

# Calcutta EAP (build 8137) Release Notes

Multiple bugfixing, including, but not limited to:

- [TW-5653](#) Changing VCS server settings can cause inability to view diff for old detected changes
- [TW-6399](#) Builds hang in "Checking for changes"
- [TW-1884](#) Sort failed tests on the build results by new/old (new on top)
- [TW-6075](#) Use optimized SVN checkout on agent (update revision only when directory is affected)
- [TW-6319](#) Publish artifacts, mstest, fxcop messages do not work if ##teamcity ... is not on the beginning of the message
- [TW-6321](#) Eclipse plugin: Perforce: RemoteRun commit fails sometimes
- [TW-6411](#) Perforce: DelayedCommit fails if resources to commit belongs to different Perforce's Workspaces
- [TW-5376](#) Provide LaunchDeamons startup files for build agents on MacOSx
- Multiple Clearcase fixes, both for BASE and UCM
- SVNKit upgraded to 1.2.1 version
- Deadlock fixed which occurs when configuration files are modified during cleanup process
