

Eluru 6.5.3 (build 17985) Release Notes

Feature

- [TW-17717](#) - Add server version and build number to Unexpected error message

Usability Problem

- [TW-14396](#) - Browser (FireFox) suggests to remember maintenance mode authentication token

Bug

- [TW-12352](#) - Agent can hang after OutOfMemory while trying to send messages to the server
- [TW-12724](#) - Can't stop running build (hanging MSSQL connection)
- [TW-14981](#) - UnknownHostException on TeamCity server start
- [TW-16480](#) - In case agent cannot be installed as a service, report this but run the agent without service
- [TW-16576](#) - Duplicates-runner causes SQL Server 2008 deadlock when run concurrently with other build-configs running duplicates-runners
- [TW-17522](#) - Typing in filtering drop-down selects unpredictable items by default
- [TW-17568](#) - Build might be not stopped on execution timeout
- [TW-17584](#) - Cannot use agent push to Windows XP: "Found existing 'TCBuildAgent' Service"
- [TW-17586](#) - Teamcity fails to resolve artifact dependency for artifact name containing '.teamcity'
- [TW-17589](#) - Add "last finished with specified tag" to project report tab dialog
- [TW-17620](#) - .Net process runner: allow to specify working directory
- [TW-17626](#) - Tail mode for build log is not shown for running build
- [TW-17648](#) - Remove "Remote run outgoing changes" from popup menu shown for concrete change list
- [TW-17657](#) - Amazon profile editing: "hasRegion is not defined"
- [TW-17658](#) - Deadlock in Code coverage subsystem
- [TW-17661](#) - [eclipse plugin & svn] one user who have no permission to commit code into SVN repository use eclipse plugin to pre-tested commit the changes ,but the fanal status is (committed) not (commit failed))
- [TW-17674](#) - TeamCity doesn't substitute values for IDEA path variables in certain fields of Run Configurations
- [TW-17675](#) - Error for not-yet-upgraded and build running agent after upgrade (AgentDetailsDescription.getOperatingSystemName must not return null)
- [TW-17678](#) - JS alert on My Changes
- [TW-17679](#) - Build might not fail if test fails, while it should (specific build fail options)
- [TW-17689](#) - VS addin: Failed to collect pending changes in Subversion
- [TW-17694](#) - Unexpected Error when viewing changed files
- [TW-17699](#) - ClearCase labeling fails in 6.5.1
- [TW-17709](#) - maven.project.version parameter is not resolved
- [TW-17710](#) - Changing Changes Checking Interval in VCS root settings requires server restart
- [TW-17711](#) - XML report processing (NUnit) keeps hoding file handle
- [TW-17755](#) - <deleted VCS root> prefix in deleted Mercurial VCS root grows on each page refresh
- [TW-17756](#) - Memory leak
- [TW-17761](#) - Compilation warnings are displayed as errors.
- [TW-17764](#) - Erroneous compilation failure
- [TW-17769](#) - "My Changes" link does not work
- [TW-17776](#) - NoClassDefFoundError: groovy/lang/GroovyObject during Inspections after upgrade to 6.5.2
- [TW-17795](#) - NPE in AntMessagesProcessor.isTimeoutMessage
- [TW-17804](#) - Viewing build logs as guest displays only "You do not have enough permissions to edit own settings"

Exception

- [TW-17603](#) - Exception in IDEA plugin
- [TW-17644](#) - Exception of type 'JetBrains.Application.Progress.ProcessCancelledException' was thrown.

Cosmetics

- [TW-17629](#) - Typo in MSBuild warning - "MSBuild command line parameters contains "/property:" or "/p:" parameters. Please use Build Parameteres instead."
- [TW-17668](#) - Poor wording in notification settings
- [TW-17750](#) - TeamCity web UI, "Associate with Template" dialog contains a misprint
- [TW-17767](#) - Let's use gray color for ignored tests comments
