

Farady 7.0.3 (build 21424) Release Notes

Usability Problem

- TW-20008 - Parameters can be displayed not sorted
- TW-20849 - TC 7.0 does no longer remember personal build parameters when starting a new build from a previous personal build page
- TW-21136 - Build chain run button display issue in IE8

Bug

- TW-16621 - VS adding failed to post changes to TeamCity server
- TW-17283 - "Artifact paths" in "General Settings" are not trimmed
- TW-20323 - Mercurial 2.1 is broken in TeamCity
- TW-20446 - Maintenance Authentication Token Missing
- TW-20886 - Could not find property 'all' on SourceSet container.
- TW-20965 - Agents not connecting after reboot on 7.0.1
- TW-20970 - Agent stuck in 'restarting' state
- TW-20974 - Parameter of type "password" appears in plain text in teamcity-agent.log
- TW-20976 - A failed test might not result in a failed build when the test changes its name during the build run
- TW-21022 - MSBuild under mono fails - dependency on Microsoft.Build.Utilities.v4.0
- TW-21041 - IDEA plugin fails to prepare remote run
- TW-21042 - JavaScript error "Object doesn't support this property or method" on clicking on archive file in artifacts (Internet Explorer)
- TW-21043 - Cannot download all artifacts in Internet Explore via SSL: Unable to open this Internet site.
- TW-21044 - Spelling Error on TeamCity Installation Page
- TW-21046 - Inspections (.NET) hanging build in case solution-wide analysis is turned on
- TW-21048 - NuGet trigger does not support paging on linux
- TW-21050 - NuGet 1.7 may not be unpacked
- TW-21052 - After Upgrading from TeamCity 7.0.1 to 7.0.2 agents cannot be started from commandline if JAVA_HOME is not defined
- TW-21061 - Support solution-wide packages.config files for NuGet
- TW-21062 - Project-level parameters are copied into build configuration on project copy
- TW-21069 - JavaScript injection via IDs in URLs
- TW-21103 - Using %teamcity.nuget.feed.server% variable in a NuGet trigger fails
- TW-21129 - Performance Problems with Adding Snapshot Dependencies
- TW-21138 - TFS URL with space %20 characters build issue, work around not working in v7.0.2 (build 21349)
- TW-21154 - Build can fail with reason "Client time zone already set for this build" probably because of race condition
- TW-21195 - Migration from 4.5.6 to 7.x.x fails: Converter 472: Cannot insert the value NULL into column agent_type_id, table agent_type_bt_access
- TW-21199 - Downloading dotCover snapshot with VS addin results in message "Too short file"
- TW-21222 - Corrupt Artifact Dependencies
- TW-21248 - Can't display more then 366 projects on the projects main-page
- TW-21321 - Agent failing to upgrade to 7.0.2
- TW-21349 - Cannot get build configuration by name via REST: only one project is searched
- TW-21353 - Incorrect line numbers in code snippets areas of Duplicates browser
- TW-21356 - VCS (Mercurial) issues after upgrading to TeamCity Enterprise 7.0.2 (build 21349)
- TW-21357 - NuGet Update does not detect new version
- TW-21375 - TeamCity Maxing out CPU, Memory, and Slamming SQL Server
- TW-21396 - Incorrect links to the archived projects page
- TW-21398 - TeamCity throws exception in investigation dialog when running in Tomcat 7.0.27
- TW-21423 - TeamCity may not merge builds in queue if some chain and sub-chain are in the queue and sub-chain has the same set of changes as chain
- TW-21441 - Possible NPE on viewing report tab from archive
- TW-21455 - TeamCity 7.0.1 Hanging on Checking for Changes After Upgrade
- TW-21457 - CME is thrown from fireMessageLogged if Agent is started under IBM JDK
- TW-21458 - DB Deadlock starting build: select max(bs.modification_id) from build_state ...
- TW-21487 - Configure command-line remote runner crashes with exception

Exception

- TW-18756 - IOException in ClearCase log
- TW-20780 - Error executing dispatcher action TFS::DoUndo on <NULL>:1. TF30063: You are not authorized to access tfs.vanbc.mps.com\DefaultCollection. The remote s
- TW-20861 - Exception in Model.Update Object reference not set to an instance of an object.
- TW-21075 - myDirectoryTreeGroupProvider is null!

- [TW-21146](#) - EA-35624 - NPE: BuildServerManager\$MyLoginCallback.successfullyLogged
- [TW-21391](#) - EA-35762 - assert: ComponentManagerImpl.getComponent

Performance Problem

- [TW-17986](#) - When there are many builds in the build queue, selecting all and then invoking delete updates the build queue quite slowly
- [TW-21122](#) - Cache of resolved vcs root instances does not work properly in 7.0 causing a lot of unnecessary calculations
- [TW-21145](#) - Detection of clashing configurations in Swabra significantly slows down startup of the builds
- [TW-21157](#) - Investigate Dialog doesn't close
- [TW-21250](#) - Inability to parse Maven meta data on server (failed to load pom.xml file content) can cause significant slowdown
- [TW-21286](#) - Optimize processing of multi-line client mappings
- [TW-21411](#) - TeamCity can eat too much CPU in case if parametrized VCS root is used in many inter-dependent build configurations
- [TW-21412](#) - TeamCity spends too much time optimizing build queue if there are a lot of inter-dependent builds in it
- [TW-21439](#) - Ldap synchronization queries users too often
