

Eluru 6.5.2 (build 17935) Release Notes

Feature

- [TW-17006](#) - Inform VS addin users who use Git of Mercurial about remote run on branches
- [TW-16656](#) - Allow to specify user under whom to run agent on agent push
- [TW-16000](#) - Request to allow snapshot dependencies to build on same agent AND not require a run if up-to-date
- [TW-14271](#) - Add detected VCS changes to server statistics
- [TW-9921](#) - Add Filter "By Current Solution" to MyChanges

Usability Problem

- [TW-17516](#) - Make unmute option "When test passes succssfully" default
- [TW-17363](#) - Muted test popup does not show anything about unmute method
- [TW-17357](#) - "Updating data from server" progress dialog is shown periodically if build log tab is opened in IntelliJ IDEA plugin
- [TW-17348](#) - Keep scroll position at the bottom of the page for the tail mode, as we do it for All messages for running build
- [TW-17294](#) - Do not show remote run dialog if suitable configurations list is empty
- [TW-17208](#) - Invalid change file listing on details page
- [TW-17026](#) - Ease discovery of per-project roles enabling in professional edition
- [TW-16993](#) - No indication that unmute was successful
- [TW-16876](#) - Open stacktrace in IDE feature has poor usability
- [TW-16722](#) - On copying build step, place it after the original, not in the end of the list
- [TW-16668](#) - 'Run custom build' dialog continues to insert build parameters after their removal
- [TW-16449](#) - It's likely to add more Mute controls on the bottom of near the test
- [TW-16076](#) - Do not use same default build log tab all the time
- [TW-14732](#) - Percentage on server statistics values is unclear
- [TW-14647](#) - Next/prvious builds links does not preserve selected build log subtab
- [TW-14331](#) - Opening build log tail requires two clicks form builds list
- [TW-11878](#) - Filter by current solution hides deleted files

Bug

- [TW-17570](#) - Exception when setting up build agent on ec2
- [TW-17558](#) - Agent compatibility may not be updated and build cannot run on a compatible agent (dep. property reference to updating build)
- [TW-17543](#) - Add limitation to investigate/mute commen field in UI
- [TW-17535](#) - Warn in log on loading project charts: Extension ...statistics... attempted to overwrite value of the model parameter ...
- [TW-17530](#) - Build Error TeamCity 6.5.1 (build 17834) - vcs/VcsChange.<init> must not be null
- [TW-17523](#) - Two instances of the build (one in the queue and one running) can appear if running build fails to start (exception is thrown from .start())
- [TW-17515](#) - Builds reusing may not work for the builds with more than one VCS root
- [TW-17514](#) - If user account is created by LDAP plugin during synchronization VCS usernames will not have default values
- [TW-17512](#) - Change viewers extensions stopped working after the upgrade to TeamCity 6.5
- [TW-17511](#) - Agent can delete too many checkout directories in order to comply with free disk space requirement
- [TW-17510](#) - Build hangs forever if output contains very long line of log output
- [TW-17502](#) - Shelve... operation in eclipse should shelve just the changes, like a patch
- [TW-17490](#) - Build Agent may hung stopping a build on publishing artifacts stage
- [TW-17488](#) - IDEA project runner adds one more program parameter to Main class
- [TW-17467](#) - TFS plugin implicitly requires .NET Framework 3.5
- [TW-17458](#) - IDEA project reparse does not detect path variables in modules
- [TW-17456](#) - NUnit or NUnitTeamCity task may log error even if ContinueOnError was set to "True"
- [TW-17446](#) - agents sometimes get stuck while downloading artifacts
- [TW-17434](#) - NPE in converter during upgrade from 6.0 to 6.5
- [TW-17428](#) - Autoincrementer increments by 4 instead of 1
- [TW-17412](#) - No test for investigation entry messages in the server log
- [TW-17411](#) - Do not show link to open stacktrace for ignored test, as it does not make sense
- [TW-17396](#) - Surefire Watcher Counting tests multiple times
- [TW-17393](#) - MAVEN_OPTS not being used
- [TW-17373](#) - Backup from maintanDB when server is running: avoid failures on running build
- [TW-17354](#) - TeamCity should not fail build on error messages caused by muted tests
- [TW-17343](#) - jetbrains.buildServer.serverSide.auth.AuthenticationFailedException: Username or password doesn't match
- [TW-17340](#) - Typo in overview page source

- TW-17338 - TEAMCITY_AGENT_OPTS environment variable constantly increases on Unix agents
- TW-17334 - P4 workspace cannot be cleaned up when there are open files (checkout on agent case)
- TW-17332 - Support users synchronization when the number of users in LDAP greatly exceeds number of TeamCity users
- TW-17318 - Error extracting artifact dependency archive
- TW-17308 - "Build configuration does not exist: null" when navigating to "Fixed in build" from YouTrack
- TW-17307 - v6.5 can not show junit xml system-out to the failed test stack
- TW-17304 - docx artifacts open/save as zip files, should retain docx extension
- TW-17298 - Unable to check/uncheck items in remote run dialog in IDEA 9.0.x
- TW-17283 - "Artifact paths" in "General Settings" are not trimmed
- TW-17273 - After upgrade to 6.5 build slows down (parameters resolution case for many parameters)
- TW-17254 - Do not see thread dump files on the Agent Logs tab
- TW-17251 - Keyboard navigation on My Changes quickly becomes broken
- TW-17249 - JUnit test report is not parsed properly.
- TW-17243 - org.apache.jasper.JasperException: /plugins/priority-queue/priorityClassList.jsp under Tomcat 7
- TW-17232 - NPE from BasicAmazonSyncClient.checkEc2Exception
- TW-17230 - Ctrl-t doesn't work on My Changes in firefox 4.0 (build 17834)
- TW-17216 - Wrong style of the header in diff view opened for build configuration change
- TW-17197 - Filter by project data should not affect open in IDE functionality
- TW-17189 - Possible memory leak in IntelliJ IDEA plugin
- TW-17145 - NPE in ProjectDataLoader
- TW-17141 - Checking for changes in ClearCase hangs if config spec does not end with line separator
- TW-17090 - 6.5.x command.line.zip (#7) not compatible with server 6.5 (build 17795)
- TW-17057 - Attempt to navigate to running build from IDE(TeamCity Watched projects view) may cause an Eclipse crash
- TW-17046 - Backup fails on file open error
- TW-17003 - Triggered by shown for remote run build triggered from IntelliJ IDEA plugin shows user name twice
- TW-16967 - Build failed for bitbucket.org powered project
- TW-16966 - Failed to mute test if comment is too long
- TW-16961 - First failed in is not always shown for failed test
- TW-16954 - Browser memory leak on change details (problems) page
- TW-16638 - 'Build not found' after click 'Details' link in personal build failed notification view
- TW-16636 - 'Nothing found to display' message when choose build configuration to browse duplicates and inspections
- TW-16484 - On inability to find Java agent push should print descriptive message on where the Java is searched for
- TW-16397 - Automatically authorize agents that were installed using agent push
- TW-16396 - Agent push fails with "The specified service already exists"
- TW-15907 - JavaDowser should not prefer older JRockit to a newer one
- TW-15886 - Agent may hung on OOM in message sending
- TW-15666 - Extra cloud agents can be launched (more then there are builds in the queue)
- TW-15614 - No matched options in the filtering drop down looks the same as nothing was typed
- TW-15036 - Automatic re-enable agent function does not always work properly
- TW-14505 - "Cannot start backup process: Backup is already running." on backup UI
- TW-12460 - Multiple arguments in TestList doesn't work properly
- TW-11658 - Files are left in temp directory after server shutdown

Exception

- TW-17495 - The operation identifier is not valid. Please check Perforce settings.
- TW-17485 - Exception on attempt to assign test investigator (from popup)
- TW-17406 - EA-28398 - assert: ComponentManagerImpl.getComponent
- TW-17347 - Couldn't resolve parametrized type name from test name
Global360.EmpowerTests.FunctionalTests.EmpowerRestService.ViewResult.ViewGetResultItemsTests.Te
- TW-17309 - Exception when viewing audit action change
- TW-17291 - Task executor UI failed to initialize. There is no Application Shell running.
- TW-17198 - Failed to compare two elements in the array. At least one object must implement IComparable.
- TW-17194 - Click on muted test on Current Problems page (which failed in several configurations) gives exception
- TW-16968 - Input string was not in a correct format.
- TW-16808 - Length cannot be less than zero. Parameter name: length

Performance Problem

- TW-17517 - Artifacts uploader may cause unnecessary IO activity if artifacts directory and work directory are on different filesystems
- TW-17513 - Build may not start on agent if pending changes list contains a lot of changes (thousands)
- TW-17435 - Too many getFileContent requests can cause server slowdown if VCS repository is Git
- TW-17287 - Upgrade from 6.0.3 => 6.5.1 tomcat uses 100% of the CPU

Cosmetics

- [TW-17356](#) - VS addin: "No version control is enabled" message is not gone after I enable one in settings
- [TW-17277](#) - Typo in string warning that Java 1.5 agents should upgrade
- [TW-16501](#) - Bad layout for params popup icons on VCS root settings pages
- [TW-16177](#) - Edit roles page action links font is too small
- [TW-13884](#) - Too narrow value columns on usage statistics
