

EAP 7255 Release Notes

Highlight Usages in File (Ctrl-Shift-F7) now toggleable

Press Ctrl-Shift-F7 on 'a' highlights all usages of variable 'a' in the file.
Press Ctrl-Shift-F7 on 'b' adds all usages of variable 'a' to highlights.
Press Ctrl-Shift-F7 on 'a' again removes highlights of variable 'a' usages.

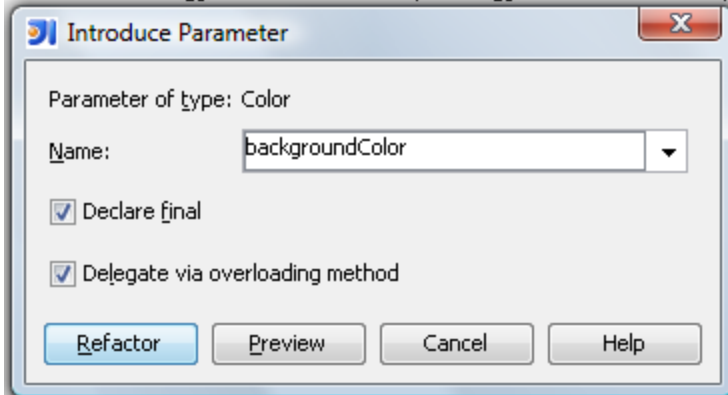

Extract Chained Constructor

"Delegate via Overloading Method" in Introduce Parameter

Before

```
private HyperlinkLabel createActionLabel(final String text, @NonNls final String actionId) {
    HyperlinkLabel label = new HyperlinkLabel(text, Color.BLUE, LightColors.YELLOW, Color.BLUE);
    label.addHyperlinkListener(new HyperlinkListener() {
```

```
    e) {
        type.ACTIVATED) {
```

```
        ().getAction(actionId);
        , DataManager.getInstance().getDataContext
        on.getTemplatePresentation(), ActionManage
```

```
        action.beforeActionPerformedUpdate(event);
```

After

```
private HyperlinkLabel createActionLabel(final String text, @NonNls final String actionId) {
    return createActionLabel(text, actionId, LightColors.YELLOW);
}
```

```
private HyperlinkLabel createActionLabel(final String text, @NonNls final String actionId, final Color backgroundColor) {
    HyperlinkLabel label = new HyperlinkLabel(text, Color.BLUE, backgroundColor, Color.BLUE);
```
