

SonarQube plugin

General Info

Vendor	JetBrains
License	Apache 2.0
Type	free, open-source
Sources	https://github.com/JetBrains/TeamCity.SonarQubePlugin
Binaries	Sonar plugin on http://teamcity.jetbrains.com/

TeamCity Versions Compatibility

SonarQube plugin is compatible with TeamCity 8.1 and higher

Plugin Description

TeamCity integration with SonarQube via the SonarQube Runner.

Usage

See [SonarQube Integration](#).

Status

A working prototype is ready.

Features

- Easy SonarQube Runner deployment and configuration
- SonarQube Server connections management
- Test results locator. Works for Surefire and MSTest reports at the moment
- JaCoCo coverage result locator
- Navigation to SonarQube Server from the TeamCity UI: the View in sonar link on the Build Results page takes you to the sonar dashboard of the analysed project once the build is finished.
- SonarQube`s [Build Breaker plugin](#) support
