

Fools Day Plugin

General Info

License	As-is, use at your own risk
Type	free, open-source
Current version	0.2

Plugin Description

Features:

- Running Run buttons on Projects page (activated with probability after browser window focus losing)
- Scrambling text labels (activated with probability in ten seconds after browser window focus losing)
- Ability to enable/disable plugin on the server configuration (plugin is auto-reset on server restart)
- Bonus funny icons (see below)
- "Shooter" mode. Don't mute your sound! (activated with probability after browser window focus losing)
- Test fixing mode: See Failed tests on the builds results.

[Example Screenshot](#)

Installation Instructions

- Put jokes.zip in `..BuildServer\plugins`
- Restart TeamCity server
- Enable the plugin in the Server Settings "Joke plugin settings" section. The plugin will be automatically disabled on the next server startup.

See `joke.js` code for minor customizations: probability, etc.

TeamCity Versions Compatibility

The current plugin version is designed to work with TeamCity 4.0 and up.
Tested with TeamCity 4.1 EAP, should work with TeamCity up to 6.0.3 and may be above

Sources

Sources are available in JetBrains public Subversion [repository](#).

TeamCity 3.1 versions

Previous version for TeamCity 3.1 is available [download](#).
To install it, copy plugin jar file into `<TeamCity Web Application Directory>/WEB_INF/lib`.

Bonus: Funny running and failing build icons

Use these icons instead of default TeamCity images for running build states

- substitute default `img/buildStates/running_green_transparent.gif` image

- substitute default `img/buildStates/running_red_transparent.gif` image

History

Date	Changes	Compatibility	
April, 1, 2009	New features: Shooter, test fixing	TeamCity 4.0 - 6.0.3 and above	download
April, 1, 2008	Initial release. Text reversing, running "Run" button.	TeamCity 3.1+	download
