

# Maia 95.146 Release Notes

|                                  |   |
|----------------------------------|---|
| J2EE.Hibernate                   |   |
| IDEA-18758 (Feature)             | Hibernate AnnotationSessionFactoryBean configuration not parsed                         |
| J2EE.EJB3                        |   |
| IDEA-54516 (Bug)                 | EJBQL alias and "not exists" commands   |
| Version Control.<br>Subversion   |   |
| IDEA-54861 (Performance Problem) | AWT-EventQueue blocked on Subversion worker thread                                      |
| HTML.Editing                     |   |
| IDEA-53214 (Feature)             | Add support for HTML5   |
| JavaScript                       |   |
| IDEA-53573 (Feature)             | javascript: recognize native "JSON" object  |
| IDEA-54872 (Feature)             | Method separators don't work in ActionScript  |
| IDEA-54525 (Bug)                 | JavaScript structure window showing structure locally used (not declared) objects       |
| Flex Support                     |   |
| IDEA-54299 (Task)                | Make it easier to increase Flex compiler heap size                                      |
| IDEA-54791 (Bug)                 | flex: namespace field shows up twice in Ctrl-F12 / structure view                       |
| IDEA-54339 (Bug)                 | Flex: Optimize imports does not honor CONFIG blocks                                     |
| IDEA-54889 (Bug)                 | Generate Getter/Setter doesn't format correctly with AS3 metadata                       |
| IDEA-54845 (Bug)                 | Flex conditional breakpoints: suggest to stop in case of condition evaluation failure   |
| IDEA-54822 (Bug)                 | Flex .mxml inspection, false complains about fx:XMLList in flex 4                       |
| IDEA-54995 (Bug)                 | Metadata attribute value can be reference expression, right now is not parsed correctly |
| IDEA-54804 (Bug)                 | Do not red highlight conditional variable references in library sources                 |
| IDEA-54786 (Bug)                 | flex: bad code green: final var/const   |
| IDEA-54823 (Bug)                 | Flex: Good code yellow - function recurses infinitely                                   |
| IDEA-54785 (Bug)                 | flex: "const" keyword not offered for completion where expected                         |
| IDEA-54783 (Bug)                 | flex: good code red: unresolved reference to trace() function in static function        |
| IDEA-54780 (Bug)                 | flex: "Copy Reference" action should work for references, not only definitions          |
| IDEA-54781 (Bug)                 | flex: Ctrl-Shift-Enter places semicolon in wrong place                                  |
| IDEA-53625 (Bug)                 | IDEA doesn't recognize Alchemy SWC  |
| IDEA-54964 (Bug)                 | Autocomplete for Spark non visual components does not work                              |
| IDEA-54948 (Bug)                 | [Flex] Debugger Variables scope not matching  |
| J2EE.Spring                      |   |

|                                |   |
|--------------------------------|---|
| IDEA-25752 (Bug)               | spring + hibernate facet. AnnotationSessionFactoryBean.packagesToScan not supported         |
| Maven Integration              |   |
| IDEA-54967 (Cosmetics)         | New Project Wizard Label misspelled   |
| User Interface                 |   |
| IDEA-51802 (Usability Problem) | Checking a box in Code Style/Spaces makes the preview to scroll down                        |
| OSGi Support                   |   |
| IDEA-54704 (Bug)               | OSGi: Directory-based bundles cause error on startup  |
| Groovy/Grails                  |   |
| IDEA-49581 (Feature)           | Add Code Completion for GSP tag attributes names  |
| IDEA-47937 (Feature)           | [Grails 1.1] add <tmpl> gsp tag support   |
| IDEA-54898 (Bug)               | Grails 1.3.0 unit tests fail but IDEA always says "All tests passed"                        |
| SQL                            |   |
| IDEA-48717 (Bug)               | SQL: Oracle: reference to alias defined in UNION query in parenthesis is not resolved       |
| IDEA-54990 (Bug)               | mysql: strange Ctrl-P popup for now()   |
| No subsystem                   |   |
| IDEA-51452 (Bug)               | Cannot edit scopes  |
| Version Control                |   |
| IDEA-53894 (Bug)               | IDEA is unable to show diff for shelved new files   |
| AspectJ                        |   |
| IDEA-54963 (Bug)               | AspectJ: Cannot invoke "Change signature" refactoring from definition/reference in .aj file |
| IDEA-54408 (Bug)               | AspectJ: live templates don't work in .aj files   |
| CSS Editing                    |   |
| IDEA-54629 (Bug)               | Valid Flex CSS property value is highlighted as error                                       |
