-16268 - Build tags view is confusing (especially on artifacts tab)
- TW-17299 - Better messaging around letting the user know when a build can run on a cloud agent
- TW-17480 - No build configurations in remote run dialog for Mercurial projects can be confusing
- TW-18257 - Do not show login dialog if auto-login failed. Use notification instead.
- TW-18281 - Artifacts Tree Sorting Case-sensitivity
- TW-18494 - Startup: detect non-TeamCity database with unknown tables and log the names of the tables
- TW-18566 - Add projects... and Add agents... controls are meaningless for a pool containing all agents & projects
- TW-18576 - Expand/collapse block by clicking on it
- TW-19446 - Link from investigation assigned to me notification opens page where investigation in question might not be visible
- TW-19484 - Moving agent from one pool to another occurs silently without any warn on removing agent from existing pool
- TW-19614 - Test tree checkbox selection suggestions
- TW-19797 - Update opened block status and duration in build log

- TW-19901 - Cannot apply investigate dialog with keyboard
- TW-20113 - Agent's page breadcrumb may have pool name as a link
- TW-20169 - Brush up collapsed message "..." button on My Changes
- TW-20205 - Checkbox "Hide problems marked as fixed" on Investigations page looks inconsistently with My investigations and Current problems
- TW-20223 - Build Configuration Overview Page: Extend Running Builds List to Occupy Full Width
- TW-20386 - Scrollbars in dropdowns
- TW-20512 - Make summary update more noticeable
- TW-20534 - Edit Artifact Dependency window size to be adjustable
- TW-20808 - Gradle runner should show 'UP-TO-DATE' in log output
- TW-20814 - It's not clear why not all changes are available in the chooser in run custom build dialog
- TW-20856 - Filtering on editing notification rules page should include child build-configs when the filter matches a project-name
- TW-20893 - Show project at dashboard suggestions
- TW-20943 - Do not redirect to project page after archiving a project
- TW-20987 - Log test and suite sys-err as internal messages in xml-report-plugin
- TW-21034 - Removing build from queue leaves dialog open
- TW-21053 - IDEA plugin: fetch inspection data in background
- TW-21078 - JIRA issue linking should not interpret and link values on build parameters tab
- TW-21098 - Use the same style of drop down in edit snapshot dependency dialog as for edit artifact dependency
- TW-21165 - Project popup. Refresh Overview page after projects are hidden/shown in popup.
- TW-21166 - Projects popup. Do not display Hide/Show button for projects without configurations.
- TW-21168 - Check artifact dependencies div scrolling issue
- TW-21205 - "Additional Gradle command line parameters" is not a multi-line editor, as is the case with Maven
- TW-21304 - Crippled snapshot dependency filtering in 7.0
- TW-21310 - Force update user properties during LDAP sync
- TW-21370 - Rename teamcity-service.log log
- TW-21387 - Number of compatible/incompatible with agent configurations
- TW-21403 - Improve missing hg error
- TW-21464 - Tests View: pager jumps and resizes every time I press 'next'
- TW-21468 - Show all configuration in 'configuration investigation dialog'
- TW-21499 - After setting the Investigation/Fix Options the checkboxes must be cleared out
- TW-21580 - "Searching for suitable configurations" shows progress indicator that doesn't move
- TW-21710 - Poor default for ruby interpreter setting
- TW-21930 - Please add a better build configuration selector in Finished Build trigger
- TW-21961 - Collision between key bindings of Eclipse plugin and Mylyn
- TW-22034 - Run Coverage Parameters Loader In Background
- TW-22059 - Add a button "copy to clipboard" to build thread dump window
- TW-22073 - Audit filter "All for agent" does not show agent compatibility changing events
- TW-22093 - Download Nuget dialog. Upload NuGet package. Display selected file near Select file button.
- TW-22110 - Expand/collapse actions in build log must not add history states in browser
- TW-22129 - teamcity.branch.name property is not defined when building off default branch
- TW-22132 - Do not count different artifacts builds as build changes when builds from the same snapshot chain are used
- TW-22198 - Middle click does not work in FireFox for sections on build configuration editing
- TW-22199 - Change order of Show graph/builds on Change Log
- TW-22250 - Run Custom Build dialog. Highlight Changes tab if previous custom build used non default settings in this tab.
- TW-22324 - Build Queue. Show in popup compatible agents from other pools for builds with No Agents.
- TW-22361 - Setup Admin page is not shown if login.html page is opened in the browser
- TW-22384 - TC project graph of changes - tooltip is not always shown in time
- TW-22388 - Display server URL in "TeamCity plugin version is not compatible" message
- TW-22472 - Increase default number of builds on builds History page
- TW-22484 - Process correctly long multi-lined comments when remote run.
- TW-22486 - Do not log every 10 seconds problems with enabled nuget.
- TW-22512 - Allow to enter usual credentials right on unauthorized page: use login page instead of "unauthorized" one
- TW-22526 - Eclipse plugin does not show saved SVN credentials.
- TW-22558 - Add "Undo" for actions "mark as failed / as successful"
- TW-22742 - Branches combobox. Change the design for arrow or at least provide some tooltip on mouse over.
- TW-22760 - Restore Branches popup by click.
- TW-22791 - My Changes page looks strange when loading changes
- TW-22856 - Project's Change Log and Test History tabs show all builds, while branches chooser has "all active branches"
- TW-23038 - Build waiting for same-agent dependency, although there's none
- TW-23106 - Branches drop down can list only one item after any keypress (filtering occurs)

Bug

- TW-2266 - Windows path variable does not include system path variable part (only user part is included) when agent run as a service
- TW-2273 - EclipsePlugin: the 'commit failed' or 'committed' message doesn't appear for successful remote run change at once

- TW-3831 - Discard your changes confirmation is displayed too late on logging off while on a form
- TW-5527 - JavaServiceWrapper does not load user's environment for service on Vista
- TW-6425 - Service with customized credentials should not expose user's password in cleartext
- TW-8060 - Breadcrumb-displayed configuration status is not refreshed on change
- TW-10123 - Handle html-like stacktrace injections on failed tests view as a simple text, not as a part of html template.
- TW-10293 - Build actions popup is not closed after clicking an action
- TW-11231 - Successful inspection build is reported as "Inspections were not gathered"
- TW-11730 - Stop dialog can be too tall for a chain build
- TW-12177 - When restoring config and database ensure that the resultant database.properties file in configs points to the restored database
- TW-12278 - Improve artifact publishing logging (multiple "Publishing artifacts" lines)
- TW-12517 - EC2 EBS instances are disconnected but not terminated after idle time out
- TW-13198 - HTML-unesaped symbols appear in build log
- TW-13544 - Make VS add-in msi file name synced with TeamCity server version.
- TW-13603 - Make it clear in UI that compatible configuration setting for Amazon EC2 agents aren't used for other cloud agent from the same image
- TW-13668 - Browser memory leak on running build results page
- TW-14319 - Server starts with default authentication if main-config.xml contains unknown login module class
- TW-14324 - Do not dump stack trace to agent log on known errors (missing Ant build file case)
- TW-14443 - "No enabled compatible agents" warning on running a build configuration that only is compatible with cloud agents which are not running
- TW-14709 - Tomcat leaks-related logging on server stopping (no webapp was run because of startup error case)
- TW-14733 - Setting RVM system may not work with Rake runner
- TW-14770 - Shell scripts in agent plugins are not executable (Maven, Ant)
- TW-14843 - VS Addin Upgrading / Installing latest version of Team City Visual Studio addin (with TeamCity 6) hangs
- TW-14932 - Visual Studio Plugin possible upgrade bug: missing extension.vsixmanifest
- TW-14982 - TC Plugin API not letting me use ResponsibilityInfo.getResponsibleUser()
- TW-15001 - Log correct error when JDBC driver fails to load JNI extensions (it's possible for MS SQL drivers and for Oracle OCI connections)
- TW-15071 - Ensure TeamCity server does not have Windows\System32 as working directory when started as a service
- TW-15131 - New combobox component does not support disabled items
- TW-15219 - Duplicate Status text messages if artifact copy duration is long
- TW-15430 - Nested testsuites support
- TW-15610 - Properties editor dialog should be resizable
- TW-15873 - Remote Run for Git - Cleans all files in working directory
- TW-15988 - Error after starting remote run ... "RemoteRunSession - Session is expired or you're logged out. Please relogin" (several IDEA instances running case)
- TW-16614 - Exception can be printed on agent log page is agent machine goes offline
- TW-16811 - Keypress is not repeated on hold in filtering choosers
- TW-16851 - Unknown server startup exception without details
- TW-16861 - Sample plugin plugs only into overview page (no "Click Me" button on "/" page)
- TW-17020 - "Failed to resolve artifact dependency" message may use build id instead of build number
- TW-17130 - Windows service settings are lost after upgrade
- TW-17132 - VS add-in installer fails to repair if previously was renamed
- TW-17552 - "Mark as fixed" notification must include not only responsible user but also reporter one
- TW-17554 - Reporter user is not updated after "mark as fixed" (probably "give up" too) action
- TW-17583 - Make "run as" settings in agent push more clear
- TW-17718 - TeamCity shows a report tab, even though the file doesn't exist (archive exists, but not the file in it case)
- TW-17766 - Agent artifacts cache does not get cleaned
- TW-17770 - Tray Notifier doesn't allow to change account
- TW-17837 - Exporting VCS branch name as a system property
- TW-17890 - Couple of issues with samplePlugin from devPackage
- TW-18106 - Errors on server shutdown: Too much runtime data
- TW-18265 - In tree log view message "Running..." does not disappear after build finished
- TW-18324 - Agent Push fails if /bin/sh points to bash-incompatible shell
- TW-18386 - Make actual branch name available in builds triggered by the "Branch Remote Run Trigger"
- TW-18388 - MaintainDB tool: Restore finishes "successfully" when Oracle jdbc throws "NoSuchMethodError: toUnicodeChars" exception
- TW-18413 - Display issue retrieval error instead of empty details on Issue Log
- TW-18462 - Ability to remove personal build from queue + fix notifications about canceled personal builds ("build failed" is now shown)
- TW-18626 - Merge works incorrectly when merged file is unshelved.
- TW-18627 - Shelf view: the content of shelved file is erased on reassigning to the same shelf.
- TW-18749 - IDEA remote run dialog is confusing when selected for multiple configurations
- TW-18919 - dotCover coverage session in TeamCity terminates NUnit test session
- TW-18940 - Got error on attempt to build project using XCode runner
- TW-18941 - Subversion may checkout wrong files in case of not synchronized clocks on main and externals repositories
- TW-18948 - Maintenance mode pages can render as text (not HTML) in the browser when proxied through Apache server (missing content type)
- TW-18952 - Brush up agent pools in Run custom build dialog (unified options, grouping)
- TW-19006 - Grayed UI after I pressed 'run...' and quickly closed the 'run custom build' dialog
- TW-19016 - Remote Run from Eclipse fails for svn+ssh Subversion repository (repeatedly asking for credentials and

- misreporting file statuses)
- TW-19092 - Agent pools. Unexpected error message is displayed in Add Agents popup when server was upgraded.
- TW-19205 - Update copyrights in About dialog
- TW-19232 - Can run on agents popup in the build queue does not consider pools when displaying number of incompatible agents
- TW-19368 - IntelliJ IDEA plugin should not highlight local inspection results from server in the editor
- TW-19386 - Agent name with chars <>& is not properly escaped in Failed to Start messages.
- TW-19421 - Minimize number of filters passed to the dotCover console runner
- TW-19451 - No landing page for Ruby support in TeamCity doc
- TW-19557 - Rework agent free space cleaning
- TW-19566 - Ensure EC2 instance type cc2.8xlarge and cc1.4xlarge are supported
- TW-19589 - Install build agent link does not work if Projects nav item is selected
- TW-19656 - Don't start build on cloud agent which is shutting down
- TW-19703 - Mercurial timeout results in a locked local repo
- TW-19726 - Agents failed to upgrade (TeamCityAgentService-windows-x86-32.exe is locked)
- TW-19765 - Report errors occurred while traversing tree elements in UI
- TW-19766 - Custom charts. Y axis date is incorrect when format="percent".
- TW-19779 - Browser memory leak on Overview page
- TW-19832 - Server log is opened in browser on download
- TW-19853 - PushAgent cannot deploy agent on FreeBSD host and reports unclear error "Remote agent installation failed: null"
- TW-19923 - Artifact dependency on "Last finished build with specified tag" should not use cancelled build
- TW-19954 - Agent Pools. Cloud Agent is displayed in Default pool on Pools page though it belongs to another pool.
- TW-19965 - Too many open files (and many many sessions)
- TW-19979 - Investigations list must be ordered
- TW-20023 - "BuildTypeNotFoundException: Build configuration does not exist" on the build queue
- TW-20030 - Clickable area is too wide
- TW-20033 - Invalid layout on duplicates report page
- TW-20087 - Artifacts tree in Dependencies / Downloaded artifacts is not expanded when "plus" is pressed (IE)
- TW-20143 - Inconsistency in editing guest user notification rules
- TW-20220 - Toolip over popup on user's name on Issue log
- TW-20244 - addCssFile and addJsFile - wrong scope
- TW-20259 - Buttons on Agent compatible configurations page can be not visible on tall pages
- TW-20275 - Clicking on "Search in next 1000" does nothing
- TW-20280 - JavaScript injection from user display name (build canceled reason)
- TW-20302 - Filtering multi-select control can lose grouping items on several typings
- TW-20308 - Several tray notifiers can be running
- TW-20333 - Ruby environment configurator feature flush settings after upgrade
- TW-20336 - TruncateVcsVersionConverter throws exception during upgrade
- TW-20347 - Option buttons in build runner settings do not work correctly in IE9
- TW-20354 - PlaceId.BEFORE_CONTENT css and js resources are not included
- TW-20364 - Diff view should not contain 'copy to clipboard' link if no flash is installed
- TW-20366 - Pre-tested commit error dialog potentially too long to be dismissed
- TW-20381 - Build issues page shows empty issue status if there are no permissions to view issue details
- TW-20388 - IE8: Run Custom Build Dialog tab is highlighted when not needed
- TW-20421 - TeamCity service does not start on Windows x64 machine
- TW-20422 - service.bat registers TeamCity service incorrectly
- TW-20435 - Permissions filter can be not applied
- TW-20442 - Command Line runner add extra " to command
- TW-20453 - Remove yellow highlighting on My Investigations page.
- TW-20477 - Combobox with filter: show all group members when group name matches filter keyword
- TW-20478 - Audit page can be opened filtered, but without any filter values selected.
- TW-20494 - Multiple "Discard your changes" dialogs on leaving a page
- TW-20516 - Missing changes from snapshot dependencies
- TW-20519 - webdiff should show gap for removed/added lines on the other side
- TW-20537 - Build failure on message condition may be lost on server restart during the build
- TW-20538 - java.util.EmptyStackException is thrown from CurrentTestHolderImpl
- TW-20546 - Notifications about "my changes" are not send for changes from snapshot dependency
- TW-20560 - Test jars in TeamCity server distribution
- TW-20582 - Tooltip with time to start estimation details is not shown on "build in the queue" carpet
- TW-20589 - Directory cleaner should ensure freespace on the disk of custom checkout
- TW-20591 - "Report type" is not marked as mandatory field on XML report processing build feature
- TW-20603 - Report artifact resolution collision
- TW-20606 - "Cleanup in progress" page is served with the wrong MIME-type
- TW-20627 - Agents Page becomes gray after update:
- TW-20628 - Build screen truncates currently executing test
- TW-20655 - maintainDB scripts do not work when invoked from arbitrary current directory
- TW-20682 - Confusing "Suitable build configurations were not found for specified changes" message on VCS-related error in IDEA
- TW-20708 - Warning use Gradle milestone 9
- TW-20710 - Scrollers do not scroll in Chrome (Add user to Groups dialog)
- TW-20732 - Builds may become constantly out of changes sequence if build configuration VCS root has reference in

- insignificant parameter
- TW-20774 - Build failure message for text in log failure condition renders it's text
- TW-20799 - One popup can unexpectedly affect another popup closing/non closing
- TW-20807 - "You do not have corresponding snapshot dependency" error message does not respect transitive dependency
- TW-20818 - Project chooser does not work when Users page is opened from Project page
- TW-20827 - Xcode plugin should be more clear about what 'Architecture:' maps to
- TW-20846 - Subversion tag deletion and then creation is not detected as change
- TW-20848 - Agent cannot start. Fails to upgrade CommandLineRunner and environment-fetcher-agent plugins.
- TW-20860 - build.vcs.number may not point to the latest revision of repository
- TW-20871 - File write errors are silently ignored during rules applying (no write permissions case)
- TW-20880 - Last item in the tree is shifted by a couple of pixels
- TW-20887 - ArrayIndexOutOfBoundsException in java.net.InetAddress.getLocalHost on server startup
- TW-20910 - Old failed test run is not shown in case there is new one in separate configuration
- TW-20937 - This build cannot start because it's agents are reserved by other builds.
- TW-20940 - Windows build agent clones the repo in every build
- TW-20954 - On 1024x768 - Top wrapper doesn't resize to full screen width. #MainContent does.
- TW-20962 - Exception on search page
- TW-20963 - Number of files is not shown anymore on build changes page
- TW-20971 - Make sure NuGet builds trigger supports prerelease package versions.
- TW-20996 - Layout problems on a notifications page when font size is too small
- TW-20999 - IDEA plugin. Mute/Unmute. Date in the past can be selected for unmute test.
- TW-21002 - Tests tab. No ability to mute test in selected build configuration.
- TW-21004 - Save / cancel buttons can be placed behind footer and become not visible on the page
- TW-21017 - Investigate/Mute dialog. "...specify the correct unmute date" warning is not removed when unmute method is changed.
- TW-21069 - JavaScript injection via IDs in URLs
- TW-21073 - Build description may overflow status block
- TW-21083 - Confusing error message on startup: org.jdom.input.JDOMParseException: Error on line -1: Premature end of file
- TW-21084 - Teamcity plugin is not available after eclipse 4.1.2 restarting.
- TW-21085 - Teamcity Watched Projects view is not available with eclipse 4.1.2
- TW-21086 - NPE on pressing Hide Coverage information in editors button.
- TW-21089 - Impossible to open code file from Teamcity Code coverage view.
- TW-21090 - Teamcity Failed tests view. Icons are not updated when tests are investigated/fixed from eclipse plugin.
- TW-21101 - Failed to open My Investigations page in separate browser tab via browser's context menu.
- TW-21104 - Eclipse plugin. Watched projects. Filter button and Show All link do not work.
- TW-21105 - Eclipse plugin. NPE when watched projects are selected in Teamcity Watched Projects view.
- TW-21106 - Eclipse plugin. Teamcity Watched Projects view. Context menu items and buttons are disabled.
- TW-21108 - Test suite information is lost for all tests after an artifact is uploaded
- TW-21109 - Too high branch name
- TW-21161 - Eclipse plugin hangs eclipse loading when autologin enabled
- TW-21164 - Projects popup. Change tooltip when project is hidden/shown.
- TW-21170 - Build Will start moments ago problem
- TW-21181 - Xcode Runner should support Xcode 4 workspaces and build properties.
- TW-21190 - Artifacts tree incorrectly handles multiple clicking on "plus" icon during subtree loading
- TW-21191 - vcs tree. incorrect behavior when paths are duplicated in roots.
- TW-21193 - VCS tree. Checkout rules are processed incorrectly.
- TW-21196 - crashed junit test is ignored
- TW-21197 - "Mark as fixed" email notification does not work for individual tests if the user is watching concrete build configuration
- TW-21201 - VS Addin for version 7.0 breaks on my machine
- TW-21221 - Log4j error for some log4j presets: Attempted to append to closed appender named `CONSOLE-ERROR`.
- TW-21225 - Xcode runner does not run iOS Unit Tests
- TW-21235 - Statistics: switching graph time-span switches to empty page only containing updated graph
- TW-21238 - Error running TestNG test run configurations in IntelliJ IDEA runner does not contain all the details
- TW-21252 - Files in tree view must be sorted case-insensitively
- TW-21261 - Html special symbol codes may appear in build status description on build results
- TW-21262 - VCS tree. Remove yellow highlighting on double click.
- TW-21263 - VCS tree. Hide "Discard your changes" alert.
- TW-21267 - Teamcity Server service does not stop when running as windows service and stopped from "services"
- TW-21270 - snapshot-dependencies array in json returned from rest api is invalid.
- TW-21274 - Enable/Disable agent broken
- TW-21285 - Error running TeamCity server via batch file: "... was unexpected at this time" (brackets in the JAVA_HOME path)
- TW-21295 - Investigation section shouldn't be shown when there are no problems in build configuration
- TW-21297 - Eclipse plugin. NPE.
- TW-21299 - Class not found exception in Eclipse plugin coverage part
- TW-21301 - LDAP group synchronization
- TW-21331 - NPE at ComposedBuildView.java:85 in IntelliJ IDEA plugin
- TW-21338 - Test stacktraces can occasionally collapse/expand not respecting mouse clicks on build results page
- TW-21339 - JavaScript error "TypeError: Cannot call method 'cancel' of undefined" on build results page

- TW-21351 - Inspections tab should suggest to open IDE
- TW-21372 - Eclipse: Login takes forever if view is visible but Eclipse is not in foreground
- TW-21373 - Builds with overridden VCS roots might be not represented as such (branch name is not a "significant" parameter)
- TW-21374 - Build config does not exist error
- TW-21376 - IDEA plugin should not flicker with 'Coverage preloader' modal dialogs
- TW-21379 - 7.1 EAP Clean-Up - unable to save
- TW-21382 - List of compatible agents is state in "Run Custom Build" popup of web version
- TW-21384 - Attach two mercurial vcs roots w/o checkout rules - get error "Failed to perform checkout on agent: null"
- TW-21388 - Popup is reloaded if mouse is over popup "triangle"
- TW-21406 - No way to assign investigation/mute a test from test details page
- TW-21413 - Build's credentials teamcity.auth.userId allow to access the server with too much permissions
- TW-21414 - cannot use buildServer in _notifications/email/common.ftl
- TW-21417 - Checking/unchecking an agent on build history pages brokes the layout drastically
- TW-21420 - Cannot create ClearCase VCS root: page loads empty: Attribute class invalid for tag saving according to TLD
- TW-21427 - Invalid tooltip is shown for the button
- TW-21454 - Cannot set build status to successful via service message: buildStatus status='SUCCESS'
- TW-21466 - Different fonts in popups on the same overview page
- TW-21478 - Projects popup closes on mouse out from popup opening area
- TW-21481 - Unable to save settings for "build history cleanup"
- TW-21506 - Completion icon is shown above text in Fail build on metric change build feature
- TW-21508 - 404 when triggering a custom build from edit-configuration page
- TW-21509 - The logon attempt failed error from Waffle in teamcity-server.log
- TW-21510 - NPE on Change log page
- TW-21515 - Prompt user to set values for <value is required> parameters
- TW-21519 - Cannot add build parameter
- TW-21527 - Cannot see stacktrace for some unexpected errors occurred in web UI
- TW-21530 - Incorrect triggered by (you) in the downloaded build log
- TW-21531 - No block descriptions in the downloaded build log
- TW-21549 - Git checkout error when VCS root is invalid with default build configuration parameters
- TW-21561 - Teamcity startup. Provide some information on start screen when database.properties file is corrupted.
- TW-21568 - Server startup. Do not require Maintenance Authentication Token on First Start.
- TW-21574 - Agent Side Checkout with Perforce on Win7 doesn't explicitly set P4CHARSET to none
- TW-21582 - "Remote run outgoing changes" fails if one outgoing change deletes file and another one reverts the deletion
- TW-21590 - NuGet Trigger does not fire
- TW-21602 - Do not assign investigation back to user who have marked it as "fixed" after a new failed build
- TW-21604 - Show disabled steps in the build log
- TW-21616 - Default 401 "Unauthorized" page on canceling credentials input after "Login using NT domain account"
- TW-21635 - Perforce. VCS tree. Duplicated mapping should be ignored.
- TW-21642 - Reorder steps dialog can be too tall (unable to confirm)
- TW-21651 - Improve LDAP warning message
- TW-21657 - Perforce. vcs tree should not include files/folders excluded by client mapping.
- TW-21660 - Maven settings uploaded: unable to "View in browser" or "Download file" when name contains spaces
- TW-21661 - It is possible to delete Maven settings file even when it's used in one of build configurations
- TW-21665 - TeamCity v7.0.3 fails to start with exception message: login module jetbrains.buildServer.serverSide.impl.auth.LDAPLoginModule not registered
- TW-21672 - Unexpected Error on login with no-JS browser
- TW-21674 - Wrong response on Register New Account form submit from no-JS browser
- TW-21681 - Broken layout in build short history
- TW-21682 - Support dotCover 2.0 assembly filters
- TW-21684 - Change comment presentation is broken on change details page: unclear where it is
- TW-21704 - Ensure NuGet 1.8 is supported
- TW-21713 - Incorrect "Error message is logged" build failure when no build script is present
- TW-21724 - Some branch names can break header layout (js error caused by lack of escaping).
- TW-21733 - Cannot filter permission in Add Permission dialog
- TW-21738 - Remote run dialog no longer populates the comment field with Perforce changelist description
- TW-21754 - Startup: Determine case when incorrect login or password is specified for PostgreSQL
- TW-21757 - ec2. Disable Stop button for not existing instances on Cloud tab.
- TW-21779 - Artifact dependency destination starting with space char won't work
- TW-21785 - TeamCity agents on EC2 may not read EC2 instance metadata
- TW-21792 - IE7 crashes when logged into TeamCity Enterprise Version 7.1 EAP (build 23373) after clicking Agents tab
- TW-21796 - Statistics doc does not cover test history
- TW-21808 - NPE during changes collecting
- TW-21824 - Project description (GitHub link) is displayed incorrectly in project's page
- TW-21829 - Support MSTest 2012
- TW-21836 - Same change mistakenly associated with 2 consequent builds
- TW-21850 - No database URL on startup maintenance screen when confirming data upgrade
- TW-21853 - Audit for a build configuration lists unrelated test mute actions
- TW-21856 - tooltip for my remote run won't show my changes
- TW-21858 - Eclipse plugin doesn't honor "svn:ignore" when collecting changes for remote run

- TW-21859 - .rvmrc file specification field does not support selection from VCS
- TW-21863 - "Top level" builds of a build chain are triggered with large delay (VCS trigger quiet period + parametrized VCS roots)
- TW-21867 - Change log with show builds option checked includes comments to builds and looks broken
- TW-21875 - Adding to clipboard on diff window adds dos-like EOL symbols
- TW-21885 - Strange TC behaviour was encountered during getting of .rvmrc file
- TW-21886 - Invalid output to log-file if entered RMV RC-file is absent
- TW-21907 - Let's add link to manual coverage setup
- TW-21910 - Predefined keys link is broken
- TW-21912 - NuGet trigger must report error is no package of given name was returned.
- TW-21927 - Server Startup. Provide appropriate message in UI when existing database schema is corrupted and cannot be loaded.
- TW-21928 - Graph can be not shown on Change Log, while "Show graph" option is on (page refresh case)
- TW-21938 - Personal change on MyChanges is shown without failed tests and finished builds
- TW-21941 - Support F4 shortcut to open build from changes view
- TW-21955 - Available agents in Custom run dialog can become out-of-sync with actual compatible agents (client side cache?)
- TW-21957 - Personal builds are treated as 'successful builds' in TeamCity build history cleanup
- TW-21959 - TeamCity shows tests as muted on muted tests tab only if there were test runs
- TW-21960 - Wrong pending changes
- TW-21963 - Cannot choose directory in VCS tree browser
- TW-21964 - Cannot specify empty label for Perforce via parameters: Unintelligible revision specification "
- TW-21965 - Wrong revision in build.vcs.number (added "(fixed)") for Perforce builds with VCS root-specified revision in label field
- TW-21968 - JavaScript injection in report tab name
- TW-21969 - Source can be not updated on agent when checking out Perforce label and advancing single file revision (server-side checkout)
- TW-21971 - Build configurations popup is closed on right mouse click
- TW-21987 - Multi-line commit description is not displayed properly in diff view
- TW-21994 - UI troubles in Build Parameters tab into Run Custom Build window.
- TW-21995 - "Show test in build log" link does not work when opening in new tab/window
- TW-22003 - JS error on selecting "Run recently failed tests first" checkbox for MSBuild runner (enableOrDisableGroup is not defined)
- TW-22004 - Wrong "Selected MSBuild tools version is not supported by selected MSBuild version" for 4.5 framework and 3.5 toolsVersion
- TW-22013 - Misplaced properties insertion icon for FxCop installatino root
- TW-22019 - Cannot handle OPTIONS HTTP request in a plugin controller
- TW-22030 - Eclipse plugin does not detect deleted files from subversion working copy v1.7
- TW-22035 - Per-checkin trigger can malfunction with several commits within same minute and Perforce client specified
- TW-22054 - Graph is broken on personal build changes
- TW-22070 - Resuming a build configuration with "Trigger a build on each check-in" enabled may cause enormous amount of builds triggered
- TW-22074 - No yellow highlighting for changed parameters in custom run build dialog
- TW-22077 - When a history build is started from the Change Log, redirect the user to the build configuration home page
- TW-22083 - Cannot look at the last file in Inspections report
- TW-22096 - Download Nuget dialog. Upload NuGet package. Added .nupkg file should be validated.
- TW-22106 - Remove parameters completion icon from branch spec as we do not support parameters there yet
- TW-22107 - Download patch to IDE icon disappears after show files is enabled
- TW-22146 - List of changes filtered by user must not show artifact dependency changes
- TW-22149 - Cannot put several builds on different brunches into the queue
- TW-22150 - Display brunch name in the build queue
- TW-22152 - Can use custom run build dialog to trigger build with wrong branch
- TW-22154 - New VCS root can be attached even if user cancels operation
- TW-22156 - VCS file listings for Perforce lists deleted files
- TW-22160 - Broken radiobuttons layout for Subversion externals support
- TW-22162 - No good way to differentiate build without branch from build on default branch
- TW-22165 - Missing test failure on Change Details and My Changes pages (fixed tests not shown)
- TW-22168 - <Branches> combobox is multiplied on the page when Run button is pressed.
- TW-22170 - Changes from additional branch are displayed in change log for <default branch> build.
- TW-22172 - Build configuration is showing "no finished builds for this configuration", but there are finished builds
- TW-22180 - Changes graph is corrupted for branches.
- TW-22184 - Too wide value of a step spoils layout of the steps configuration page
- TW-22197 - Confusing "true" on change log when filtering by path
- TW-22208 - incorrectly overly wrapped label for removing JDK in IntelliJ IDEA project
- TW-22210 - List mute options in mute test action in audit
- TW-22227 - Irrelevant audit actions appear for unchanged build configurations which have unicode symbols in settings
- TW-22255 - Property 'build' not found on type jetbrains.buildServer.controllers.buildType.tabs.ChangeLogArtDependenciesRow
- TW-22263 - Copying a project omits build configuration descriptions
- TW-22265 - Do not use option title for showing selected option in combobox with completion
- TW-22283 - HP-UX agents hanging after upgrade to TeamCity 7.0.3
- TW-22288 - Memory leak on Overview page in IE

- TW-22295 - Exception during agent status change
- TW-22298 - Build step number is missing in step header
- TW-22300 - Investigation dialog contents can get duplicated
- TW-22301 - Fonts troubles in build log window - log is not readable.
- TW-22308 - Agent matrix must show correct compatibility for disconnected agents
- TW-22313 - Bad history build changes popup if no changes were detected
- TW-22315 - VCS trigger can start builds for changes detected before it's configuration (branches case)
- TW-22320 - Agent pools. Impossible to add projects to Default pool after custom pool associated with all projects was deleted.
- TW-22344 - Upgrade Database Failure
- TW-22350 - "Unauthorized" page can rendered on login.html request
- TW-22353 - Inconsistent changes can be set to some parts of build chain when chain is continued
- TW-22357 - No newlines in test output when copied into clipboard in FireFox
- TW-22360 - During installation: Failed to install service "The system cannot find the path specified" if user account is specified
- TW-22365 - SQL Server database upgrade fails
- TW-22369 - Agent-side git checkout doesn't work with feature branches
- TW-22370 - Superfluous scrollbar on tray notifier login page
- TW-22380 - IPR Runner doesn't resolve parameters in path to project when project "Reparse" is invoked
- TW-22382 - SQL query very slow for maintenance (over 48 hours and still not finished) + SUGGESTION FOR FASTER QUERY
- TW-22383 - JS error in build configuration change log - Windows path is not escaped in JS
- TW-22386 - Unable to install TC plugin with IDEA 12 - "Failed to extract ZIP file"
- TW-22387 - Pager in Tests tab of a build resets scope
- TW-22401 - Too excessive debug logging "Some of the agents for build promotion...were filtered out as incompatible" -
- TW-22404 - Deadlock on IDEA startup
- TW-22406 - Project name is missing in add new artifact dependency dialog
- TW-22408 - Exception on attempt to see changes popup for history build
- TW-22411 - xcode-runner plugin when agent is started as a launchd daemon fails to initialize
- TW-22417 - Eclipse plugin. Provide some reasonable alert when pretersted commit fails because new folder is not added to SVN.
- TW-22419 - Eclipse+svn. When file is renamed changes are recognized in correctly.
- TW-22429 - Build was incorrectly triggered with "##unspecified##" branch name
- TW-22446 - Show fixed investigations on "my investigations" tab
- TW-22454 - Filter by build number does not work on Issue log page
- TW-22455 - Change files link is not shown on change log for changes from dependencies
- TW-22460 - No reaction to non-filled field "Scheme:" after Save button pressing.
- TW-22463 - Strange unexpected error message was encountered after "Check/Parse project" button.
- TW-22468 - Show fixed investigations on "my investigations" tab
- TW-22470 - When a coverage build finishes the coverage panel pops up
- TW-22475 - Display default branch for a build in UI
- TW-22478 - Build can fail with 401 (Unauthorized) error id basic authentication is disabled
- TW-22482 - TeamCity can launch many EC2 instances and shut them down immediately (TeamCity server non-synchronized clocks case)
- TW-22491 - Eclipse plugin. Correct copyright in About dialog and Online Help.
- TW-22494 - VCS checkout rules with Perforce agent-side checkout
- TW-22498 - TeamCity does not start if main-config.xml contains definition of some metric which already exists in the system
- TW-22499 - Scrolling doesn't work in the "Add selected users to groups" dialog window
- TW-22500 - Deadlock during inspection messages processing
- TW-22506 - Server hangs on stopping Windows service: Error 1053: The service did not respond to the start or control request in a timely fashion
- TW-22510 - Logging for HTTP ntlm login
- TW-22524 - Build configuration selector on change details does not work anymore
- TW-22528 - "Incompatible Gradle initialization script API" error when running Gradle build with recent Gradle 1.1 snapshots
- TW-22529 - A build from default branch can show a change from non-default branch after VCS root editing
- TW-22531 - VS addin installation fails on 7.1 EAP 23732
- TW-22536 - Eclipse plugin. "Shelve..." item is missing in context menu for packages and source code files in Package Explorer.
- TW-22540 - No items number in Compatible Agents tab for a build configuration
- TW-22541 - Improve logging of processing packages files in NuGet Publish runner
- TW-22542 - On ipr file parsing error - show in which file the problem is encountered
- TW-22551 - Unexpected alerts were encountered on IE8 and IE9 in case of invalid comment during manual build passing or failing.
- TW-22559 - RVM isn't configured correctly if PATH modified in Build Parameters
- TW-22562 - Confusing logging on 401 response if not logged in (forceProtocols set case)
- TW-22567 - Builds without changes can be marked as History if there is a cancelled build which was cancelled before its changes were collected
- TW-22581 - Popup over expand/collapse note in build log
- TW-22582 - Remove "copy to clipboard" action from the build log line
- TW-22584 - Build's changes may not contain changes which first appeared in another branch (+ changes graph is split

if filtered by branch)

- TW-22585 - Build can be incorrectly placed on Change log which make seem build contained changes which it did not
- TW-22586 - Middle click on branch name for a build does not open build configuration filtered by branch
- TW-22588 - Two "unspecified" options in custom run build dialog branch chooser
- TW-22589 - A build can trigger in unspecified branch from custom run build dialog without change selected
- TW-22590 - Unspecified branch is not properly displayed in the build results
- TW-22592 - Can trigger a build on not present branch: build will be marked as if in the branch, but will use default branch
- TW-22605 - Default branch should be displayed as a first branch on Branches view
- TW-22606 - Use branch name from the build on Branches tab
- TW-22607 - Display finished builds sorted by start time/id on Overview
- TW-22611 - Show default build branch on change details' Builds tab
- TW-22624 - "You do not have enough permissions to perform this action" on the build configuration history page for project viewers
- TW-22625 - Unstyled button "Reread Maven project data"
- TW-22630 - Make branch clickable on Agent history
- TW-22631 - Show build branch on search results (popup and page)
- TW-22632 - Project names are displayed in italic in Firefox in Add Snapshot dependency dialog
- TW-22641 - Wasted space on build Chains page
- TW-22644 - Poorly visible branch name on Build Chains page
- TW-22648 - Update dotCover filters description
- TW-22650 - Filtering drop down always displays all projects even if they does not contain entered text
- TW-22658 - On pressing Run button popup warning is missing when no compatible agents are enabled.
- TW-22662 - Add .NET 4.0 property for system.teamcity.dotnet.nunitlauncher.msbuild.task
- TW-22664 - Agent push configuration dialog may work incorrect
- TW-22675 - Wrong builds merging and wrong build checked-out revision (wrong branch used) for recently created branched VCS root
- TW-22676 - Branch names can be truncated when there is space to display more characters
- TW-22678 - Wrong VCS branch guessed for build on specific change
- TW-22685 - Artifact dependency on internal artifacts (.teamcity) fails with "Failed to resolve artifact dependency"
- TW-22686 - "UnsupportedOperationException: Method getVcsRoot() cannot be called for personal build" on personal build changes
- TW-22687 - Add branch name into build triggered by popup in the queue
- TW-22689 - Build is not considered failed to start if the first step fails to find build script
- TW-22690 - A build from a branch can incorrectly checkout default branch while VCS branch states otherwise (snapshot dependency involved)
- TW-22691 - Unable to run build after removing load rules from ClearCase VCS Root
- TW-22698 - Build chain does not start if some of the leaf builds can be substituted to already started builds but do not have compatible agents at the moment
- TW-22699 - Server provided inspections are not highlighted in editor
- TW-22700 - Duplicates fragments are not highlighted in editor when server side duplicates are enabled
- TW-22708 - Build fails when number of passed tests is too small
- TW-22716 - Unable to browse configuration artifacts when creating new Report Tab
- TW-22718 - Chooser shown under dialog in IE9
- TW-22719 - Build Step (X of Y): (X is missing in Google Chrome
- TW-22720 - Pressing 'Enter' in the search box in IE unintentionally triggers the first build in the list
- TW-22726 - java.sql.SQLException: Can't call commit when autocommit=true was encountered during migration to mysql
- TW-22729 - Wrong command line help for teamcity-server.bat service
- TW-22730 - Make sure 401 error response with login page content always has error message
- TW-22734 - Empty string corresponds to <Unspecified> branch in Branches dropdown combobox
- TW-22735 - Unexpected SQL exception: Data truncation: Data too long for column 'status_text' at row 1 in teamcity-server.log
- TW-22738 - Custom Run Build dialog on Branches tab. 'Include Changes' combobox should display <latest changes at the moment the build is started> by default.
- TW-22751 - Long delays between build steps when using .rvmrc REC support
- TW-22756 - AccessDeniedException in event handler
- TW-22769 - Build Configuration selector pops up in background, mostly unuseable
- TW-22771 - Auditing/history discrepancies
- TW-22782 - IE8 opens modal dialog windows only on white background.
- TW-22783 - IE8 cannot open modal dialog window - shapshot dependency editing.
- TW-22784 - Ensure Cleartool commands have inactive timeout
- TW-22787 - Teamcity is unable to resolve artifacts
- TW-22790 - Server upgrade can spoil the installation if critical error is encountered during backup
- TW-22792 - Changing Tabs on My Changes page does not work
- TW-22793 - Overview tab. Build statuses do not correspond selection in <branches> combobox.
- TW-22794 - Build configuration should be displayed with correct fail/success icon when it is filtered by branch.
- TW-22795 - Branch name is shown where there should be none
- TW-22800 - Server can send too many WWW-Authenticate headers in response
- TW-22810 - SQL 2012 DB initialization fails with "It looks like the database doesn't belong to TeamCity"
- TW-22818 - Build is marked as <unspecified> though it was run for selected branch on Change Log page.
- TW-22819 - Wrong graph for non-dag-based VCS root when some changes are excluded by checkout rules

- TW-22820 - Run custom build dialog. Respect user selection in Build branch field if selected change belongs to selected branch .
- TW-22828 - Do not show Pending changes for <unspecified> build.
- TW-22840 - Unneeded separator
- TW-22841 - dotNetRunners plugin has wrong version
- TW-22842 - Javascript error "cannot convert 'd' to object" on saving step parameters
- TW-22844 - Do not show changes from other branches not yet merged into the selected one on Change Log filtered by a branch
- TW-22846 - TC 7.0.4 is hanging on attempt to update build_state table
- TW-22849 - OutOfMemory error occurred during SVN externals processing
- TW-22855 - Recent branches from overridden VCS roots are not considered active in some views
- TW-22858 - Full branch name is used for build (/refs/heads/master) while short one s configured
- TW-22859 - "unknown error" collecting changes on wrong default branch name
- TW-22862 - Build with changed VCS settings (e.g. changed branch name) returns unsorted containing changes, which breaks the graph
- TW-22873 - Additional change actions are shown outside of build separator
- TW-22874 - Overview page. For projects with long name and/or description <branches > combobox overlaps failing/successfull builds data when project is collapsed.
- TW-22876 - Run Custom build dialog. Collapse combobox on Changes tab when user restores another combobox.
- TW-22880 - Edit Artifact Dependency: popups are shown behind the dialog
- TW-22881 - Custom Run Build dialog. <Default> branch should be selected in Build Branch when <All Branches> are selected in <branches> tab.
- TW-22889 - <Branches> combobox should be similar on Overview and Build Configuration Home pages.
- TW-22891 - User selection in <Branches> combobox on Overview page is displayed incorrectly in Internet Explorer 9.
- TW-22895 - Custom run build dialog. Do not show error notification when running build for change from merged branch.
- TW-22896 - LogInitializer fails when attempted to specify wrong path to the configuration file
- TW-22897 - Incorrect lines wrapping and extra line spacing in HTML email notification
- TW-22899 - VCS trigger can trigger builds for old branches after branch spec is specified
- TW-22910 - Misaligned default text in Projects popup filtering field under IE8
- TW-22913 - JavaScript error when attaching existing vcs root in IE8
- TW-22917 - PerfMon tab failure in IE8
- TW-22918 - Clicking on <branch> tag should open Overview tab with all builds from selected branch.
- TW-22931 - Projects can be not shown in the filtered multiple select (in Add New Snapshot Dependency dialog)
- TW-22941 - Wrong revision used for a build triggered by VCS trigger (branches + snapshot dependency)
- TW-22950 - Estimates are not calculated for dependent builds
- TW-22951 - If change in change log is found by path TeamCity always places it in pending changes group
- TW-22957 - TC VS Addin 7.1 want to make clean (not upgrade) install when TC VS Addin 7.0.3 is installed
- TW-22959 - Build agent installation doesn't work with Java Web Start
- TW-22964 - Agent statistics update: XML file does not appear to have any style information associated with it
- TW-22967 - MS Visual Studio 2008 cannot start with TC VS Addin 7.1
- TW-22973 - TeamCity fails to start with Tomcat connection pool
- TW-22975 - Maintenance page fails in case of errors during startup
- TW-22976 - Clicking Run of a build with "prompt" parameter opens Run Custom Build dialog without any tab selected
- TW-22987 - Pending changes are counted incorrectly if branch is excluded from branch spec.
- TW-22988 - .rvmrc created with rvm --rvmrc --create is not used
- TW-22991 - Do not show eye for guest user
- TW-23003 - Remote Run broken in IDEA Trunk for #23890
- TW-23006 - Build configuration history pager doesn't preserve selected branch
- TW-23010 - VS addin: Submit Feedback does nothing
- TW-23012 - "Unknown build problem" in case of missing build script and no meaningful message on build results
- TW-23036 - VS addin: downloaded coverage doesn't paint lines into covered/noncovered colors
- TW-23052 - Inspection and Duplicates finders (JAVA) do not work with Maven based projects
- TW-23056 - Unable to download agent from TC (TeamCity is not compatible with Tomcat 6)
- TW-23060 - Project builds summary might be not shown for the project on Overview
- TW-23084 - Wrong revision is suggested for a dependency build, when I select a change in the drop-down.
- TW-23091 - Unexpected java.lang.NoSuchMethodError during TeamCity war-file deploying.
- TW-23099 - Error when trying to deploy TeamCity to GlassFish 3.1.2 or 2.1.1
- TW-23100 - Run custom build dialog. Incorrect warning about not corresponding changes.

Exception

- TW-11809 - TeamCity Addin for Microsoft(R) Visual Studio(TM) could not load the required assembly JetBrains.Platform.TeamCity.Satellite. Could not load file or
- TW-12803 - TeamCity Addin for Microsoft(R) Visual Studio(TM) could not load the required assembly JetBrains.Platform.CommonServices. Could not load file or ass
- TW-15044 - VS add-in installer does not prompt to close Visual Studio before installing new add-in version.
- TW-18517 - SQLException: Cannot change transaction isolation level in the middle of a transaction
- TW-20874 - ui (?) Bug in agents view
- TW-21147 - EA-35594 - assert: CompositeElement.findChildByType
- TW-21395 - NPE in ChangeLogRow.getSortingIndexes

- TW-21526 - TestManagerImpl.createTest: Argument 1 for @NotNull parameter (using incorrect URL)
- TW-21718 - Exception(s) after upgrading to 7.0.3 final
- TW-21731 - Exception: cannot read property: messageOnDelete on Maven settings page on attempt to view maven settings file
- TW-21825 - exception on start
- TW-21934 - The lifetime has already been terminated. Object name: 'Lifetime'.
- TW-21935 - ParentFolder != null for file UploadController.cs
- TW-22023 - java.lang.IllegalArgumentException: Argument 0 for @NotNull parameter of jetbrains/buildServer/serverSide/impl/FindPromotionStrategyFactory.create must not be null when deleting a build configuration that has items in the build-queue
- TW-22026 - Duplicate themed Icon Folder in Icon Pack
- TW-22164 - Read access is allowed from event dispatch thread or inside read-action only
- TW-22173 - ParentFolder != null for file Transition.cs
- TW-22174 - ParentFolder != null for file ft.mktData.Utils.BASE.sln
- TW-22175 - Object reference not set to an instance of an object.
- TW-22176 - ParentFolder != null for file Class1.cs
- TW-22178 - ParentFolder != null for file ft.mktData.Utils.BASE.sln
- TW-22239 - NumberFormatException on Test details tab
- TW-22497 - Exception in Eclipse plugin.
- TW-22817 - Directory is not found: C:\Work\structure.txt

Performance Problem

- TW-9686 - VcsUtil.getRelativeFile is called 3 times for each file during a remote run initiation from IDEA
- TW-17880 - 'Remote run outgoing changes' with Git may freeze IDEA UI for few minutes
- TW-18507 - Remote Run (Git): searching for suitable configurations way too long (~30 seconds)
- TW-20358 - "Searching for suitable configurations" on buildserver.labs.intellij.net taking ages and then fails by timeout
- TW-20649 - Checking for changes takes a long time after upgrading to TeamCity 7
- TW-21397 - NuGet Trigger - Performance Issues
- TW-21503 - TC7 slow web UI because of new feature
- TW-21522 - Assign investigation for test sometimes works too slow
- TW-21712 - Build chains tab is opening too slow
- TW-22125 - TeamCity builds getting stuck "checking for changes" (slow VCS root in a chain is blocking all others)
- TW-22441 - Speedup committers calculation in changes popup
- TW-22522 - Slow Audit view loading

Cosmetics

- TW-4001 - Adjust service names
- TW-4785 - "Show failed" label is shifted in IE
- TW-9562 - Inconsistent service names and description
- TW-14524 - Header is not extended till the right end of page canvas (too long log lines case)
- TW-15388 - Inconsistent actions popup for Build configuration and Test
- TW-17156 - "Failed to start build" message too narrow
- TW-17339 - Improve wording in "The TeamCity license will expire in 1 days." warning
- TW-17653 - Make artifacts resolving build log more clear (use name of the source build configuration)
- TW-17751 - Incorrect plural ending in VCS trigger UI: quiet period = "1 secondS"
- TW-18146 - Build configuration page breadcrumb looks confusing when description is too long
- TW-18959 - Overview page: Let's place 'Some successful build configurations are hidden' label on the top of the page near 'Hide Successful' checkbox
- TW-20357 - Improve attentionComment style so that it never stick together with neighbour elements
- TW-21000 - IDEA plugin. Failed Tests tab. Disable Navigate and Run actions in context menu for multiselected tests.
- TW-21160 - Invalid layout on Files tab of Change Details page in case long file paths
- TW-21365 - Message "Loading test details" is not properly aligned
- TW-21419 - Wrong width of actions section on build configuration administration page
- TW-21623 - Muted tests's page section title is confusing.
- TW-21664 - "dependends" typo
- TW-21688 - Wrapping in files popup header is incorrect
- TW-21775 - Incorrect wording for insufficient permissions
- TW-21795 - "Copy project" dialog: incorrect layout of controls
- TW-21822 - Empty build actions look not so nice, may be shouldn't be displayed at all
- TW-21911 - < cosmetic error when selecting debugging preset
- TW-21916 - Failed build status updated via service message lowercases first letter
- TW-21919 - Bad browse files icon layout in Ruby environment configurator build feature
- TW-21976 - Torn author element in build line
- TW-21990 - Add title to history table for branch name column
- TW-22062 - Incorrect placement of (History build) marker in change log
- TW-22091 - Download Nuget dialog. Error message corrupts the dialog in Chrome when Nuget cannot be installed.
- TW-22098 - "Test history" vs. "Test Details"
- TW-22112 - Need better separation (and presentation) of artifact dependencies in change log

- TW-22161 - My Investigations page: bad layout when grouping is off
- TW-22214 - Brush up resolution presentation on test history page
- TW-22272 - Typo in Git VCS root authentication settings
- TW-22286 - Don't show duration for 0 tests
- TW-22354 - Polish branch name in build queue
- TW-22389 - Issue tracker integration dialog - "Connection Type" is not aligned properly
- TW-22490 - "Edit VCS Root" - inconsistent capitalization of words
- TW-22533 - Brush up alignment of Project top-right controls
- TW-22545 - Columns have different width without obvious reason in VCS roots revisions table
- TW-22639 - Non-custom drop-down in Edit artifact dependency dialog
- TW-22654 - Options outside of optgroups should not be indented
- TW-22695 - Do not use custom green/red colors for Mark build as failed/successful, use standard presentation
- TW-22772 - Make Ruby interpreter settings in Rake runner similar to Ruby environment configurator
- TW-22815 - Clicking on icon in <Branches> combobox collapses/expands the project instead of branches list on Overview page.
- TW-22906 - Duplicated information on "TeamCity Database Creation" view.
- TW-22929 - Backup UI note about backuping running builds incorrect
- TW-22939 - Do not display "TeamCity Maintenance" title when TeamCity is starting
- TW-22980 - Strange font on view settings page in IE 9
- TW-23042 - Table word wrapping on "Add build trigger" page
- TW-23043 - Visual glitch - shift for "Investigation" on build configuration page
- TW-23137 - Confirmation message for "new build configuration created" shows title HTML encoded.
