

# FAQ

This section covers questions related to TeamCity TestDrive.

## Why my build can't start with 'no compatible build agents' message?

TeamCity check whether it can run build on specific build agent based on agent requirements.

Find more about agent requirements [here](#).

## Why there are no Windows agents available out-of-the box?

Providing Windows-based agents violates [Microsoft license agreement](#). Specifically it is not allowed to lease virtual or physical machines with Windows installed.
