

How to install Chrome extension

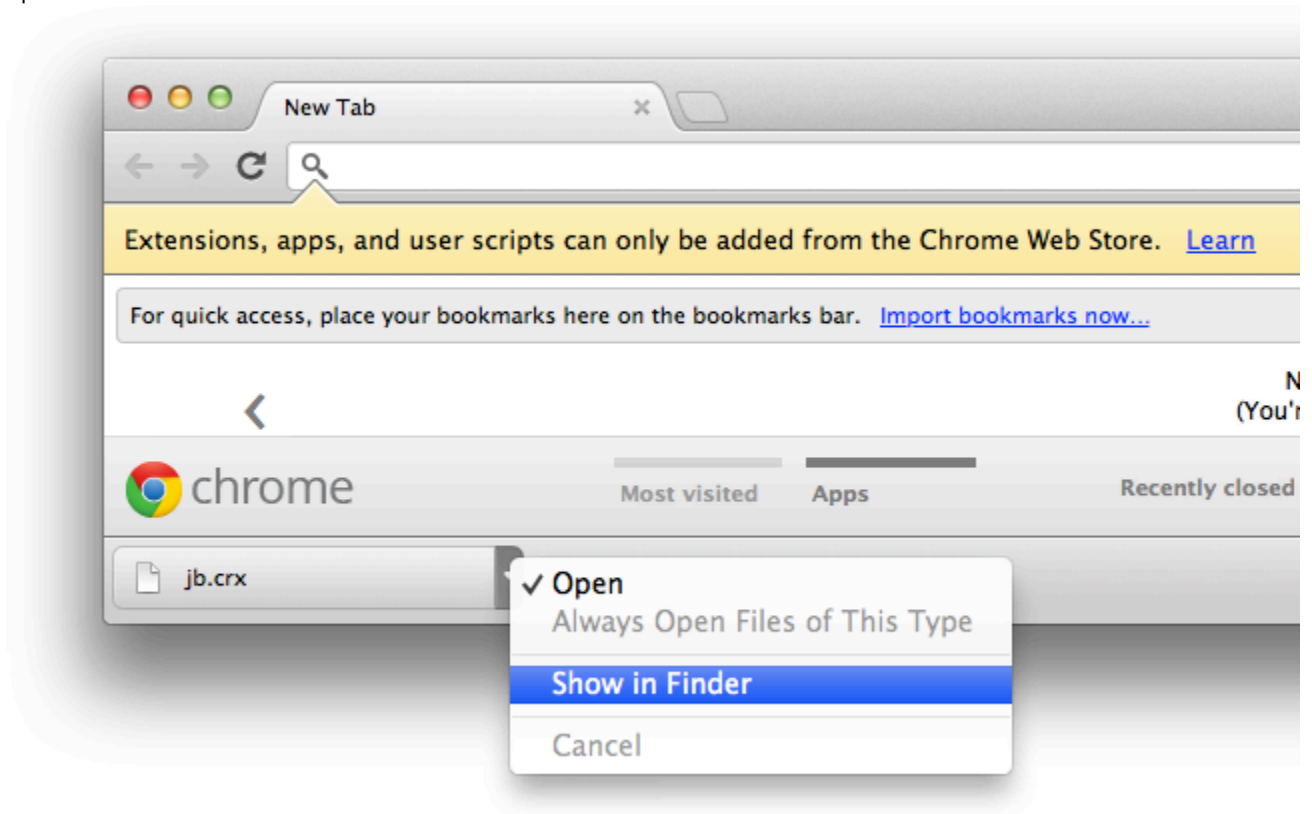

Since 126.129+ or 125.44+ JetBrains Chrome Extension renamed to JetBrains IDE Support and [available in the Chrome web store](#).

Don't try to use this new extension with incompatible builds — it will not work.

Installing LiveEdit in Chrome

You don't need to restart browser to install JetBrains Chrome Extension. But if browser is not running, you don't need to do anything — extension will be installed silently on first launch.

1. Download <WebStorm.app>/plugins/JavaScriptDebugger/extensions/jb.crx.
2. Open context menu for downloaded item and

3. Open `chrome://chrome/extensions/` and drag the file onto the Extensions page.
