

EAP 8810 Release Notes

JavaEE facets packaging improvements

Java modules and libraries can be packaged directly in EAR:

GWT support improvements

- "new" expression in GWT JavaScript methods supported (resolving and completion):

```
var msg = @nik.client.MyModule.Message::|
msg.@nik.client.MyModule.Message::
/;

var msg = @nik.client.MyModule.Message::new(Ljava/lang/String;)()
msg.@nik.client.MyModule.Message::showAlert()()
```

- "Show parameters info" action (Ctrl+P) supported in GWT JavaScript methods:

```
msg.@nik.client.MyModule.Message::showMessage(Ljava/lang/String;)()
}~*/; String s
```

FreeMarker support

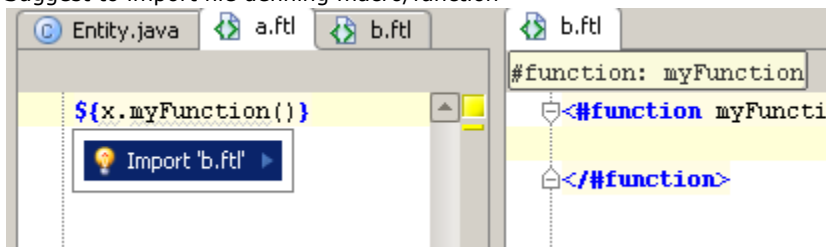

- Add runtime methods to variables

```
<!-- @ftlvariable name="x.y" type="java.lang.String" -->

${x.y.dynamicMethod()}

Inspection 'References inspection' options
Create dynamic method 'dynamicMethod'
```

- Suggest to import file defining macro/function

Injected language fragments highlighting

```

//.....
public Object f(String str) {
.....
String s = str.replaceAll("\\t [\\n\\r\\t]*", "\\t\\3\\098");
.....
Pattern pattern = Pattern.compile("[A-Za-z]+[skdjhg]*");
.....
final Pattern pattern2 = Pattern.compile("[skdjhg]*".
.....
replaceAll("[\\[\\]\\^\\|\\(\\)\\{\\}\\|\\|\\-]", "\\|\\$1").
replaceAll("\\.", "\\|\\.");
.....
replaceAll("\\|*", "\\|\\.\\|*");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
s = s.replaceAll("\\|");
.....
return s;
}

```
