

PhpStorm EAP 172.2273 Release Notes

PHP Completion	Feature	WI-5429	Allow 'Complete Class Name' to work inside string literals
PHP Composer	Usability	WI-36314	Composer New Project: make interpreter settings visible
PHP Formatter	Feature	WI-35633	Add a code setting style to enforce a newline between `<?php` and whatever
	Feature	WI-6966	Add parenthesis options for "if" statement
	Feature	WI-9428	Allow keeping format for PHP statements on a single line
	Feature	WI-9161	Separate bracket formatting options for closures from method/function options
	Bug	WI-34737	Minimum blank lines value in "Before "Use" statement" in editor is one line less when namespace is omitted
PHP Inspections	Bug	WI-36308	Hierarchy check: Declaration incompatibility is not detected in case constructor has different number of arguments in comparison to parent class that implements interface
	Bug	WI-16531	Function name must be callable - a string, Closure or class implementing <code>__invoke</code> , currently array
PHP lang	Feature	WI-2164	Please highlight \$this usages
	Bug	WI-4438	PHP: function inside method: self, static, parent erroneously resolved to the method's class
	Bug	WI-36281	Complete current statement works improperly with uniform variable syntax
	Bug	WI-28980	On statement move collapsed Multi-line Comment opens again
	Bug	WI-36347	First PHPDoc comment doesn't respect settings
	Usability	WI-36354	PHP Goto Label colouring should inherit from Identifiers -> Label instead of Identifiers -> default
PHP project configuration	Bug	WI-36307	Incorrect default stubs path message shows too many messages
PHP templates	Bug	WI-36294	Blade: structure view don't treat @show as closing tag for @section and doesn't take into account @stack tag
Plugin: Deployment _ FTP..	Bug	WI-36363	Create new project from existing source: Project root and all other button disabled during the indexing
	Bug	WI-36362	New Project From Existing Source: Empty tree for remote server
	Usability	WI-36198	Deleting server in deployment setting deletes it from all projects and cannot be restored
	Usability	WI-36287	Simple default project root for 'Create from Existing Files'
	Usability	WI-36027	Deployment menu in Settings automatically sets focus to host address
Plugin: WordPress	Usability	WI-35902	Undefined variable: don't mark global variable as undefined
PHP Parser	Bug	WI-20723	Text from @return PHPDoc block not shown in Quick Documentation window in some cases
PHP Type Inference	Bug	WI-35018	Wrong function parameter type detection in closure «use» construct
PHPDoc	Bug	WI-29641	@method annotation is not recognized if return type is array[]
	Usability	WI-36296	In @method annotation \$this is not resolved
No subsystem	Bug	IDEA-172231	Incorrect rendering of text with combining marks
	Bug	IDEA-172559	Quick-search does not work in "Register new file type association" dialog

	Bug	IDEA-172558	Progress popup is small by default
	Bug	IDEA-172705	Big files marked as read-only can't be deleted
	Bug	IDEA-140901	Tip of the Day is not working nicely with HiDPI under Linux
	Bug	IDEA-147100	Default File Header template causes pointless javadocs in projects
	Cosmetics	IDEA-96168	PhpStorm window is not restored in proper maximized state on Windows OS
Debugger	Bug	IDEA-172812	Breakpoints are shown twice in Breakpoints dialog
	Bug	IDEA-172505	Gradle multmodule project debug jumps to wrong module for breakpoint
Diff_Merge	Feature	IDEA-170174	Implement "Mirror to left/right" from FTP compare on local compare
Docker	Feature	IDEA-170246	Docker: Support HEALTHCHECK and SHELL instructions in the Dockerfile
Editor. Editing Text	Feature	IDEA-163986	Code complete second default array argument in annotation
	Usability	IDEA-127845	Select logical line rather than visual line if an action which requires selection is invoked
	Exception	IDEA-172324	IndexOutOfBoundsException in SegmentArrayWithData
Find, Replace, Find Usages	Bug	IDEA-169849	Can't undo in Find in Path
	Cosmetics	IDEA-172116	Module dropdown in find window is too narrow, not resizable or scrollable
Local History	Bug	IDEA-172561	Local history diff is not properly rendered unless dialog is resized
	Bug	IDEA-171946	local history revert a dot is inserted in first char of file
Plugin Support. API	Bug	IDEA-168525	add possibility to listen to ant build events
Run Debug configuration	Bug	IDEA-168849	Cannot stop build with keyboard or menu
	Bug	IDEA-169025	Preserve run configurations order
UML	Exception	IDEA-172728	NPE at com.intellij.uml.UmlFileEditorImpl.<init>
User Interface	Bug	IDEA-172571	IntelliJ IDEA won't start on Mac OS Sierra
	Bug	IDEA-171750	Code lens "turn off" option not working
Data Import & Export	Cosmetics	DBE-4572	Spelling error in notification after import errors
SQL Editing	Bug	DBE-1288	Rename of sequence breaks invocation syntax
Dart	Usability	WEB-25995	Preserve Dart problems filter settings
JavaScript	Bug	WEB-26408	Flow object type spread is not supported
	Bug	WEB-20791	Move Statement Down action breaks code
JavaScript. Formatter	Feature	WEB-26042	Add minimum number of blank lines to Typescript Code Style
	Bug	WEB-17628	javascript indentation problem
	Bug	WEB-26559	Code Style: JavaScript/TypeScript: improve Arrangement
	Bug	WEB-24527	Phpstorm does bad auto formatting in functions with jsdoc inside arrays
	Bug	WEB-24513	Reformat code action doesn't retain indent for ES6 shorthand arrow function
JavaScript. Frameworks	Bug	WEB-26833	Formatting: Code Styles: JS/TS: "Keep Maximum Blank Lines" option saves only 2 blank lines
Linters	Bug	WEB-24814	Enable TSLint by default for Angular CLI projects
Node.js	Bug	WEB-26806	Can't enable node core library
Profiling	Bug	WEB-26814	node.js profiler doesn't work with node v7
