

# Indore 2017.1.1 (build 46654) Release Notes

See also: [TeamCity 2017.1 Release Notes](#)

[Fixed issues in tracker](#)

## Feature

- [TW-45124](#) - Some git operations (e.g. ls-remote) are repeated for both git mirror and checkout directory, while the result can be reused
- [TW-49696](#) - Update bundled dot net tools (inspections and dupFinder) to 2017.1
- [TW-49810](#) - Server API: fetching all unregistered agents, including the unauthorized ones

## Usability Problem

- [TW-46067](#) - Expand/Collapse control not visible in Test analysis blocks
- [TW-48236](#) - No clear reason provided in case invalid credentials are specified in VMWare cloud profile
- [TW-48330](#) - Clicking on Show full build log can result in browser crash (huge build log)
- [TW-48417](#) - Confusing logging when there are several artifact paths publishing single files
- [TW-48420](#) - Cloud profiles. The cloud profiles counter is not refreshed after project containing profile was deleted.
- [TW-48544](#) - 'Show in build log' doesn't work with a partial build log
- [TW-49216](#) - Redundant click in add snapshot dependency dialog
- [TW-49552](#) - Mute Usability problem - unexpected project scope change (set project scope parent from current project and project with existing mutes)
- [TW-49602](#) - Timeouts connecting to BitBucket in AWS
- [TW-49638](#) - Version settings enabled/disabled state after upgrade can be confusing
- [TW-49671](#) - Distinct view of prompted params when "Allow builds in the default branch" is unchecked
- [TW-49746](#) - Do not repeat the current directory in the build log on Git checkout commands logging
- [TW-49748](#) - Show cloud profiles from subprojects
- [TW-49778](#) - "Show investigated tests" checkbox should affect fixed tests, too
- [TW-49779](#) - Flaky Test Detector: The tool bar of the "Flaky Tests" tab should be consistent with that of the "Current Problems" tab

## Bug

- [TW-17938](#) - Incorrect password locks AD domain account after first attempt ("Microsoft Windows domain" auth under Linux)
- [TW-21983](#) - Filter for Adding Priority Classes Requires Escaping
- [TW-27786](#) - User can see "Parameters" link in the build popup, while be not able to access Parameters tab
- [TW-39208](#) - Project administrator sees configurations of parent project in Administration list, but gets "You do not have enough permissions to modify project with id" on click on them
- [TW-39480](#) - Cannot remove last build configuration from priority class
- [TW-41157](#) - Priority class has build configurations in order of build configuration names instead of fully qualified names
- [TW-41601](#) - "Reset" action for a modified parameter in custom run build dialog might not work (many parameters case)
- [TW-45856](#) - VCS roots table is completely hidden on no entries after "Show VCS roots from sub-projects" option change
- [TW-45892](#) - Agent push on Windows fails via https when custom SSL Certificate is used.
- [TW-48103](#) - Agent-side git checkout from TFS/git locks domain accounts
- [TW-48117](#) - Incorrect logging when switch for server-side checkout
- [TW-48122](#) - perforce login failure when launched at boot (p4tickets cannot be used as passwords)
- [TW-48442](#) - Cloud profiles. Provide ability to disable cloud integration per project.
- [TW-48554](#) - Display correct path to the project enforced settings are inherited from.
- [TW-48653](#) - Scope of an investigation cannot be changed in the Investigate dialog after topmost project is selected in the dropdown
- [TW-48692](#) - Perforce agent checkout: Cannot remove workspace xxx: Client xxx deleted
- [TW-48864](#) - Test Connection for BitBucket (Stash) is false success
- [TW-48919](#) - Highly misleading repeating "Marking checkout directory as 'dirty'" logging in agent log: brush up related logging
- [TW-49001](#) - SSH Exec results in the error "Cannot find ssh key"
- [TW-49019](#) - Build Types added to project via REST API Disappear a short time later
- [TW-49097](#) - NPE when incorrect protocol is used in vCenter SDK URL in Cloud profile.
- [TW-49235](#) - Enforced settings. Disable enforced properties when build configuration is extracted or associated with template.
- [TW-49378](#) - "Parameter preferences" button doesn't work when creating new VCS root
- [TW-49415](#) - Wrong "The selected settings format disables editing via UI. Do you want to continue?" on attempt to save versioned settings for the project without changes
- [TW-49441](#) - Align validation error on User Profile page
- [TW-49457](#) - Scrolling does not work in polymer branch selector in FF

- TW-49462 - Notification rule is being affected by subsequent rule while should not
- TW-49472 - External Storage Artifacts plugin does not perform cleanup
- TW-49473 - Branch selector popup on Overview page should be closed when projects are expanded.
- TW-49506 - "Versioned settings are globally disabled" can be shown to the users who cannot edit the affected projects
- TW-49508 - Tests tab of a build does not refresh while the build is running.
- TW-49517 - JavaScript error on User Profile page (Microsoft Edge)
- TW-49518 - "The changes are not yet saved" yellow bar appears when cloud profile is opened.
- TW-49525 - Cloud profiles. Suggest to terminate running when cloud profiles are disabled.
- TW-49557 - Do not show edit external artifact storage link for user without admin rights
- TW-49560 - S3 Artifact Storage: JavaScript error in console when opening "Show usages" dialog
- TW-49561 - Artifacts Publishing: Misleading logging for build if no user artifacts are published
- TW-49563 - External Artifacts Storage: remove misleading hint about S3 Artifacts from Artifacts tab for builds without published artifacts
- TW-49570 - Confusing multiple "Retrieve settings, revision" blocks in the build log
- TW-49586 - rdp\_icon@2x.gif not found on Agent page
- TW-49588 - minus16@2.png not found on "Agents / Matrix" page
- TW-49591 - Polymer based selector is not collapsed in IE Explorer 11 when configuration is selected in Add Artifact dependency dialog.
- TW-49597 - No error on UI when general settings cannot be saved due to disk is out of space
- TW-49598 - "java.io.IOException: There is not enough space on the disk " can be shown as server error
- TW-49609 - JS error on Testing connection in Cross-Server Projects Popup in IE Explorer 11.
- TW-49611 - JS error on "Using Cached Data" pressing in Projects Popup in IE Explorer 11.
- TW-49612 - TFS plugin in java mode sometime fails with "Unable to connect to TFS server: java.sql.SQLException: Table not found"
- TW-49614 - Impossible to edit multiple snapshot dependencies.
- TW-49616 - Editing cloud profile stops builds on all agents from that profile
- TW-49630 - Empty space for Default branch doesn't help, if I want to click it
- TW-49632 - Custom maven selection does not work if no maven tool is installed
- TW-49634 - nuget url issue with decoding "+" sign: changed behavior in 2017.1
- TW-49637 - External Artifact Storage: make built-in artifacts storage active when current active configuration is deleted
- TW-49641 - Excessive logging for guest user access in the auth log
- TW-49649 - Upgrade fails with MoveCloudProfilesToRootProject exception
- TW-49662 - Error "bean messagesAvailable not found within scope" on loading possibly corrupted build log
- TW-49665 - File Content Replacer: Agent-side ConcurrentModificationException if there're unchanged files
- TW-49666 - Broken links to the build configuration in breadcrumb's popup (incorrectly constructed server's host)
- TW-49673 - Changing agent pool filter back to 'Any' on 'Build Time' page has no effect
- TW-49678 - IDEA runner 'check/reparse project' does not understand Java 9 usages in Run Configurations
- TW-49679 - Plugins which implement the pre-10.0 version of BuildMessagesTranslator may render agents unusable
- TW-49681 - IllegalStateException in VMWareEditProfileController.doPost()
- TW-49682 - Branch selector is shown where filtering by branch was never supported
- TW-49688 - "Failed to collect changes, error: Builds in default branch are disabled in build configuration" when "Allow builds in default branch" is unchecked and default branch was changed
- TW-49702 - Artifact plugins should properly handle all kind of target paths
- TW-49717 - NuGet Dependency trigger is not working when TeamCity server running on non-windows machine without mono installed
- TW-49719 - Test reordering parameters are not recognized as present when used in referencnes
- TW-49724 - Can't download package with '+' in version string from TeamCity
- TW-49729 - Make sure CSRF check does not break login form submission even if the proxy is configured incorrectly
- TW-49730 - Improve exception reporting in tfs java out of process app
- TW-49731 - 'Disable custom order' button layout is broken in Firefox
- TW-49734 - Build chain view might not allow to scroll to the first build after browser window resize
- TW-49740 - To add ability to disable progress of git operations on the agent
- TW-49741 - Server configure command may corrupt installation on trying to change context to the same
- TW-49745 - Unable to create cloud profile with empty terminate instance idle time
- TW-49753 - Server does not start with " Failed to load TeamCity configuration. Build configuration with internal id "btXXX" does not exist anymore" on loading queue
- TW-49767 - Investigation counter not updated once investigation problem disappear
- TW-49768 - Build Log "All messages" (also other tabs) view can show internal messages after an ajax update or block expand
- TW-49772 - teamcity.dont.delete.temp.files = false still keeps temp files
- TW-49774 - Invalidate local TFS workspace cache while agent checkout
- TW-49776 - OSX Agent isn't starting after os reboot
- TW-49777 - Confusing TFS agent-side checkout error: "Failed to create workspace: The path... is already mapped in workspace ..."
- TW-49782 - Removing submodule after last editing of project settings leads to error in builds.
- TW-49783 - Project vcs roots page shows VCS roots and their usages from projects where current user has view project permission only
- TW-49784 - Async trigger errors are logged repeatedly, while the message suggests only the first occurrence should be logged
- TW-49786 - Git plugin attempts to use sparse checkout and fails
- TW-49790 - "Delete User Account" does not work: Uncaught TypeError: this.formElement is not a function
- TW-49795 - Azure Artifacts Storage: custom report tab doesn't work

- [TW-49800](#) - Nodes configuration page shows total number of running builds instead of a number of builds assigned to the second node
- [TW-49811](#) - Mercurial plugin runs agent-side checkout and fails when 2 roots are in the same dir
- [TW-49825](#) - No validation error is displayed on Registration page for invalid email
- [TW-49837](#) - Project popup doesn't show build configurations hidden on Overview page
- [TW-49843](#) - Adding a build configuration to priority class doesn't remove it from old class
- [TW-49846](#) - TFS agent checkout in custom directory may recycle workspaces in each run
- [TW-49857](#) - Branch filter is not applied when changing build history filters
- [TW-49864](#) - Branch selector is missing on Statistics and Pending changes tabs for build configuration home
- [TW-49873](#) - Make sure CSRF check does not break secondary login forms submission even if the proxy is configured incorrectly

## Exception

- [TW-48226](#) - MalformedURLException exception in teamcity-clouds.log when vcenter url has no protocol

## Performance Problem

- [TW-49485](#) - Slow investigation dialog opening: slow committers calculation
- [TW-49860](#) - Delays with processing of build messages in case when the same problem is reported many times for the same build

## Cosmetics

- [TW-48385](#) - Add note in the UI about supported suffixes when 'bytes' units are used in fail on metric change failure condition
- [TW-49098](#) - Incorrect link to vCenter SDK URL help topic.
- [TW-49464](#) - Provide alphabetical order in IAM Profile selector.
- [TW-49606](#) - Update Working with Windows Tray Notifier section in the documentation.
- [TW-49644](#) - Duplicate error message when replacement cannot be applied
