[TeamCity 2018.1 Release Notes](#)

Bug

- [TW-58053](#) - Build status links on agents page don't work
- [TW-58064](#) - Build chains layout breaks if there are running builds
- [TW-58285](#) - Builds are stuck in queue waiting for read shared resource to become free
- [TW-57913](#) - UI is corrupted for VCS trigger after Branch filter is edited.
- [TW-57315](#) - Custom JaCoCo coverage import fails with NPE
- [TW-58266](#) - Build running during upgrade to 2018.1.4 or 2018.2 can abruptly stop with incomplete build log and artifacts
- [TW-58344](#) - Build revision drops after merge commit when using perforce stream support
- [TW-58237](#) - Adding a Trusted Certificate Breaks LDAP Authentication which starts to report "Connection reset"
- [TW-57985](#) - Invoking of run custom build dialog causes build list blinks (or refresh) on build configuration overview
- [TW-58019](#) - Artifacts are displayed behind Search popup
- [TW-58056](#) - Empty popup on fist click in the breadcrumb icon
- [TW-58281](#) - Not able to add build failure condition for ReSharper inspection runner in template
- [TW-49776](#) - OSX Agent isn't starting after OS reboot
- [TW-57971](#) - Docker Registry connection to a host with self-signed HTTPS certificate
- [TW-58114](#) - Projects popup does not load in IE11

Performance Problem

- [TW-58347](#) - Processing of a VCS trigger in a build configuration with lots of branches can be slow even though there are no pending changes in these branches
