

YouTrack

What is YouTrack

YouTrack is a web-based [bug tracker by JetBrains](#). YouTrack's key features include:

- Query-based issue search as an alternative to traditional issue filters.
- All issue attributes are customizable so you can define your own issue attributes with the exact values you need.
- Customizable Workflow to define the life-cycle of your issues according to your process needs.
- Extensive keyboard support to make it easy to create, edit, and navigate between issues using keyboard.
- Commands to quickly execute batch operations upon selected queries.

YouTrack is being developed using [JetBrains Kotlin](#) and is used for tracking [JetBrains own products](#) including IntelliJ IDEA, TeamCity, and others.

Current Version

YouTrack 2018.1 is currently available for [download](#) and [purchase](#).

Builds of previously released YouTrack versions and YouTrack tools are available for download at [YouTrack Release Downloads Archive](#).
