[TeamCity 8.0.2 \(build 27482\) Release Notes](#)

[TeamCity 8.0.1 \(build 27435\) Release Notes](#)

[TeamCity 8.0 Release Notes](#)

Feature

- [TW-13145](#) - Bundle Ant dependency libraries to allow for easy FTP and other tasks usage
- [TW-16446](#) - Make "use external database" note a red one if internal database size grows over certain limit
- [TW-28975](#) - Try to re-clone repository if hg fails with abandoned transaction found error

Usability Problem

- [TW-25336](#) - Not user-friendly message on database and configs version mismatch
- [TW-31514](#) - Confusing project/build configuration visibility on overview
- [TW-29606](#) - Display projects hierarchy in Agent pools associated projects lists
- [TW-30215](#) - New project note on overview page must be shown only about the new subprojects of already visible projects
- [TW-30396](#) - Nuget Server setup page has wrong link to 'enable guest login' option
- [TW-30579](#) - VS addin suggests to autodetect directories after disabling subversion support
- [TW-30395](#) - Sort Nuget versions in descending order on Add Nuget dialog

Bug

- [TW-30885](#) - Template is moved to the upper project on copying project with subprojects
- [TW-30902](#) - No changes displayed in TeamCity when checkout rules are configured
- [TW-30908](#) - Moving a VCS root to a new project does not check to ensure that an existing VCS root with the same name does not already exist in that project - corrupts data.
- [TW-31296](#) - NullPointerException in IDEA project runner
- [TW-31317](#) - Test mute dialog from parent project Current problems page still suggests to mute in sub-project
- [TW-14223](#) - Agent starts and reconnects constantly (server chooses wrong agent address from the set)
- [TW-17950](#) - During cleanup server responses with HTTP 200 code and "Cleanup in progress" HTML page to every request
- [TW-22299](#) - SVN repository for VS solution auto (including forced) detection does not work.
- [TW-27715](#) - java.lang.ClassCastException: jetbrains.buildServer.serverSide.impl.auth.SecuredRunningBuild cannot be cast to jetbrains.buildServer.serverSide.SFinishedBuild
- [TW-29677](#) - Red/Green colors in TeamCity 8.0 are harder to distinguish for people with not 100% color vision
- [TW-29834](#) - An extra space in the database.properties file can cause confusing errors on server start
- [TW-30228](#) - NuGet Feed authentication does not work in NuGet 2.5 and 2.6
- [TW-30415](#) - LDAP plugin creates/removes users during user synchronization, which breaks compatibility with 7.1.x
- [TW-30589](#) - Erroneous Error Notification with each Run
- [TW-30596](#) - "Investigate" dialog is too tall
- [TW-30663](#) - Rest API call for changes results in BadRequestException: Both parameter 'build' and same-named dimension in 'locator' parameter are specified
- [TW-30682](#) - Filtering does not work in Enforce clean checkout / choose agents dialog
- [TW-30886](#) - Add permission and include role dialogs are opened at the top of the page
- [TW-30906](#) - JavaScript injection on notification rules page from the build configuration name
- [TW-31039](#) - "Cannot find commit" errors for Forked Stash repos
- [TW-31068](#) - Shared resources: More builds can start when there are custom resources available
- [TW-31118](#) - Current Problems Tab-> Build Config Problems ->Build Problems: No pop-up
- [TW-31152](#) - Hidden project first time expand does not show subprojects
- [TW-31191](#) - Web UI can show cached icons from previous TeamCity version
- [TW-31268](#) - Custom Build Trigger (from a plugin) doesn't persist secure: fields
- [TW-31348](#) - Endless loop on Overview (AccessDeniedException: You do not have enough permissions to access VCS modification with id)
- [TW-31475](#) - Building of a patch in Perforce can fail because of "Perforce password (P4PASSWD) invalid or unset" error
- [TW-31493](#) - After removing dependent configuration builds in dependency stop triggering
- [TW-31512](#) - Metadata storage is not cleaned up when build is removed manually
- [TW-31538](#) - Build configuration ID is not changed in plugin-settings.xml
- [TW-22564](#) - Agent cannot connect (Server's agent id do not match my agent id): two agents can open the same port without error (different Java versions)
- [TW-28187](#) - Diff view does not show image file content with "Requested file was not found in the change list:" in the pane for files with special symbols
- [TW-28328](#) - Can't Check out directories from SVN Trunk (Cannot replace a directory from within case)
- [TW-29552](#) - Build hangs on Checking for Changes

- TW-30001 - Ensure NuGet 2.6 is supported
- TW-30210 - SSL problems when connecting to HTTPS from TeamCity
- TW-30345 - Mercurial VCS roots failing to pull
- TW-30655 - Cannot connect to remote Git repo via HTTP and PROXY Server
- TW-30890 - Project administrator cannot delete projects (no admin roles in parent project case)
- TW-30897 - Charts not Displayed Correctly in Chrome (Mac OS)
- TW-30898 - Bulk edit IDs does not work when VCS roots and build configurations have the same external ID
- TW-30941 - Copy project action becomes unavailable in dropdown list
- TW-30987 - Reset all action doesn't work on Remote Run in TeamCity in IDEA addin
- TW-31001 - Unformatted server health page after saving vcs root
- TW-31027 - VCS Problems Github
- TW-31049 - fail to load viewModification.html page
- TW-31153 - Agent pools. Disable selected projects in Assign Projects popup.
- TW-31175 - "JSchException: verify: false" error during git VCS root changes collecting
- TW-31207 - Step with "Only if build status is successful" execution condition is run when build is canceled
- TW-31213 - Personal build does not show in My Changes tab, even though it was run
- TW-31277 - Russian characters displayed incorrectly in build log
- TW-31312 - TeamCity can stop re-reading ldap-config.properties file until restart
- TW-31323 - EditProject controller must not require presence of currentProject in the model
- TW-31325 - No changes displayed if variable used to specify default branch
- TW-31333 - ArrayIndexOutOfBoundsException during branch specification parsing
- TW-31381 - Error collecting changes for VCS repository
- TW-31481 - Administrator can't change email notifications for users

Exception

- TW-31015 - Swabra plugin is not working anymore

Performance Problem

- TW-30919 - Patches are not cached with server-side checkout when they should

Cosmetics

- TW-30229 - NuGet Package Sources setting to mention %teamcity.nuget.feed.auth.server%
- TW-30581 - UI - Capitalize Add new build trigger
- TW-31029 - Mistake in pre-tested commit error
- TW-31252 - Typo "temaplte" in meta runner configuration page
