

EAP 6951 Release Notes

New order of intentions

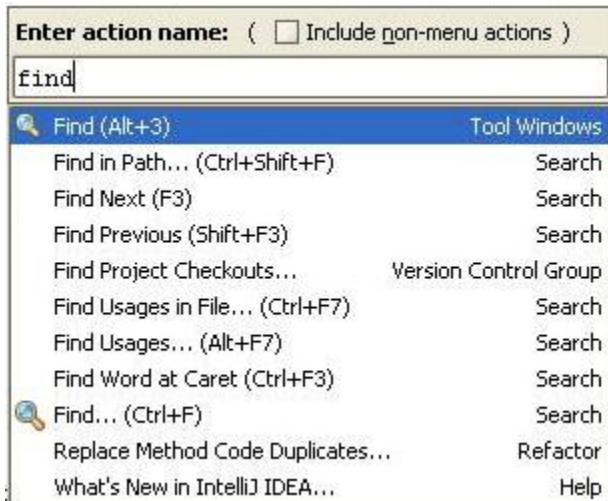

Intentions in the popup lists are divided into three groups (and sorted within each group alphabetically):

- Quick fixes (red bulb, fixes the red problem in the code)
- Inspection quick fixes (yellow bulb, deals with the yellow code somehow)
- Intentions (proposes some action or code transformation)

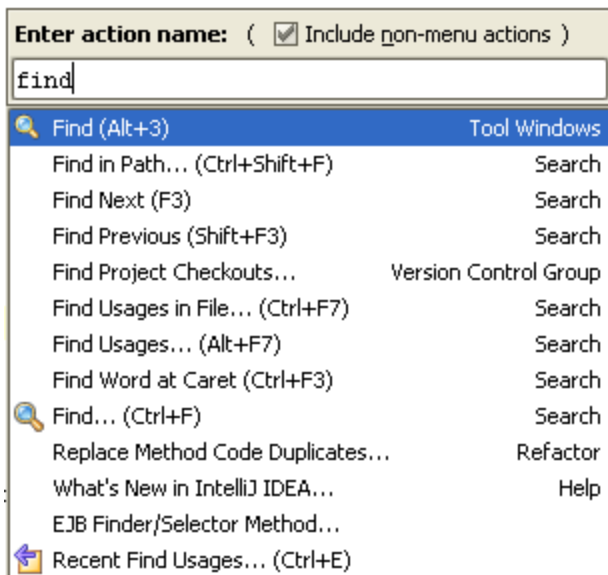

New action "Goto Action" (Ctrl Shift A)

Find actions available from main menu:

'Include non-menu actions' checkbox includes actions available from toolwindow toolbars/popup menu:

New Committed/Incoming Changes functionality ("TMate replacement")

- Supported for CVS, Perforce and Subversion
- Local caching of changes history
- Grouping (by user or date) and filtering (by user or project structure) support
- Automatic refresh by timer
- "Incoming Changes" view shows list of changes not yet downloaded from server
- Actions to open a committed revision of a file in the editor and to compare the committed revision with the local version
