

# Eluru 6.5.1 (build 17834) Release Notes

## Feature

- [TW-17039](#) - Support TeamCity plugin update in Eclipse 3.7

## Usability Problem

- [TW-16521](#) - Select/Deselect All for bulk tests mute
- [TW-17107](#) - Duplicates finder (.NET) configuration is misleading
- [TW-13597](#) - Visible build configurations option set on overview page should be kept on project overview tab

## Bug

- [TW-12390](#) - Using "-recurse" parameter for "lshistory" ClearCase command can fail
- [TW-16502](#) - Mute popup shows current mute info, when there are no current mute info
- [TW-16748](#) - Error in IDEA plugin running under JDK 1.6.0\_21 (or 1.7): Cannot construct jetbrains.buildServer.users.UserData as it does not have a no-args constructor
- [TW-16798](#) - Build Configuration doesn't fail on "Failed to start" errors
- [TW-16843](#) - system.teamcity.agent.build.checkoutDir.expireHours=never doesn't work
- [TW-16981](#) - Do not log complicated exception if failed to run .NET test runner
- [TW-17025](#) - Error on copying a build configuration in another project: InvalidVcsRootScopeException: VCS root 'YYY' is not accessible from the build configuration: XXX
- [TW-17078](#) - Conversion exception in SecureSMTPSettingsConverter
- [TW-17094](#) - Upgrade to 6.5: RemoveUnusedTestNamesConverter takes too long time
- [TW-17100](#) - Exception on MyChanges page
- [TW-17110](#) - Xml test reporter fails to detect NUnit suite in case of abnormal termination
- [TW-17113](#) - Hiding of the build configurations does not work on Project page
- [TW-17120](#) - Cleanup takes hours after upgrading to 6.5 (Oracle database)
- [TW-17135](#) - No coverage statistics values reported for NCover3
- [TW-17155](#) - NPE in ResponsibilityFacadeImpl.convertToTestNameEntry
- [TW-17164](#) - Assembly Info patcher does not patch versions in managed VC++ and VB projects
- [TW-17181](#) - action.html?add2Queue environment variables are no longer set correctly
- [TW-17182](#) - NPE on test details page
- [TW-17183](#) - "Start investigation" command is available for guest on overview page
- [TW-16570](#) - Parameters are not resolved while creating build configuration
- [TW-16766](#) - TFS - Failed to create an IPC Port: Access is denied
- [TW-16980](#) - EMMA Coverage support: Eclipse plugin does not show coverage info for blocks
- [TW-16992](#) - Same custom data storage can be reused for build triggers even if triggers have different parameters
- [TW-17001](#) - Custom build strips newline characters from build parameters
- [TW-17035](#) - UNC target path causes artifact resolving failure
- [TW-17060](#) - MSBuild/solution runner does not work if project path starts with /
- [TW-17072](#) - DotCover filters can no longer use templated properties
- [TW-17073](#) - On associating a project with a complex template, the details of the first field is hidden.
- [TW-17147](#) - AssemblyInfo Patcher doesn't patch any files and doesn't log anything
- [TW-17162](#) - Exception on saving StarTeam VCS root with reference in URL
- [TW-14474](#) - Clicking on "View Help" question mark in IE8 causes main browser window follow the help link
- [TW-16474](#) - Agent push dialog may not update on platform choosing
- [TW-16606](#) - Display build step names for build configurations on Project administration page
- [TW-16860](#) - .NET Framework detection should check files under found .NET folders
- [TW-16995](#) - Cannot collect code coverage with IDEA coverage: Class not found: java.io.IOException: Class not found
- [TW-17010](#) - Argument 0 for @NotNull parameter of jetbrains/buildServer/serverSide/systemProblems/SystemProblem.<init> must not be null
- [TW-17054](#) - Build artifacts tree may not update if build artifacts are changed during the build
- [TW-17066](#) - Cannot modify build parameter when it's inherited from both template and project
- [TW-17074](#) - CommandLine runner environment variable selection disappears after selecting script then reverting to executable
- [TW-17092](#) - Autocompletion in run custom build dialog stops working after dialog close and subsequent re-open
- [TW-17114](#) - Project parameter inheritance is broken after project copying
- [TW-17119](#) - Script file setting does not work properly with environment/system properties
- [TW-16369](#) - Broken link to help topic in the login dialog
- [TW-17059](#) - Databases Properties Table / MS SQL: jdbc version mismatch (between text and link)

## Exception

- [TW-16894](#) - MSTest runner stopped working
- [TW-15441](#) - Index was outside the bounds of the array.
- [TW-16808](#) - Length cannot be less than zero. Parameter name: length
- [TW-17042](#) - EA-27945 - NSME: IDEAAActivator.suggestPatchFileName
- [TW-17089](#) - EA-28038 - assert: MarkupModelImpl.<init>

## Performance Problem

- [TW-16465](#) - Memory leak on build queue page
